The Year the World Went Mad Mark Woolhouse, 2022-02-24 An essential book Matt Ridley In January 2020 leading epidemiologist Professor Mark Woolhouse learned of a new virus taking hold in China He immediately foresaw a hard road ahead for the entire world and emailed the Chief Medical Officer of Scotland warning that the UK should urgently begin preparations A few days later he received a polite reply stating only that everything was under control In this astonishing account Mark Woolhouse shares his story as an insider having served on advisory groups to both the Scottish and UK governments He reveals the disregarded advice frustration of dealing with politicians and the missteps that led to the deaths of vulnerable people damage to livelihoods and the disruption of education He explains the follies of lockdown and sets out the alternatives Finally he warns that when the next pandemic comes we must not dither and we must not panic never again should we make a global crisis even worse The Year the World Went Mad puts our recent devastating history in a completely new light

Typhoid Mary Anthony Bourdain, 2001-05-04 Recounts the story of Mary Mallon an immigrant cook considered responsible for the 1904 outbreak of typhoid fever in Oyster Bay Long Island and describes her attempts to escape capture and institutionalization

Toxin Alistair J. Lax, 2005-10-27 What do the following have in common the promise of Botox as the key to everlasting youthful looks E coli O157 hamburger disease a mysterious illness which killed 35 heroin users in 2000 and the assassination by poisoned umbrella tip of a Bulgarian dissident in the 1970s The answer is that all of these are

caused by toxins the powerful biological poisons released by bacteria and some plants In Toxin Alistair Lax reveals the panoply of ways in which bacterial toxins overcome the defences of our cells He explains how they work how they are so successful in causing major diseases the terrible human impact they have had and how apparently new diseases arise from them He also discusses how we can combat toxins and how we can harness their actions for beneficial purposes Enlivened by the very human story of the persistence rivalries and insights from which modern microbiology grew Toxin is the first widely accessible account of this exciting and important topic

Pandemics Peter C. Doherty, 2013-10-31 *Pandemics* The word conjures up images of horrific diseases sweeping the globe and killing everyone in their path But such highly lethal illnesses almost never create pandemics The reality is deadly serious but far more subtle In *Pandemics What Everyone Needs to Know* Peter Doherty who won the Nobel Prize for his work on how the immune system recognizes virus infected cells offers an essential guide to one of the truly life or death issues of our age In concise question and answer format he explains the causes of pandemics how they can be counteracted with vaccines and drugs and how we can better prepare for them in the future Doherty notes that the term pandemic refers not to a disease s severity but to its ability to spread rapidly over a wide geographical area Extremely lethal pathogens are usually quickly identified and confined Nevertheless the rise of high speed transportation networks and the globalization of trade and travel have radically accelerated the spread of diseases A traveler from Africa arrived in New York in 1999 carrying the West Nile virus one mosquito bite later it was loose in the ecosystem Doherty explains how the main threat of a pandemic comes from respiratory viruses such as influenza and SARS which disseminate with incredible speed through air travel The climate disruptions of global warming rising population density and growing antibiotic resistance all complicate efforts to control pandemics But Doherty stresses that pandemics can be fought effectively Often simple health practices especially in hospitals can help enormously And research into the animal reservoirs of pathogens from SARS in bats to HIV in chimpanzees show promise for our prevention efforts Calm clear and authoritative Peter Doherty s *Pandemics* is one of the most critically important additions to the *What Everyone Needs to Know* series *What Everyone Needs to Know* is a registered trademark of Oxford University Press
