Architect's Legal Handbook Anthony Speaight KC, Matthew Thorne, 2025-04-16 Celebrating 50 years since it was first

published the Architect's Legal Handbook has been the most widely used reference on the law for practicing architects and the established textbook on law for architectural students. Since the last edition of this book in 2021, unprecedented change has occurred in the construction sector. The withdrawal of the United Kingdom from the European Union has ushered in changes to legislation in a wide range of areas. The tragic fire at Grenfell Tower in June 2017 and the deficiencies in design, construction, and regulation within the sector that were revealed as a result have given rise to major changes in the way projects are now carried out. An overhaul of the Building Regulations and the creation of a new Building Safety Regulator are only some of the ways in which the landscape has changed. This eleventh edition features all the latest developments in the law which affect an architect's work as well as providing comprehensive coverage of relevant UK law topics. Key highlights of this edition include: A new chapter has been added to cover the statutory framework for building safety, Chapter 9, which is complemented by a wholly updated chapter on construction regulation in England and Wales, Chapter 10. The chapter on public procurement law, Chapter 14, has also been entirely rewritten to focus on the Public Procurement Act 2023 and related regulations following Brexit. New suites of standard contract forms have since the last edition been issued. These have seen substantial changes with chapters on JCT 2024, Chapter 18, and the latest NEC4 forms, Chapter 19, together with wider updates to the chapters on FIDIC, Chapter 20, and other forms of contract, Chapter 21. A revised chapter on architects' contracts with clients covering the RIBA Professional Services Contract 2024, Chapter 37. A new section on novations in the chapter on the English Law of Contract, Chapter 2. The Architect's Legal Handbook is the essential legal reference work for all architects and students of architecture.

Construction Cost Management Keith Potts, Nii Ankrah, 2014-01-23. In this updated and expanded second edition, Keith Potts and Nii Ankrah examine key issues in construction cost management across the building and civil engineering sectors both in the UK and overseas. Best practice from pre-contract to post-contract phases of the project life cycle are illustrated using major projects such as Heathrow Terminal 5, Crossrail, and the London 2012 Olympics as case studies. More worked examples, legal cases, case studies, and current research have been introduced to cover every aspect of the cost manager's role. Whole life costing, value management, and risk management are also addressed, and self-test questions at the end of each chapter support independent learning. This comprehensive book is essential reading for students on surveying and construction management programmes as well as built environment practitioners with cost or project management responsibilities.
