Turning Points Holger Janusch, Witold Mucha, Julia Schwanholz, Alexander Reichwein, Daniel Lorberg, 2023-12-18 **Turning Points** Challenges for Western Democracies in the 21st Century centers around the strikingly under researched concept of turning points and its application in political science including various theories fields and sub disciplines The chapters provide theoretical discussion and conceptual clarity by distinguishing a set of turning points at different analytical levels Based on a wide range of case studies the authors illustrate where when and how different types of turning points occur or not against the backdrop of current challenges in and for Western democracies The conceptual and empirical variety of the volume allows scholars and practitioners in policymaking to develop and apply their own frameworks when dealing with turning point dynamics

Turning Points Ansgar Nünning, Kai Marcel Sicks, 2012-10-30 At times of crisis and revolution such as ours diagnoses of crucial junctures and ruptures turning points in the continuous flow of history are more prevalent than ever Analysing literary cinematic and other narratives the volume seeks to understand the meanings conveyed by different concepts of turning points the alternative concepts to which they are opposed when used to explain historical change and those contexts in which they are unmasked as false and over simplifying constructions Literature and film in particular stress the importance of turning points as a sensemaking device as part of a character's or a community's cultural memory while at the same time unfolding the constructive and hence relative character of turning points Offering complex reflections on the notion of turning points literary and filmic narratives are thus of particular interest to the present volume

The Turning Point in the Gospel of Mark Gregg S. Morrison, 2014-09-24 Based on linguistic and thematic links in the narrative The Turning Point in the Gospel of Mark argues that the twin pericopae of Peter's confession 8:27-38 and the Transfiguration 9:2-13 together function as the turning point of the Gospel and serve in a Janus like manner enabling the reader to see the author's main focus the identity of Jesus and the significance of that reality for his disciples Peter's confession of Jesus as Messiah faces

backward toward the Prologue 1 1 13 and functions as a mid course conclusion The declaration by God on the mountain faces forward and foreshadows the end course conclusion 14 61 62 15 39 Son of God Jesus in response teaches that the Son of Man must suffer and die before being raised from the dead 8 31 Christologically the images of Messiah Son of Man and Son of God converge and present Jesus the crucified as king ushering in the kingdom of God in power 9 1 acting as the key swivel between the twin pericopae When one is confronted with this Jesus though there remains something elusive about him and the kingdom of God in the narrative the only wise decision after calculating the costs 8 34 38 is to follow **Maths in Action - Advanced Higher Mathematics 2** Edward C. ... **First Division, National Railroad Adjustment Board** United States. National Railroad Adjustment Board, Conceptual Maths Peter Mattock, 2023-04-05 Written by Peter Mattock *Conceptual Maths* Teaching about rather than just how to do mathematics in schools aims to empower teachers to support students on a comprehensive and coherent journey through school mathematics. Showcasing the best models metaphors and representations it provides excellent examples explanations and exercises that can be used across the curriculum. Concepts are at the heart of the study of mathematics. They are the ideas that remain constant whenever they are encountered but which combine and build upon each other to create the mathematical universe. It is the structure of each concept that gives rise to the procedures that are used in calculation and problem solving and by learning about these structures a learner can make sense of how different processes work and use them flexibly as need demands. In his first book *Visible Maths* Peter Mattock focused on the use of representations and manipulatives as images and tools and how this can provide a window into some of these mathematical structures. His aim in *Conceptual Maths* is to go deeper beyond the procedures and to shed greater light on the structures of the subject's different concepts. The book explores how a variety of visual tools and techniques can be used in the classroom to deepen pupils understanding of mathematical structures concepts and operations including number addition and subtraction multiplication and multiples division and factors proportionality functionality measures accuracy probability shape and transformation and vectors among many others. In so doing Peter equips teachers with the confidence and practical know how to help learners assimilate knowledge of mathematical concepts into their schema and take their learning to the next level. Containing numerous full colour diagrams and models to illustrate the conceptual takeaways and teaching techniques discussed *Conceptual Maths* also includes a glossary covering the key mathematical terms. Suitable for teachers of maths in primary secondary and post 16 settings. *Story Fix* Larry Brooks, 2015-10-19 Reinvigorate Your Fiction You've written the first draft of your novel or screenplay and you've released it into the world to your critique group to your most
