Organizational Behavior Sorin Dumitrascu, 2017-07-08 What ultimately determines the performance of an organization is the behavior of the people that make up that organization It depends on what individual employees do and on how they relate to and interact with one another So to help ensure an organization's business success you can focus on promoting the types of individual behavior that will result in the achievement of the organization's goals Before you can do this though you need to understand the factors that influence individual behavior perceptions and attitudes To manage performance effectively you need to start by recognizing that each employee is a person with a unique background and set of characteristics For example employees' particular personality traits affect the ways they perform and interact with others in the workplace If you're familiar with these personality traits it makes it easier to match employees to the right jobs and tasks In turn this can help employees perform to the best of their abilities and contribute to the overall success of your organization The ways employees perceive their work and organization typically affect their behavior Positive perceptions generally lead to greater motivation And when people are motivated it's easier to engage them actively at work So it's important for managers to pay close attention to their individual employees' perceptions and know what factors trigger certain perceptions Like perceptions employees' attitudes to their work can have a dramatic effect on their job satisfaction and performance Understanding the factors that affect individuals' attitudes is the first step in changing these attitudes In this course you'll learn how understanding organizational behavior can benefit you and your organization You'll also learn more about the personality traits that affect individual behavior and about what affects individual perceptions and attitudes Understanding what drives individual behavior and how this affects performance in the workplace will equip you to manage employee performance better in your organization Organizations don't depend just on the work their employees do in isolation They also depend on employees working together interacting and combining their efforts in ways that support high level business strategies and goals Effective collaboration and good group work are critical to an organization's success So it's important to know what makes a group successful and to do what you can to remove any obstacles that prevent it from performing optimally In this course you'll learn more about what a group is in the context of an organization and about the internal and external factors that may affect group performance You'll learn why it's beneficial to understand group dynamics and the factors that affect group performance And you'll learn about the characteristics of effective groups For a group to be successful it has to have the commitment of all its members and support from others including management And all group members need enough time to focus on their roles as part of the group rather than other tasks taking up their time So as well as learning about groups generally you'll learn how to overcome resistance to the group and to collaboration and how to resolve situations where group members have conflicting priorities Another important issue to address as part of managing group performance is conflict In any group situation some conflict is inevitable But failing to manage negative types of conflict can prevent people from working together effectively or at all So in this course you'll learn about typical causes of group conflict You'll also learn

how to address group conflict using a clear sequence of steps Once you ve completed this course you ll be better equipped to promote healthy group interactions and to optimize the performance of groups In this way you ll contribute to the success of your organization as a whole **Organizational Behavior** C.
