consciousness or how the mind works How are thoughts formed Am I the mind Is the brain responsible for consciousness Are thoughts consciousness Are there sub conscious thoughts Is the observable universe the truth Is there a truth beyond reality What is difference between a living being and a non living being What is the soul If it is not about consciousness the next curiosity has been about space time and matter Is space finite or infinite If space is expanding where is it expanding into What is time Are there extra dimensions to space Is time the 4th dimension How many dimensions are present How does space and time relate to consciousness If consciousness was not present would there be space and time Is this whole universe just a thought Is there a consolidated thought that ties all living beings together Surya Siddanta the ancient sanskrit literature when translated in the context of emergence of reality answers just these questions The concepts presented are surprisingly different and highly thought provoking making us question our own science which we hold as undisputable The Surya Siddanta describes the various steps involved the formation of reality as it traverses from that incomprehensible unmanifested qualityless truth to the formation of an Individual This book explores the ideas the principles and concepts presented in Surya Siddanta and explains the steps presented with equivalent examples as seen in technologies created by us
