**Understanding Reality Television** Su Holmes, Deborah Jermyn, 2004 Tracing the history of reality TV from Candid Camera to The Osbournes Understanding Reality Television examines a range of programmes which claim to depict real life

**Understanding Reality Television** Su Holmes, Deborah Jermyn, 2004      Reality TV Misha Kavka, 2012-02-15 Is reality TV a coherent genre This book addresses this question by examining the characteristics contexts and breadth of reality TV through a history of its programming trends Paying attention to stylistic connections as well as key concepts this study breaks reality television down into three main generations the camcorder generation the competition generation and the celebrity generation Beginning with a consideration of the applicability of the term genre for this televisual hybrid the book takes a transnational approach to investigating the forms and formats of reality TV framed by relevant popular and critical discourses      *Reality TV* Annette Hill, 2004-08-02 Reality TV restores a crucial and often absent element to the critical debate about reality television the voices of people who watch reality programmes From Animal Hospital to Big Brother Annette Hill argues that much can be learned from listening to audience discussion about this popular and rapidly changing television genre Viewers responses to reality TV can provide invaluable information to enhance our understanding of both the reality genre and contemporary television audiences Drawing on quantitative and qualitative audience research to understand how viewers categorise the reality genre and how they judge the performance of ordinary people and the representation of authenticity within different types of reality programmes Do audiences think reality TV is real Can people learn from watching reality TV How critical are viewers of reality TV Reality TV argues that audiences are engaged in a critical examination of the development of popular factual television The book examines how audiences can learn from watching reality programmes and how viewers think and talk about the ethics of reality TV      Reality Television, Affect and Intimacy Misha Kavka, 2008-10-31 Reality Television Affect and Intimacy shifts current discussions of media and reality from the informative to the affective from knowledge to feelings In reality television Misha Kavka argues everyday reality is the ground for an experience of immediacy or televisual intimacy that is self evidently mediated and performed The book explores this paradox by conceptualising the relation between affect and media For Kavka affect matters because the feelings generated across the screen are real in a material way Investigating such concepts as publicity and privacy in reality TV families performance technologies in Big Brother arranged marriages in romance reality TV and gender race and sexuality in Survivor and Project Runway she argues that affect is the core reality of a public sphere that is reconfigured by its viewing patterns Renewing attention to the complexities of affective intimacies this book offers the rich realities of feeling as a critical alternative to traditional communication models      *Towards a Better Understanding of the Reality Television Genre* Michelle L. Morse, 2004      **Understanding Television Texts** Phil Wickham, 2007-07-15 Understanding TV Texts examines the debates that define television and looks at how they can be applied to the study of particular programmes      Would the

The Politics of Reality Television Marwan M. Kraidy, Katherine Sender, 2010-10-22 The Politics of Reality Television encompasses an international selection of expert contributions who consider the specific ways media migrations test our understanding of and means of investigating reality television across the globe The book addresses a wide range of topics including the global circulation and local adaptation of reality television formats and franchises the production of fame and celebrity around hitherto ordinary people the transformation of self under the public eye the tensions between fierce loyalties to local representatives and imagined communities bonding across regional and ethnic divides the struggle over the meanings and values of reality television across a range of national regional gender class and religious contexts This book will be of interest to undergraduate and postgraduate students on a range of Media and Television Studies courses particularly those on the globalisation of television and media and reality television

*Television, Aesthetics and Reality* Anthony David Barker, 2006 This new collection of essays seeks to focus on three areas where television has recently been in an intriguing state of flux Taking as our background the emergence of multimedia conglomerates and cash rich cable channels we look at the way old national terrestrial channels and the brash new internationally commercialized ones have innovated in the domain of television programming In all there are fourteen original essays an introduction to the book TM s theme by the editor and a foreword by Professor Annette Hill Section one oeRealizing the Real looks at contemporary patterns of television consumption and the presentational styles which package the real in news current affairs and other live TM television formats Essays on rhetorical strategies in the news coverage of the war in Iraq on national and international inflections of Sky News in Europe and coverage of the recent EURO2004 football tournament as well the multi channel reporting of a prominent paedophilia scandal are presented in this section They all analyse the extent to which the grounded and the local are threatened and distorted by hegemonic forces in media today The findings of a comprehensive new study of Portuguese social practices and viewing habits are also featured in this section Section Two oeRealizing Performance addresses the way new trends in reality programming and other documentary practices have impacted on fiction and entertainment television There are essays on the recent wave of British television comedy heavily influenced by TV newsmagazine and fly on the wall documentary styles and two pieces on new American series 24 and CSI which have revolutionized the narrative parameters and evidential base for thrillers and cop shows respectively coming up with new ways to perform TM space time and science Finally there is an essay on Nigel Kneale TM s The Year of the Sex Olympics 1968 a survivor from the era of the single play who seems to anticipate the future of television in reality based gameshow style entertainment Each of these essays shows that the success of these programmes is dependent on a fresh restylization of the conventions and formulas which govern mainstream television programming They therefore see the representation of the real in fiction as primarily an aesthetic

reappraisal Section Three of *Performing the Real* looks at the explosion in reality television programming itself. It focuses on the coming to pass of 70s and 80s theorists' visions of both a passive voyeuristic society and one increasingly at peace with the notion of surveillance. We have been progressively acculturated to watching and being watched. Orwellian anxiety has given way to Baudrillardian acceptance of the message and the medium fused in a new order of mediated reality or hyperreality. Essays refer specifically to the globalization of shows and formats and their local inflections and to coverage of reality shows in print media and on the net. There are essays on *The Bachelor* and gender stereotyping, *Joe Millionaire* and the conventions of melodrama and two on *Big Brother*, one on the problems of communication within a sealed environment and another on its reception in Portugal. Concerns about the self and its authenticity are consistently raised in all the essays of this section.

*Television Industries* Douglas Gomery, Luke Hockley, 2006-05-31

While not a production study, this book attempts to provide an insight into the inner workings of the television industry. As such, its central concern is with processes, not texts or techniques or histories. *Television Industries* focuses on the essential elements of the industry: the policy and regulatory frameworks, the swiftly changing world of video production technology, all of which provides the backdrops against which broadcasters shape and sell their products. The book also examines the working practices of scheduling, budgeting, selling, advertising, air time, and so forth. Where issues may be familiar to readers, for example, debates around public service broadcasting, the entries aim to be explanatory and fresh. Of course, it's not possible to cover every aspect of what is a complex and ever-changing industry. Nonetheless, the aim is to provide a starting point for students and new scholars as they start to research into the nature of the broadcasting industry. Hence, this volume is extensively cross-referenced to guide the reader as they tease out for themselves some of the complexity of this industry. There are several other elements that are distinctive about this volume. Perhaps the most striking of these is its blend of contributions from the UK and US. This book will raise as many questions as it provides answers. It aims to make a contribution to the on-going debates in the now well-established world of television studies with fresh perspectives on some familiar and some not so familiar landscapes. Fully illustrated, *Television Industries* is intended as an authoritative and accessible guide to the inner workings of the television industry.

Um unser Erkenntnisinteresse zu untermauern, werden wir die Entwicklung der Rezeption von *Big Brother* untersuchen sowie damit verbundene Rezeptionsgründe. Wer sieht sich heute *Big Brother* immer noch an und welche Motivation steckt dahinter? Wer hat aufgegeben, die Show zu
