Exploring Signature Pedagogies Regan A. R. Gurung, Nancy L. Chick, Aeron Haynie, 2023-07-03 From the Foreword These authors have clearly shown the value in looking for the signature pedagogies of their disciplines Nothing uncovers hidden assumptions about desired knowledge skills and dispositions better than a careful examination of our most cherished practices The authors inspire specialists in other disciplines to do the same Furthermore they invite other colleagues to explore whether relatively new interdisciplinary fields such as Women s Studies and Global Studies have or should have a signature pedagogy consistent with their understanding of what it means to apprentice in these areas Anthony A Ciccone Senior Scholar and Director Carnegie Academy for the Scholarship of Teaching and Learning How do individual disciplines foster deep learning and get students to think like disciplinary experts With contributions from the sciences humanities and the arts this book critically

explores how to best foster student learning within and across the disciplines This book represents a major advance in the Scholarship of Teaching and Learning SoTL by moving beyond individual case studies best practices and the work of individual scholars to focus on the unique content and characteristic pedagogies of major disciplines Each chapter begins by summarizing the SoTL literature on the pedagogies of a specific discipline and by examining and analyzing its traditional practices paying particular attention to how faculty evaluate success Each concludes by the articulating for its discipline the elements of a signature pedagogy that will improve teaching and learning and by offering an agenda for future research Each chapter explores what the pedagogical literature of the discipline suggests are the optimal ways to teach material in that field and to verify the resulting learning Each author is concerned about how to engage students in the ways of knowing the habits of mind and the values used by experts in his or her field Readers will not only benefit from the chapters most relevant to their disciplines As faculty members consider how their courses fit into the broader curriculum and relate to the other disciplines and design learning activities and goals not only within the discipline but also within the broader objectives of liberal education they will appreciate the cross disciplinary understandings this book affords **CliffsNotes TExES:**

Teaching the Arts in the Primary Curriculum Susan Ogier,Suzy Tutchell,2021-05-12 Learning in the arts does not fit in with simple conventional methodologies for teaching and assessing in the traditional sense but it has an immense power to transform children s understanding of the world around them and their lives Many jobs currently and of the future will demand the skills that learning in the arts will develop This book brings Arts Education sharply into focus as a meaningful learning experience for children of pre school and primary age 3 11 years It reinforces the potential for the wide range of physical mental and emotional development through learning opportunities that engagement in arts practice facilitates Provides insight into how teachers can support children to consider contemporary challenges that face their generation Includes expert voices from the world of education to demonstrate an expansive and perhaps surprising view of where and how the Arts can be found Shows how we can bring the arts so easily into our curriculum and into our classrooms *Art, Culture and International Development* John Clammer,2014-11-13 Culture is not simply an explanation of last resort but is itself a rich multifaceted and contested concept and set of practices that needs to be expanded appreciated and applied in fresh ways if it is to be both valued in itself and to be of use in practical development This innovative book places culture specifically in the form of the arts back at the centre of debates in development studies by introducing new ways of conceptualizing art in relation to development The book shows how the arts and development are related in very practical ways as means to achieve development goals through visual dramatic filmic and craft inspired ways It advocates not so much culture and development but rather for the development of culture Without a cultural content to economic and social transformation the problems found in much development up rooting of cultures loss of art forms languages and modes of expression and performance may only accelerate Paying attention to the development of the arts as the content of development helps to amend this culturally destructive process Finally the book argues for the value of the arts in attaining sustainable cultures promoting poverty alleviation encouraging self empowerment stimulating creativity and the social imagination which in turn flow back into wider processes of social transformation Discussion questions at the end of each chapter make this book ideal to help foster further thinking and debate This book is an inspiring read for postgraduate students and researchers in the fields of development studies cultural studies and sociology of development The Paradoxes of Art Alan Paskow,2004-01-15 In this study Alan Paskow first asks why fictional characters such as Hamlet and Anna Karenina matter to us and how they emotionally affect us He then applies these questions to painting demonstrating

that certain paintings beckon us to view their contents as real As emblematic of the fundamental concerns of our lives paintings he argues are not simply in our heads but in our world Paskow also situates the phenomenological approach to the experience of painting in relation to contemporary schools of thought particularly Marxist feminist and deconstructionist
