European cities those in the United States are characterized by lower densities and greater distances neat geometric layouts an abundance of green space a greater level of social segregation reflected in space and perhaps most noticeably a greater share of individual single family detached housing In Zoned in the USA Sonia A Hirt argues that zoning laws are among the important but understudied reasons for the cross continental differences Hirt shows that rather than being imported from Europe U S municipal zoning law was in fact an institution that quickly developed its own distinctly American profile A distinct spatial culture of individualism founded on an ideal of separate single family residences apart from the dirt and turmoil of industrial and agricultural production has driven much of municipal regulation defined land use and ultimately shaped American life Hirt explores municipal zoning from a comparative and international perspective drawing on archival resources and contemporary land use laws from England Germany France Australia Russia Canada and Japan to challenge assumptions about American cities and the laws that guide them

Transforming Spatial Data into Public Policies for Social Justice and Environmental Sustainability Alexandra Aragão, 2023-05-24 Environmental justice and social justice are well established concepts in social research This book goes beyond the established discourse to show how Geographic Information Systems can unveil higher levels of spatial unfairness when both forms of injustice coincide in the same place Territorial injustice is the result of the disproportionately higher exposure of vulnerable communities to pollution and environmental risks Overlapping layers of georeferenced environmental and social information generate maps depicting territorial injustice which can be a powerful tool to facilitate social dialogue and prompt policy change This volume brings approaches from ten Latin American countries to demonstrate how the interdisciplinarity between law and Geographic Information Systems can contribute to the development of fairer public policies and prevent and mitigate cases of extreme injustice The case studies presented are relevant to support the development of geolaw and to inspire pragmatic strategies aimed both at social justice and environmental sustainability

Airbnb, Short-Term Rentals and the Future of Housing Lily M. Hoffman, Barbara Schmitter Heisler, 2020-11-03 How do Airbnb and short term rentals affect housing and communities Locating the origins and success of Airbnb in the conditions wrought by the 2008 financial crisis the authors bring together a diverse body of literature and construct case studies of cities in the US Australia and Germany to examine the struggles of local authorities to protect their housing and neighborhoods from the increasing professionalization and commercialization of Airbnb The book argues that the most disruptive impact of Airbnb and short term rentals has been on housing and neighborhoods in urban centers where housing markets are stressed Despite its claims Airbnb has revealed itself as platform capitalism incentivizing speculation in residential housing At the heart of this trajectory is its business model and control over access to data In a first narrative the authors discuss how Airbnb has institutionalized short term rentals consequently removing long term rentals contributing to rising rents and changing neighborhood milieus as visitors replace long term residents In a second narrative the authors trace the transformation of short term rentals into a

multibillion dollar hybrid real estate sector promoting a variety of flexible tenure models While these models provide more options for owners and investors they have the potential to undermine housing security and exacerbate housing inequality While the overall effects have been similar across countries and cities depending on housing systems local response has varied from less restrictive in Australia to increasingly restrictive in the United States and most restrictive in Germany Although Airbnb has made some concessions it has not given any city the data needed to efficiently enforce regulations making for costly externalities Written in a clear and direct style this volume will appeal to students and scholars in Urban Studies Urban Planning Housing and Tourism Studies **Food and Power in Hawai'i** Aya Hirata Kimura, Krisnawati Suryanata, 2016-09-30 In Food and Power in Hawai'i island scholars and writers from backgrounds in academia farming and community organizations discuss new ways of looking at food policy and practices in terms of social justice and sustainability Each of the nine essays describes Hawai'i's foodscapes and collectively makes the case that food is a focal point for public policy making social activism and cultural mobilization With its rich case studies the volume aims to further debate on the agrofood system and extends the discussion of food problems in Hawai'i Given the island geography high dependency on imported food has often been portrayed as the primary challenge in Hawai'i and the traditional response has been localized food production The book argues however that aspects such as differentiated access the history of colonization and the neoliberalized nature of the economy also need to be considered for the right transformation of our food system The essays point out the diversity of food challenges that Hawai'i faces They include controversies over land use policies a gendered and racialized farming population benefits and costs of biotechnology stratified access to nutritious foods as well as ensuring the economic viability of farms Defying the reductive approach that looks only at calories or tonnage of food produced and consumed as indicators of a sound food system Food and Power in Hawai'i shows how food problems are necessarily layered with other sociocultural and economic problems and uses food democracy as the guiding framework By linking the debate on food explicitly to the issues of power and democracy each contributor seeks to reframe a discourse previously focused on increasing the volume of locally grown food or protecting farms into the broader objectives of social justice ecological sustainability and economic viability A Research Agenda for US Land Use and Planning Law John J. Infranca, Sarah Schindler, 2023-12-11 Authoritative and multidisciplinary in approach this Research Agenda shapes questions that will underpin future legal and empirical scholarly inquiry on zoning and land use regulation in the US Building on existing debates and providing a comprehensive overview of the current state of academic research it identifies the gaps which need addressing in future research *Land Use and the States* Robert G.
