Natural Hazards: Earth's Processes as Hazards, Disasters, and Catastrophes (4th Edition) Edward Keller, Duane DeVecchio, 2015-05-20

My Tsunami Journey Mark Dowd, 2022-04-11 How can we reconcile belief in a loving God with the suffering of innocent human beings and earthly creatures in the natural world This question as old as the Old Testament's book of Job has been mainly grappled with over the centuries by learned theologians and philosophers But in this groundbreaking work the author is sent on a journey across thousands of miles to speak to Hindus Muslims Buddhists and Christians like himself following the 2004 colossal tsunami waves that killed more than 230 000 people In the wake of such carnage why do some people lose their faith while others emerge with it intact and strengthened Are these events in the natural world really linked to divine justice as punishment for sin And if not what are the best possible explanations for why an intelligent and caring deity would fashion a world in which babies can die of leukemia and the elderly fall victim to deadly viruses such as COVID 19 This account will offer profound food for thought for troubled believers and curious agnostics alike

Michael Feener, 2016-04-06 Providing a detailed and comparative assessment of the humanitarian responses to a series of major disasters in Asia over the past two decades including massive earthquakes volcanic eruptions and tsunamis this book explores complex and changing understandings and practices of relief recovery and reconstruction These critical investigations raise questions about the position and responsibilities of a growing range of stakeholders and provide in depth explorations of the ways in which local communities are transformed on multiple levels not only by the impact of disaster events but also by the experiences of rebuilding This timely volume highlights how the experiences of Asia can contribute towards post disaster responses globally to safeguard future communities and reduce vulnerabilities This is a valuable resource for academic researchers interested in post
