

UBD Lesson Plan Grade 7 Mathematics

Subject: Mathematics

Quarter: Fourth Quarter

Topic: Define and Explain the Importance of Statistics

Teacher: Elrica F. Rendon

Stage 1- Desired Results	
CONTENT STANDARD	PERFORMANCE STANDARD
The learner demonstrates understanding of the key concepts, uses and importance of Statistics, data collection/gathering and different forms of data representation, measures of central tendency, measures of variability, and probability	The learner is able to collect and organize data systematically and compute accurately measures of central tendency and variability and apply these appropriately in data analysis and interpretation in different fields.
ESSENTIAL UNDERSTANDING	ESSENTIAL QUESTIONS
Student will understand that systematically collected and organized data on tabular and graphical representation be accurately computed and analyzed by applying measures of central tendency and variability	How can systematically collected and organized data on tabular and graphical representation be accurately computed and analyzed to develop appropriate interpretation and sound conclusions.
Transfer Goal: Students on their own and the long run will systematically collect, organize, and compute through the measures of central tendency and variability through tabular and graphical representations to realize the importance of Statistics in daily life and to formulate appropriate interpretation and sound conclusions.	
KNOWLEDGE	SKILLS
THE STUDENTS WILL BE ABLE TO KNOW: - the definition and explanation of the importance of Statistics. - gathering statistical data. - organizing data in a frequency table	THE STUDENTS WILL BE ABLE TO: - define and explain the importance of Statistics. - gather statistical data. - organize data in a frequency table.

School Mathematics Curricula Catherine P. Vistro-Yu, Tin Lam Toh, 2019-04-26 This book sheds light on school mathematics curricula in Asian countries including their design and the recent reforms that have been initiated. By discussing and analyzing various problematic aspects of curriculum development and implementation in a number of East and South Asian countries and offering insights into these countries' unique approaches to supplementing school mathematics curricula, it contributes to shaping effective policies for implementation, assessment and monitoring of curricula. The book covers a wide range of issues: curriculum design, localization of curricula, directions of curricular reforms, mathematics textbooks, assessment within the curriculum and teachers' professional development, which are of interest to a wide international audience.

Engineering and Sciences Teaching and Learning Activities Samsul Ariffin Abdul Karim, Saiful Azmi Husain, 2021-08-25 This book comes from genuine research from various universities in Asia such as in South East Asia and India. Since COVID 19 pandemic is spreading all over the world, most schools and institutions of higher learning have opted online based learning for their teaching and learning T L activities. Previously the common practices in T L are face to face F2F. Therefore online T L is a new normal not just for the students but also for the instructors as well as the parents. In this book, different online teaching methods via technology supported teaching have been implemented, and at the end of the lesson, based on the feedback from students on these online technology supported teaching tools, most educators found that there are positive responses from majority of students in terms of their learning attitudes, thinking and decision making process, apart from the challenges faced by the students in the beginning with regards to the new approaches and methodology used by their teachers during online teaching. There are eight contributed chapters in this book covering secondary school level curriculum up to higher institutional level curriculum that forming a new system of T L for post COVID 19 pandemic. The topics under consideration include active learning AL and cooperative learning CL for T L task based instruction, TBI transition, students adaptability to post COVID 19 creative and innovative teaching methods for secondary school level mathematics, project based learning PPBL for geophysics and impact of Socratic method and SOLO taxonomy. This book is suitable for postgraduate students, teachers, instructor, educational researchers as well as policy makers in education and other scientists who are dedicated in teaching and educate students.

Understanding by Design Grant P. Wiggins, Jay McTighe, 2005 What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high stakes standards based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of Understanding by Design. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly

revised and expanded their original work to guide educators across the K 16 spectrum in the design of curriculum assessment and instruction With an improved UbD Template at its core the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks Readers will learn why the familiar coverage and activity based approaches to curriculum design fall short and how a focus on the six facets of understanding can enrich student learning With an expanded array of practical strategies tools and examples from all subject areas the book demonstrates how the research based principles of Understanding by Design apply to district frameworks as well as to individual units of curriculum Combining provocative ideas thoughtful analysis and tested approaches this new edition of Understanding by Design offers teacher designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike

Schoolwide Action Research for Professional Learning Communities Karl H. Clauset, Dale W. Lick, Carlene U. Faith-Based Education That Constructs HeeKap Lee, 2010-08-09 Constructivism is everywhere It is a hot issue at this time in the field of philosophy education technology and religion

However can constructivism be an alternative approach in faith based education While some conclude that Jesus knew learning was an active knowledge creating process and that he always encouraged his disciples to think deeply and go beyond the surface level others would find that constructivism undercuts faith based education because of its claims to relativity For example constructivists claim that meaning is imposed on the world by us rather than existing in the world independently from us Thus they proclaim that truth is relative to particular times places and people Christians hold that truth does exist absolutely So how can there be a way forward for faith based educators who see the good in the constructivist approach In Faith Based Education that Constructs readers will find a unique approach whereby constructivism may appropriately be applied to a faith based education setting Although disagreement can occur between constructivism and faith based education this book concludes that constructivist thought and Christian faith based education are in the end congruent and harmonious in significant ways Those faith based educators who continue to hold cautionary views of radical constructivist assertions against absolute truths need not disregard all other aspects of constructivism
