such as surgeons Head Neck or Endocrine and General Surgeons Oncologists Endocrinologists Nuclear Medicine Physicians Nuclear Medicine Physicists Radiologists Pathologists Specialist Nurses Geneticists Clinical Psychologists Palliative Care Physicians and in addition to AI in medicine telemedicine experts health policy makers and scientists Oxford Textbook of Endocrinology and Diabetes John Wass, Wiebke Arlt, Robert Semple, 2022-03-10 Now in its third edition the Oxford Textbook of Endocrinology and Diabetes is an up to date objective and comprehensive text that covers the full scope of endocrinology and diabetes It contains wide ranging and pragmatic advice on diagnosis and clear guidelines for recommended management while also covering the scientific principles that underlie the medical practice in this important field The book has been reorganised into 15 overarching sections with new sections on Endocrinology of Pregnancy and Management of the Transgender Patient included All other sections have been extensively updated and restructured Each chapter is written by an internationally acknowledged expert relates basic science to evidence based guidelines and clinical management and where appropriate offers an outline of the controversies in the subject The textbook has an international focus and deals with subject matter applicable across the globe The new edition has over 800 images complementing the extensive text and information provided The book is a one stop text for trainees and consultants in Endocrinology and Diabetes residents those preparing for sub specialty exams and other professionals allied to the area who need to gain an understanding of the field It acts as both a point of reference for the experienced consultant as well as a trusted training resource Purchase of the print work also includes full access to the online edition of the textbook for the life of the edition Developments in Diagnosis and Management of Thyroid Cancer Carlotta Giani, Carla Colombo, Joana Simões-Pereira, 2025-03-25 Recent advances in knowledge about thyroid cancer show the need for a personalized approach both for indolent thyroid carcinomas which can be treated and followed with a more conservative approach and for advanced thyroid cancer which may need a more intensive follow up and aggressive therapy Several new trends in thyroid cancer approaches rose in the last few years In particular thyroid cancer management has been shifting towards a more conservative approach The focus has been directed to active surveillance in patients with thyroid microcarcinomas to local conservative non surgical therapies such as radiofrequency or alcohol ablation for microcarcinomas and local lymph node metastases and to minimally invasive surgical techniques Few data have been reported about these new techniques but they may become the standard of care particularly for those patients with microcarcinomas with anxiety about active surveillance or for those who present local tumor growth under active surveillance Furthermore in the last decades molecular techniques have opened up new diagnostic scenarios in the pre intervention identification and risk classification of patients with a known diagnosis of thyroid carcinoma that improved patient management and follow up Regarding advanced thyroid tumors new drugs have been developed to control the disease such as multi tyrosine kinase inhibitors and targeted therapies However in some cases tumors become resistant to these drugs Currently there are no reliable markers clinical or molecular that have been found to be predictive of an early

escape from therapy control Other drugs for this kind of tumor should be developed to be used as second third or successive treatment and studies combining two or more drugs are needed to explore the possibility of overcoming the resistance to a single therapy

Atlas of Thyroid and Neuroendocrine Tumor Markers Luca Giovanella,2018-01-22 This book highlights the increase in thyroid tumors and NET and demonstrates the growing importance of circulating markers in diagnosis as well as treatment and follow up Dramatic technical improvements have heightened the clinical impact of well established conventional biochemical markers In addition more recent genetic and molecular approaches have provided innovative molecular markers In this context effective communication between clinicians and laboratory physicians scientists is essential in allowing all those involved to fully profit from these exciting advances In this comprehensive up to date book authors from different laboratory and clinical areas link laboratory and clinical topics Analytical problems such as interferences false negative and false positive results are discussed in depth and flow charts offer insights into identifying and avoiding them Illustrated clinical cases detail the clinical role and limitations of different tumor markers Lastly it explores health technology assessment and economic issues This is a valuable resource for endocrinologists oncologists nuclear medicine physicians scientists and technologists who want to keep abreast of the latest developments

Integrated Diagnostics and Biomarker Discovery in Endocrinology and Biomedical Sciences Sijung Yun,Princy Francis,Stephen Wank,2024-12-02 Recent advancements and cost reduction in various omics technologies have provided us with a wealth of data at the molecular cellular and organ levels Other types of comprehensive data sets are also increasingly available at the individual community and population levels The integration of these different types of data are enabling multidisciplinary convergences in diagnostics and biomarker discovery in various biomedical fields to realize a more holistic systems biology view of diseases Such integrated approaches have also proven useful in the field of endocrinology particularly in better understanding complex heterogeneous diseases such as type 2 diabetes mellitus For instance researchers have combined genotyping data and RNA sequencing data with glycomics and lipidomics to identify potential biomarkers in type 2 diabetes
