Undoing Monogamy The Politics Of Science And The Possibilities Of Biology:

Undoing Monogamy Angela Willey, 2016-04-28 In *Undoing Monogamy* Angela Willey offers a radically interdisciplinary exploration of the concept of monogamy in U S science and culture propelled by queer feminist desires for new modes of conceptualization and new forms of belonging She approaches the politics and materiality of monogamy as intertwined with one another such that disciplinary ways of knowing themselves become an object of critical inquiry Refusing to answer the naturalization of monogamy with a naturalization of nonmonogamy Willey demands a critical reorientation toward the monogamy question in the natural sciences social sciences and humanities The book examines colonial sexual science monogamous voles polyamory and the work of Alison Bechdel and Audre Lorde to show how challenging the lens through which human nature is seen as monogamous or nonmonogamous forces us to reconsider our investments in coupling and in disciplinary notions of biological bodies *The New Politics of Materialism* Sarah Ellenzweig, John Zammito, 2017-07-14 This collection which includes an international roster of contributors from philosophy history literature and science is the first to ask what is new about the new materialism and place it in interdisciplinary perspective *The Routledge Handbook of Feminist Philosophy of Science* Sharon Crasnow, Kristen Intemann, 2020-11-30 The Routledge Handbook of Feminist Philosophy of Science is a comprehensive resource for feminist thinking about and in the sciences Its 33 chapters were written exclusively for this Handbook by a group of leading international philosophers as well as scholars in gender studies women s studies psychology economics and political science The chapters of the Handbook are organized into four main parts I Hidden Figures and Historical Critique II Theoretical Frameworks III Key Concepts and Issues IV Feminist Philosophy of Science in Practice The chapters in this extensive fourth part examine the relevance of feminist philosophical thought for a range of scientific and professional disciplines including biology and biomedical sciences psychology cognitive science and neuroscience the social sciences physics and public policy The Handbook gives a snapshot of the current state of feminist philosophy of science allowing students and other newcomers to get up to speed quickly in the subfield and providing a handy reference for many different kinds of researchers How All Politics Became Reproductive Politics Laura Briggs, 2017-09-12 Today all politics are reproductive politics argues esteemed feminist critic Laura Briggs From longer work hours to the election of Donald Trump our current political crisis is above all about reproduction Households are where we face our economic realities as social safety nets get cut and wages decline Briggs brilliantly outlines how politicians racist accounts of reproduction stories of Black welfare queens and Latina breeding machines were the leading wedge in the government and business disinvestment in families With decreasing wages rising McJobs and no resources for family care our households have grown ever more precarious over the past forty years in sharply race and class stratified ways This crisis argues Briggs fuels all others from immigration to gay marriage anti feminism to the rise of the Tea Party **Social Theory and Practice** , 2016-10 Queer Feminist Science Studies Cyd Cipolla, Kristina Gupta, David A. Rubin, Angela

Wiley,2017-12-01 Queer Feminist Science Studies takes a transnational trans species and intersectional approach to this cutting edge area of inquiry between women s gender and sexuality studies and science and technology studies STS The essays here queer or denaturalize and make strange ideas that are taken for granted in both areas of study Reimagining the meanings of and relations among queer and feminist theories and a wide range of scientific disciplines contributors foster new critical and creative knowledge projects that attend to shifting and uneven operations of power privilege and dispossession while also highlighting potentialities for uncertainty subversion transformation and play Theoretically and rhetorically powerful these essays also take seriously the materiality of natural objects and phenomena bones voles chromosomes medical records and more all help substantiate answers to questions such as What is sex How are race gender sexuality and other systems of differences co constituted The foundational essays and new writings collected here offer a generative resource for students and scholars alike demonstrating the ingenuity and dynamism of queer feminist scholarship

Current Opinion Edward Jewitt Wheeler, Frank Crane, 1905 **Current Literature** , 1905 *The Politics of Women's Biology* Ruth Hubbard, 1990 In this work the author explores the social and political assumptions of biology and genetics in particular She examines the ways biologists use scientific language use genetics and apply it to human situations especially to women s situations **Science Wars** Anthony Walsh, 2013-06-01 Few issues cause academics to disagree more than gender and race especially when topics are addressed in terms of biological differences To conduct research in these areas or comment favorably on research can subject one to scorn When these topics are addressed they generally take the form of philosophical debates Anthony Walsh focuses upon such debates and supporting research He divides parties into biologists and social constructionists arguing that biologists remain focused on laboratory work while constructionists are acutely aware of the impact of biologists in contested territories Science Wars introduces the ideas motivating the parties and examines social constructionism and its issues with science He explores arguments over conceptual tools scientists love and constructionists abhor and he provides a solid discussion of the co evolution of genes and culture Walsh then focuses his attention on gender how constructionists view it and the neuroscience explanation of gender differences Moving to race Walsh looks at how some have tried to bury the concept of race while others emphasize it He considers definitions of race essentialist taxonomic population and lineage as they have evolved from the time of the Enlightenment to the present And finally he attempts to bring the opposing sides together by pointing out what each can bring to a meaningful discussion

Strange Bedfellows David P. Barash, Judith Eve Lipton, 2009 A husband and wife team make the science of monogamy sexy
