The Disappeared Sandra Peake, Orla Lynch, 2024-09-02 This short book focuses on the Disappearances that occurred during the Troubles in Northern Ireland Using in depth interviews with thirteen families of those individuals who were abducted murdered and secretly buried from the 1970 s onwards this book examines the experience of the families and communities left behind Through an exploration of the historic and cultural origins of the contemporary IRA and how they came to be in the position of power within Catholic Nationalist communities during the troubles the context to the disappearances are presented This book reviews the journey undertaken by the families from the initial disappearance of their loved one and the suffocating silence that followed through their coming together as a self help group It follows their lobbying on a national and international basis leading to the return of the bodies of some of their loved ones and the solidarity which leads them to fight on as a group to recover the bodies that remain missing It also examines the involvement of the British and Irish and American governments in the set up of the International Commission for the Location of Victim s Remains and tells the story of the Clinton s personal involvement in supporting the families in their ongoing quest for recovery It is written accessibly for researchers and practitioners *The Order of Victimhood* Sarah E.

Jankowitz, 2018-10-03 This book explores how the construction and contestation of victims in societies emerging from conflict impact processes of peacebuilding It locates its inquiry in Northern Ireland where highly politicized unresolved narratives of violence and a so called hierarchy of victims illuminate inherent paradoxes of victimhood in intergroup conflict The author critiques how mechanisms designed to address the legacy of conflict often reify exclusive victim and perpetrator identities and obscure complex harm Adopting an interdisciplinary lens the book examines how the image of the ideal victim interacts with intergroup processes in a polarizing and intractable victim perpetrator paradigm The analysis of these issues in Northern Ireland suggests that exclusive policies and mechanisms reinforce rather than repair societal divisions and that inclusive complex approaches to victimhood are necessary to build sustainable peace This book will be of particular interest to scholars of peace studies transitional justice and criminology **Bordered Cities and Divided Societies** Scott A.

Painting History Tony Crowley, 2025-09-16 *Painting History The Murals of Northern Ireland 1908-2024* is the first book-length study of the oldest and most enduring tradition of political wall art Tony Crowley shows how muralism became an important medium for the unionist and loyalist community in its political domination of public space before and after Partition The text also demonstrates that nationalists and republicans painted few murals before the start of the 1981 Hunger Strike during which they painted wall art across republican areas of Northern Ireland as a way of publicizing their cause In the context of a divided society by the mid 1980s murals had become an established genre for the expression of political demands and aspirations In *Painting History* Tony Crowley provides a detailed analysis of the complex tradition of muralism in the context of the history that produced it with particular attention given to the cultural politics of this remarkable form The book also raises and discusses a series of theoretical questions about murals and muralism that transcend Northern Ireland issues of propriety and legality form and content authority and censorship The work ends with a consideration of the future of the murals in a still polarized but changing region

Incomplete Secession after Unresolved Conflicts Ana Maria Albulescu, 2021-10-20 This book analyses cases of incomplete secession after separatist wars and what this means for relations between central governments and de facto states The work explores the interplay between violence and power by examining the micro dynamics inherent in the process of escalation between separatists and central governments These dynamics affect not only the security interactions between these entities but also the character of political and governance relations that are built in the aftermath of secessionist war The book provides comprehensive analyses of the evolution of post conflict relations between the Republic of Moldova and Transnistria and between Georgia and South Ossetia and Abkhazia Beyond these empirical and conceptual examples the book contributes to a key debate in International Relations that addresses the relationship between democratisation nationalism and violence and its applicability to the study of escalation in the post Soviet space This book will be of much interest to students of secession statehood conflict studies democratisation post Soviet politics and International Relations in general Chapter 2 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Politics of Memoir and the Northern Ireland Conflict Stephen Hopkins, 2013 This book examines memoir writing by many of the key political actors in the Northern Irish Troubles 1969-1998 and argues that memoir has been a neglected dimension of the study of the

legacies of the violent conflict It investigates these sources in the context of ongoing disputes over how to interpret Northern Ireland's recent past A careful reading of these memoirs can provide insights into the lived experience and retrospective judgments of some of the main protagonists of the conflict The period of relative peace rests upon an uneasy calm in Northern Ireland Many people continue to inhabit contested ideological territories and in their strategies for shaping the narrative telling of the conflict key individuals within the Protestant Unionist and Catholic Irish Nationalist communities can appear locked into exclusive and self justifying discourses In such circumstances while some memoirists have been genuinely self critical many others have utilised a post conflict language of societal *Scars of War, Wounds of Peace* Shlomo

Ben-Ami, 2007 An Oxford trained historian who became Israeli Foreign Minister Shlomo Ben Ami was a key figure in the Camp David negotiations and many other peace talks He offers here an unflinching account of the Arab Israeli conflict informed by his firsthand knowledge The Chechen Wars Matthew Evangelista, 2004-05-13 Following the breakup of the Soviet Union Boris Yeltsin improvised a system of asymmetric federalism to help maintain its successor state the Russian Federation However when sparks of independence flared up in Chechnya Yeltsin and later Vladimir Putin chose military action to deal with a brushfire that they feared would spread to other regions and eventually destroy the federation Matthew Evangelista examines the causes of the Chechen Wars of 1994 and 1999 and challenges Moscow's claims that the Russian Federation was too fragile to withstand the potential loss of one rebellious republic He suggests that the danger for Russia lies less in a Soviet style disintegration than in a misguided attempt at authoritarian recentralization something that would jeopardize Russia's fledgling democratic institutions He also contends that well documented acts of terrorism by some Chechen fighters should not serve as an excuse for Russia to commit war crimes and atrocities Evangelista urges emerging democracies like Russia to deal with violent internal conflict and terrorism without undermining the fundamental rights and freedoms of their citizens He recommends that the United States and other democracies be more attentive to Moscow's violations of human rights and in their own struggle against terrorism provide a kind of role model Modern Irish

Identification of Potential Terrorists and Adversary Planning Theodore J. Gordon, Jerome C. Glenn, Yair Sharan, 2017-03-15 Never before have technological advances had so great an impact on security not only increasing the nature and level of threats but also for the possibility of providing the means to address the threats Technologies that could increase security include ubiquitous and omnipresent surveillance systems the use of new algorithms for big data improving bio and psychometrics and artificial intelligence and robotics Yet trustworthy and reliable partners and an active and alert society remain sine qua non to reduce terrorism To my mind this publication is one of the best studies of modern terrorism and what to do

about it that we have at our disposal So I am confident that it will find a wide readership not only in academic or think tank circles but even more importantly among policy makers and government officials They stand to benefit most and they can afford least of all to ignore the important conclusions and recommendations that this wise publication has provided Jamie SHEA Deputy Assistant Secretary General Emerging Security Challenges Division NATO

Crisis in the Horn of Africa Peter Woodward, 2012-10-05 The most dangerous corner of Africa is its north eastern Horn where instability reigns and terrorism thrives on the antagonisms of all its governments The Horn of Africa comprising Ethiopia Sudan and now South Sudan Somalia Djibouti Eritrea and stretching to include Kenya and Uganda is a pivotal geopolitical pressure point in world politics It stands at the hinge of Africa and the Middle East It was of vital interest to the superpowers during the Cold War attracting constant and unprofitable intervention In the post Cold War period regional political chaos including failed states terrorism and international piracy has struck the death blow to the ambitions of the International Community's New World Order The problems of the Horn political ideological religious and ethnic are compounded by natural disasters of widespread drought and famine and have invited intervention by governments and NGOs Tony Blair in his speech on the Doctrine of the International Community referred to the suffering of Africa as a scar on the conscience of humanity But the New World Order's aim of good governance free elections a free press independent judiciary recognition of human rights gender equality and effective government free of corruption seems as far off as ever Of the many striking examples perhaps Somalia stands out as a failed state and predatory state to the majority of its peoples and as a seat of international terror and a society which has even spawned the present scourge of international piracy International attention on the Horn is not limited to altruism in face of suffering with the burgeoning economic superpowers China and India exploiting mineral and land resources So international rivalry a traditional factor in the Horn's instability will continue to haunt both its peoples and the international community Peter Woodward's survey of the history and regional and international relations of the Horn of Africa shows the crises have deep historical roots predating present state boundaries These have been shaped by imperialism sharpened by independence and by the Cold War Chaos in the Horn has frustrated the ambitions of the post Cold War's New World Order This book is essential reading for all students of history international relations and policy planners
