Beyond the Frontier, Volume II Jill Dahlman, Tammy Winner, 2018-11-08 This collection of essays is a compilation of the latest research in first year composition including pedagogy praxis debate and assessment Originally begun as a collection of panel

presentations from the Rocky Mountain Modern Language Association annual conference it has since evolved to include innovative pedagogy regardless of presentation status The book is divided into presentation panels in order to present the reader with innovative pedagogy and thought provoking conversations concerning the first year classroom assessment and pedagogy It will benefit anyone who studies or engages with first year composition including graduate students instructors and administration Postsecondary Sourcebook for Community Colleges, Technical, Trade, and Business Schools Midwest/West Edition ,2010-12 **The Market Imperative** Robert Zemsky,Susan Shaman,2017-12-22 Thinking about American higher education as an economic market changes everything It is no surprise that college tuition and student debt are on the rise Universities no longer charge tuition to simply cover costs They are market enterprises that charge whatever the market will bear Institutional ambition along with increasing competition for students now shape the economics of higher education In **The Market Imperative** Robert Zemsky and Susan Shaman argue that too many institutional leaders and policy makers do not understand how deeply the consumer markets they promoted have changed American higher education Instead of functioning as a single integrated industry higher education is in fact a collection of segmented and more or less separate markets These markets have their own distinctive operating constraints and logics especially regarding price But those most responsible for federal higher education policy have made a muck of the enterprise while state policy making has all but disappeared the victim of weak imaginations insufficient funding and an aversion to targeted investment Chapter by chapter this compelling text draws on new data developed by the authors in a Gates Foundation funded project to describe the landscape how the market for higher education distributes students among competing institutions what the job market is looking for how markets differ across the fifty states and how the higher education market determines the kinds of faculty at different kinds of institutions The volume concludes with a three pronged set of policies for making American higher education mission centered as well as market smart Although there is no one size fits all approach for reforming higher education this clearly written book will productively advance understanding of the challenges colleges and universities face by providing a mapping of the configuration of the market for an undergraduate education
