Tutankhamun's Footwear André J. Veldmeijer, 2011 The discovery of Tutankhamun's tomb by Howard Carter in 1922 is one of the most significant archaeological discoveries of all time. It took Carter and his team 10 years to clear the contents of the tomb and among the objects found was a large collection of shoes and sandals. The footwear is analysed here in detail for the first time since the discovery using Carter's records and Harry Burton's excellent photographs along with the author's analyses of the objects, all of which are housed in the Egyptian Museum, Cairo and the Luxor Museum. Several specialists contributed to the volume discussing the different materials: gold, vegetable fibre, birch bark, glass and faience, leather, gemstones that were used in the footwear. Tutankhamun's footwear is compared with other finds in order to be able to put it in a broader context. The footwear from the tomb of Yuya and Tjuiu, the King's great grandparents, are therefore analysed as well. In addition to the analysis, footwear in texts and two and three dimensional art is considered. **Tutankhamun's**

Sabbahy, 2019-04-24 Written by specialists in the field of Egyptology, this book is a readable introduction to ancient Egypt covering all anticipated subjects and stressing the monuments and material culture of this remarkable ancient civilization. The rich natural resources of ancient Egypt provided a wealth of raw material for its structures, sculptures and art, while its geographic isolation helped to ensure the survival of its rich culture for centuries. While other references focus on the people and battles central to Egyptian history, this reference explores the material culture and social institutions of ancient Egypt. The book focuses on pharaonic Egypt covering the period from roughly 5000 BCE to the beginning of the Greco-Roman Period in 320 BCE. At the front of the work, a timeline provides a quick look at the major events in Egyptian history and an introduction surveys ancient Egypt's physical geography and history. Alphabetically arranged reference entries written by expert contributors then provide fundamental information about the buildings, jewelry, social practices and other topics related to the material culture and institutions that made up the
