Time Warped Unlocking The Mysteries Of Time Perception:

Time Warped Claudia Hammond, 2012-08-15 We are obsessed with time However hard we might try it is almost impossible to spend even one day without the marker of a clock But how much do we understand about time and is it possible to retrain our brains and improve our relationship with it Drawing on the latest research from the fields of psychology neuroscience and biology and using original research on the way memory shapes our understanding of time acclaimed writer and broadcaster Claudia Hammond delves into the mysteries of time perception Along the way she introduces us to an extraordinary array of colourful characters willing to go to great lengths in the interests of research such as the French speleologist Michel who spends two months in an ice cave in complete darkness *Time Warped* shows us how to manage our time more efficiently speed time up and slow it down at will plan for the future with more accuracy and ultimately use the warping of time to our own advantage

Time Warped Claudia Hammond, 2012 We are obsessed with time However hard we might try it is almost impossible to spend even one day without the marker of a clock But how much do we understand about time and is it possible to retrain our brains and improve our relationship with it It draws on the latest research from the fields of psychology neuroscience and biology and more **Time in Our Times** Astrid Marie Holand, 2024-07-22 What is happening to perceptions of time durability and reality in the twenty first century and how do we deal with it This anthology explores a diversity of uncommon insights about time as seen from our historical and geographical standpoint All contributions discuss how time can be seen and how these views relate to changes in nature technology economy working life politics religion or philosophy specific to our own time Findings are discussed within three themed sections In Search of a Deeper Theory of Time Time as Social Expectancy and Time as Lived Experience Contributions in this volume span from classical theory on branching time to personal experiences of drug addicts time Together these diverse contributions shed new light on how construction perception and regulation of time influences a person s whole being in the world collectively and individually in the short and very long run from the beginning of the Anthropocene to future cybertime

The Psychology of Time Richard Gross, 2024-03-07 What is the meaning of time Do we have an internal clock Can time speed up or slow down *The Psychology of Time* considers how we define describe and experience time From a discussion of how our language around time is dependent on metaphor to the role of biology in controlling our bodily experience of time the book delves into how the finitude of life is a given human experience It looks at how we reflect on the passage of time throughout our lives and how our experience of time can be influenced by diverse factors including our age gender health and culture Offering insights into something we are all immersed in but often give little thought to *The Psychology of Time* shows us how our understanding and experience of time can influence our everyday behaviour

New Research on the Philosophy of Nicolai Hartmann Keith Peterson, Roberto Poli, 2016-01-29 The imposing scope and penetrating insights of German philosopher Nicolai Hartmann s work have received renewed interest in recent years The Neo Kantian turned ontological

realist established a philosophical approach unique among his peers and it provides a wealth of resources for considering contemporary philosophical problems The chapters included in this volume examine his ethics ontology aesthetics philosophy of mind and philosophy of nature They explore his ontology of values autonomy and human enhancement and law his theory of levels of reality space time and geometry the categories of temporality causality and life the question of realism and social ontology Others take inspiration from his aesthetic theory ideas about education and his embrace of the Socratic pathos of wonder They bring his philosophy into conversation with that of his contemporaries including Roman Ingarden and Konrad Lorenz s appropriation of Hartmann as well as with the history of philosophy including Plato s theory of recollection pre Socratic philosophy and that of his Russian teacher Nikolai Lossky Those familiar with Hartmann s wide ranging systematic philosophy will benefit from these new engagements with his work and those new to it will find them relevant to a number of current philosophical debates

The Extended Theory of Cognitive Creativity Antonino Pennisi, Alessandra

Falzone, 2019-09-25 This edited volume focuses on the hypothesis that performativity is not a property confined to certain specific human skills or to certain specific acts of language nor an accidental enrichment due to creative intelligence Instead the executive and motor component of cognitive behavior should be considered an intrinsic part of the physiological functioning of the mind and as endowed with self generative power Performativity in this theoretical context can be defined as a constituent component of cognitive processes The material action allowing us to interact with reality is both the means by which the subject knows the surrounding world and one through which he experiments with the possibilities of his body This proposal is rooted in models now widely accepted in the philosophy of mind and language in fact it focuses on a space of awareness that is not in the individual or outside it but is determined by the species specific ways in which the body acts on the world This theoretical hypothesis will be pursued through the latest interdisciplinary methodology typical of cognitive science that coincide with the five sections in which the book is organized Embodied enactivist philosophical approaches Aesthetics approaches Naturalistic and evolutionary approaches Neuroscientific approaches Linguistics approaches This book is intended for linguists philosophers psychologists cognitive scientists scholars of art and aesthetics performing artists researchers in embodied cognition especially enactivists and students of the extended mind

The Temporal Mind Philippe Chuard, 2024-09-10 Memories sensory experiences expectations and intentions as well as thoughts fears and hopes all share a fundamental trait the fact that our conscious psychological states take place in time and often are about time in some way or other Temporality is an inescapable feature of the mind which has preoccupied philosophers and psychologists in diverse traditions such as Locke Hume Reid Kant Helmholtz James Husserl Broad and Bergson The Temporal Mind A Philosophical Introduction is the first book to offer a detailed critical survey of recent work on the perception of time and the temporal features of the mind Philippe Chuard introduces some of the central topics in contemporary discussions of the temporal mind and the perception of time how psychological states occur in time and convey temporal information the stream of
