Understanding East Asia's Economic Miracles:

Understanding East Asia's Economic "miracles" Zhiqun Zhu, 2009 There has been no miracle says Zhu at least in the sense of divine intervention He attributes the rapid economic growth in East Asia to decades of hard work by people in the region though admittedly aided somewhat by favorable international and domestic conditions sound government policies and a few far sighted leaders He begins by profiling countries in the order they emerged into the world spotlight Japan South Korea China and Taiwan Then he compares their economies concludes with a comprehensive explanation for the overall phenomenon and its internal variations **Understanding East Asia's Economic "miracles"** Zhiqun Zhu, 2012

Rethinking Asia's Economic Miracle Richard Stubbs, 2017-09-08 In the new edition of this important contribution to understanding both the Asian economic miracle and the 1997-8 crisis Richard Stubbs assesses the main explanations to date and updates the analysis to take account of globalization and the remarkable economic rise of China **The Oxford**

Handbook of Higher Education in the Asia-Pacific Region Devesh Kapur, Lily Kong, Florence Lo, David M.

Malone, 2023-01-11 Since the turn of the millennium it has become clear that the Asia Pacific Region is economically the fastest growing continent in the world and is likely to remain so for some time despite the setbacks of the COVID 19 pandemic Asia Pacific's share of the world's Gross Domestic Product GDP doubled from 15 per cent to 30 per cent between 1970 and 2017 and is projected to account for half of global GDP by 2050 With South East and South Asia also growing rapidly with over half the world's population and three of the world's five largest economies Asia is soon poised to home half of the world's middle class a class that is both the driver and the product of higher education The quality of a country's system of higher education may be seen both as a gauge of its current level of national development as well as of its future economic prospects It is therefore natural that the putative Asian Century should generate interest in the region's higher education systems which on the one hand share common characteristics a fixation with credentials and engineering high technology especially among male students and business degrees while at the same time are also highly differentiated not only across countries but also within As such a better understanding of higher education achievements failings potential and structural limitations in the Asia Pacific Region is imperative This handbook presents a number of significant country case studies and documents cross cutting trends relating to among other things the trilemma faced by governments juggling competing claims of access accessible cost and quality the balance between teaching and research the links between labour markets demand and higher education supply preferred fields of study and their consequences the rise of the research university in Asia the lure of institutions of international reputation within the region new education technologies and their effects and trends in government policy within the wider region and sub regions New Dynamics in East Asian Politics Zhiqun Zhu, 2012-02-02 Using a comparative and thematic approach this textbook looks at key aspects of the new dynamics in East Asian politics security political economy and society *Pacific Automobilmism* Gijs Mom, 2022-09-13 The beginning of

the 21st century has seen important shifts in mobility cultures around the world as the West's media driven car culture has contrasted with existing local mobilities from rickshaws in India and minibuses in Africa to cycling in China In this expansive volume historian Gijs Mom explores how contemporary mobility has been impacted by social political and economic forces on a global scale as in light of local mobility cultures the car as an adventure machine seems to lose cultural influence in favor of the car's status character

Foreign policy in Comparative Perspective: Domestic and International Influences on State Behavior Ryan K. Beasley, 2013 In this much anticipated revision of their unique text the editors bring together fifteen top scholars to highlight the importance of both internal and external forces in foreign policymaking

Critical Decade, A: China's Foreign Policy (2008-2018) Zhiquan Zhu, 2019-07-09 China emerged as a major economic diplomatic and military power during the critical decade from 2008 to 2018 As a result China's foreign policy has become more active and dynamic This book provides a unique perspective to understand Chinese foreign policy during this decade by examining continuities and changes in both internal and external factors that have shaped China's development The book focuses on key challenges in China's diplomacy such as US China relations the Korean Peninsula Taiwan Japan India Chinese investment overseas the Belt and Road Initiative global and regional cooperation soft power etc It also includes an extensive annotated bibliography of major recent publications on various aspects of Chinese foreign policy This is the first scholarly book that studies the evolution and key challenges of China's foreign relations during the critical decade 2008-2018 when China grew into a crucial sometimes assertive power in international affairs

Foreign Policy in Comparative Perspective Ryan K. Beasley, Juliet Kaarbo, Jeffrey S. Lantis, Michael T. Snarr, 2012-04-25 Widely regarded as the most comprehensive comparative foreign policy text Foreign Policy in Comparative Perspective has been completely updated in this much anticipated second edition Exploring the foreign policies of thirteen nations both major and emerging players and representing all regions of the world chapter authors link the study of international relations to domestic politics while treating each nation according to individual histories and contemporary dilemmas The book's accessible theoretical framework is designed to enable comparative analysis helping students discern patterns to understand why a state acts as it does in foreign affairs

Globalizing Automobility Gijs Mom, 2020-08-07 Why has car society proven so durable even in the face of mounting environmental and economic crises In this follow up to his magisterial Atlantic Automobility Gijs Mom traces the global spread of the automobile in the postwar era and investigates why adopting more sustainable forms of mobility has proven so difficult Drawing on archival research as well as wide ranging forays into popular culture Mom reveals here the roots of the exuberance excess and danger that define modern automotive culture

China's Grand Strategy David B. H. Denoon, 2021-06-15 Leading

scholars examine China's global strategic plans from Hong Kong to military power to economic dominance. Over the past few decades, China has increasingly challenged the global influence of the United States. In *China's Grand Strategy*, David B. H. Denoon brings together a group of eminent scholars to explain China's rapid ascendance on the world stage as well as its future implications for global politics. Contributors address the military, economic, diplomatic, and internal political factors shaping China's strategy, in addition to highlighting Beijing's objectives in different parts of the world such as Central Asia, Africa, and the Middle East. Ultimately, they explore the promise and perils of China's rapidly changing political ambitions, showing how the country has made its mark on the twenty-first century. *China's Grand Strategy* provides insight into China's quest to become a global leader, particularly at a time when the future of both China and the US remain uncertain in the context of current crises like the coronavirus pandemic, the ongoing protests in Hong Kong, and escalating tension between top leaders and officials. This book cannot predict the future for China or the US, but the insights offered can help make sense of where we have been and where we are going.

Regionalism in East Asia Richard Pomfret, 2011. The use of the wind as an energy source is increasing and growing worldwide. Wind energy is an important, non-fossil option to supplement fossil coal, natural gas, and oil, and nuclear fuels for the generation of electricity. Many parts of the world, particularly the coastlines of Western Europe, North Africa, North and South America, India, Eastern Russia, China, the Philippines, Australia, and New Zealand, experience a high annual incidence of wind energy. The United Kingdom of Great Britain and Northern Ireland, together with the Republic of Ireland, form a particularly windy location, being favoured with strong westerly winds. The technology of the design and installation of wind turbines and wind farms is, in fact, well established. Operational practice, though, is still being developed as engineers learn by experience. This book is written for electrical engineers concerned with the use of wind power for generating electricity. It incorporates some meteorological features of international wind supply, plus a survey of the past and present wind turbines, with technical assessment of the choice of turbine sites. Detailed coverage is given to the different types of electrical generator machines used and the electronic control devices employed in modern turbine systems. Importantly, this book devotes full chapters to the integration of wind farms into established electrical grid supply systems and the environmental and economic aspects of wind generation. Engineers will be drawn to the practical approach in this book, featuring worked numerical examples, complete with answers, at the end of some chapters.

The People's Republic of China Today Zhiqun Zhu, 2011. Despite the significant progress it had achieved in the past 60 years, especially in the past 30 years since Deng Xiaoping's reform initiatives in the late 1970s, China faces daunting challenges today. These challenges include, among others, a rigid political system that does not match economic vibrancy, uneven economic growth, and widening income gap, a graying population, environmental degradation, potential social instability, ethnic tensions, and separatist movement, poor international image, and military modernization. Based on papers originally presented at an international conference held at Bucknell University in Pennsylvania to mark the 60th anniversary of the People's

Republic of China PRC this book provides an up to date comprehensive and authoritative assessment of the PRC's political economic social ethnic energy security military diplomatic and other developments and challenges today. Contributed by scholars and experts in political science international relations economics public administration history mass communication psychology and diplomacy the book focuses on the efforts needed by China to grow in a sustainable manner and to become a respected global power. With each chapter addressing a different and yet an inter related issue of the PRC's development this book aims to make a significant contribution to the understanding of key challenges the country faces today as it strives to become a global power. What Is Your Ten Minutes Worth? Sovathana Sokhom, 2011-03-01

I hope you will enjoy reading articles in this book as much as I did. I hope the book will inspire and have positive impact on your realizing your potential and capability and inspire you to do something that you haven't tried before. Each of you came across this book as I did. I came across Dr Peang Meth's first article by chance but it is by choice that I put his articles together into a book and I hope that you by choice too will own this book. All proceeds from the book will contribute to further promote other Khmer scholars' writings in the social science field so that their scholarships their visions can be shared and used to contribute to nation building of the Khmer motherland. Furthermore it is my hope to augment the understanding of Khmer intergenerations the elder Khmer scholars who survived Pol Pot's killing fields and the young Khmer scholars who are faced with national and international challenge in the twenty first century both groups that need to explore and exchange what are the Khmer that they have in common in interests and values to build peace and security promote democracy and economic growth for all Khmers in Cambodia as well as for the people in less developed and developing countries so they can enjoy life liberty and pursuit of happiness and realize their potential and capacity to compete within their countries between nation states in the regions and in the world. Explaining Growth G. McMahon, L. Squire, 2003-08-19 Explaining Growth attempts to compile the most comprehensive assessment of growth in developing and transition countries. The first phase has sought to review and discover broad similarities and comparable experiences in six regions spanning the developing world. In each region studies were undertaken on sources of growth markets and growth microeconomic determinants of growth and the political economy of growth. These reviews provide the framework for the in depth country case studies in Phase II. This volume summarizes the main results of the regional analyses and sets the stage for the country studies. *The Wind of the Hundred Days* Jagdish N. Bhagwati, 2002-02-22

Provocative essays on international trade with particular focus on U S foreign trade policy. In *The Wind of the Hundred Days* a new collection of public policy essays Jagdish Bhagwati applies his characteristic wit and accessible style to the subject of globalization. Notably he argues that the true Clinton scandal lay in the administration's mismanagement of globalization resulting in the paradox of immense domestic policy success combined with dramatic failure on the external front. Bhagwati assigns the bulk of the blame for the East Asian financial and economic crisis a disaster that prompts him to use as his title the poet Octavio Paz's image of devastation. I met the wind of the hundred

days to the administration's hasty push for financial liberalization in the region. The administration Bhagwati claims has also mishandled the freeing of trade. The administration hosted WTO meeting in Seattle ended in chaos and the launch of a new round of multilateral trade negotiations was dashed. Bhagwati shows how the administration's failure to get Congress to renew fast track authority can be attributed to an unimaginative response to the demands of a growing civil society. In several essays he shows how free trade and social agendas both could have been pursued successfully if the concerns of human rights, environmental, cultural, and labor activists had been met through creative programs at appropriate international agencies such as the International Labour Organization instead of the WTO and via trade treaties. Bhagwati also criticizes the claim that globalization needs a human face, arguing that it already has one. He faults the administration for embracing unsubstantiated anti-globalization rhetoric that has made its own preferred option of pursuing globalization that much more difficult.

A Contemporary Reading of Confucius in the Light of the Yi Jing and Complexity Theory Wei-Bin Zhang, 2025-01-11. Confucius was idolized, neglected, or disdained over centuries in China, Korea, Vietnam, and Japan, as well as in the West, but was revered by some great European thinkers in the Age of Enlightenment. There are only a few studies about how Confucius' basic ideas can be integrated with Western rational thought. This new book situates Confucian ideas in complexity theory to demonstrate how East Asian rationality based on the Yi Jing and Western rationality based on Newtonian principles can be integrated. This re-examination of Chinese civilization, especially the thoughts of Confucius in the light of complexity theory, is a unique contribution. Understanding Confucius and his implications for modern thought provides key insights into contemporary East Asian societies.

Transforming Korean Politics Young Whan Kihl, 2015-03-26. Over the past fifteen years, South Korea has transformed itself from an authoritarian government into a new democracy with a vibrant capitalist economy. Modernization, democratization, and globalization have played important roles in this transformation and have greatly influenced the programs and policies of Korea's Sixth Republic. Covering developments through the 2003 elections, this book shows how the South Korean government and society have been shaped not only by the dynamics of these forces but also by their interaction with the cultural norms of a post-Confucian society. The author provides a conceptual framework and baseline for examining political developments in Korea and offers an analysis of the factors that are transforming Korean institutions, society, and politics. He discusses the forces shaping Korea's political economy and the performance of successive ROK governments and also highlights the challenges faced by the newly elected administration of Roh Moo Hwan, the North Korean issue, and more.

Contemporary Economic Issues J. Lin, 1998-11-12. A guide to the experiences of economic reform since the second world war and system reform and economic integration across the world in the past decade. The first part of the book examines why only a small number of developing countries have succeeded in their modernization attempts this century. What lessons can be learnt from the successes of the East Asian NIEs and failures of other economies to emulate them? The very different experiences of the transition to market economies in the former socialist

countries of Eastern Europe and China is the focus of the next section with comparisons drawn with the Latin American reform experience especially in Chile The effects of economic integration schemes are examined in the final sector with case studies of Tunisia and Morocco s Free Trade Agreements with the EU and of economic integration and the Arab Israeli peace process
