Underworlds Philosophies Of The Unconscious From Psychoanalysis To Metaphysics:

Underworlds: Philosophies of the Unconscious from Psychoanalysis to Metaphysics Jon Mills, 2014-03-21 The first book of its kind to provide a detailed analysis of the history of the unconscious from the underworlds of Greek and Egyptian mythology to psychoanalysis and metaphysics Jon Mills presents here a unique study of differing philosophies of the unconscious Mills examines how three major philosophical systems on the nature of the unconscious emerge after modern philosophy finding their most celebrated elaborations in Freud Lacan and Jung These three psychoanalytic traditions quite separate from one another in terms of their emphasis and philosophical presuppositions are scrutinised alongside contemporaneous movements in existential phenomenology semiotics epistemology transcendental psychology and Western metaphysics in the texts of Hegel Heidegger Sartre and Whitehead Underworlds provides a scholarly exegesis and critique of the main philosophies of the unconscious to have transpired in the history of ideas Exploring the unconscious from its philosophical beginnings in antiquity to its systematic articulation brought about by the rise of psychoanalysis Underworlds is ideal for practicing psychoanalysts academics of Freud Jung and Lacan and scholars of psychology philosophy and the humanities

Theories of Consciousness and the Problem of Evil in the History of Ideas Ben Lazare Mijuskovic, 2023-04-08 In this book Ben Lazare Mijuskovic uses both an interdisciplinary and History of Ideas approach to discuss four forms of intertwined theories of human consciousness and reflexive self consciousness Plato Augustine Descartes Leibniz Kant and Hegel Schopenhauer s subconscious irrational Will Brentano and Husserl s transcendent intentionality and Freud s dynamic ego Mijuskovic explores these theories within the context of psychological issues where the discussion is undergirded by the conflict between loneliness and intimacy He also explores them in the context of ethics where the dynamic is between the values of good and evil The book historically traces these issues in both a personal as well as a political framework

Inventing God Jon Mills, 2016-07-22 In this controversial book philosopher and psychoanalyst Jon Mills argues that God does not exist and more provocatively that God cannot exist as anything but an idea Put concisely God is a psychological creation signifying ultimate ideality Mills argues that the idea or conception of God is the manifestation of humanity s denial and response to natural deprivation a self relation to an internalized idealized object the idealization of imagined value After demonstrating the lack of any empirical evidence and the logical impossibility of God Mills explains the psychological motivations underlying humanity s need to invent a supreme being In a highly nuanced analysis of unconscious processes informing the psychology of belief and institutionalized social ideology he concludes that belief in God is the failure to accept our impending death and mourn natural absence for the delusion of divine presence As an alternative to theistic faith he offers a secular spirituality that emphasizes the quality of lived experience the primacy of feeling and value inquiry ethical self consciousness aesthetic and ecological sensibility and authentic relationality toward self other and world as the pursuit of a beautiful soul in search of the numinous Inventing God will be of interest to academics

David Herbert Lawrence,1922 *Consciousness and the Unconscious* David Archard,2024-11-01 Originally published in 1984

Consciousness and the Unconscious deals with the concept of the unconscious as originally defined by Sigmund Freud and as subsequently developed defended and criticized in continental writing at the time It starts by describing the institutional context in which psychoanalytic theory developed and the philosophical context which it met and goes on to discuss Freud s own understanding of the term unconscious This is followed by an account of Sartre s influential critique of Freud In the central chapters of the book the principal relevant ideas of Lacan and his pupils Laplanche and Leclaire are introduced and the author shows how these overlook an important aspect of Freudian ideas and rest on an incoherent theory of language and meaning Finally the important but neglected critique of Freud by the Italian Marxist Sebastiano Timpanaro is analysed The conclusion summarizes the resulting problems facing Freud s notion of the unconscious All technical terms are explained at first use and the author excels at making complex ideas accessible This is an ideal introductory text for students who need a concise guide to ideas about the unconscious

Hidden Minds F. R.
