## **Unique Environmentalism A Comparative Perspective Nonprofit And Civil Society Studies:**

Unique Environmentalism Gunnar Grendstad, Per Selle, Kristin Stromsnes, Oystein Bortne, 2006-11-28 their collective action The more unique the case the more we need to study it not only to understand the case itself but also to understand the structure and limits of environmentalism in general We hope that we have been able to show the value of this research strategy The way we have organized our study is different from the Rootes study 2003 This study emphasizes the importance of different environmental cultures and of political conjunctures in a single country of which different environmental groups take advantage We are not arguing against the fact that branches of environmentalism have features in common across countries e g animal rights and antinuclear movements However we would not go as far as the Rootes study We argue that looking at political conjunctures even if important does not tell the whole story Researchers need to understand the broader context in which political conjunctures and environmental culture operate **Third Sector Research** Rupert

Taylor, 2010-03-02 To mark the 20th Anniversary of Voluntas International Journal of Voluntary and Nonprofit Organizations the editor has compiled a comprehensive overview of contemporary debates in third sector scholarship comprised of all original research by leaders in the field The volume will offer a critical review of the central and innovative themes that have come to form the core of third sector debate and research with an international focus The first global compendium of third sector research this volume provides a international multi disciplinary and state of the art overview of the field The contributions not only examine and review the existing scholarship but introduce new perspectives and thinking on the third sector especially in terms of future implications around the world Topics covered include History and Development of the Field New Trends in Volunteering and Philanthropy Volunteering and Participation in Developing Countries Leadership and Governance Corporate Responsibility Social Capital Global Civil Society This seminal volume provides a broad and comprehensive look at the field of Third Sector Research of primary interest to researchers in political science sociology development studies and nonprofit leadership programs **International Encyclopedia of Civil Society** Helmut K.

Anheier, Stefan Toepler, 2009-11-24 Recently the topic of civil society has generated a wave of interest and a wealth of new information Until now no publication has attempted to organize and consolidate this knowledge The International Encyclopedia of Civil Society fills this gap establishing a common set of understandings and terminology and an analytical starting point for future research Global in scope and authoritative in content the Encyclopedia offers succinct summaries of core concepts and theories definitions of terms biographical entries on important figures and organizational profiles In addition it serves as a reliable and up to date guide to additional sources of information In sum the Encyclopedia provides an overview of the contours of civil society social capital philanthropy and nonprofits across cultures and historical periods For researchers in nonprofit and civil society studies political science economics management and social enterprise this is the most systematic appraisal of a rapidly growing field **Scandinavian Civil Society and Social Transformations** Bernard

Enjolras, Kristin Strømsnes, 2018-04-11 This book aims at presenting a conceptual apparatus and empirical analysis of the ways Nordic civil society is affected by social transformations by focusing on the Norwegian case The Norwegian empirical focus allows identifying processes and factors of change that are relevant outside this context and enable us to understand on a more general basis the relationship between social transformations and transformations affecting the voluntary sector This book will make an original contribution to the field of comparative civil society studies both by increasing the available knowledge on the Nordic civil society model and by analyzing the societal transformations affecting civil society over time

**Civic Engagement in Scandinavia** Lars Skov Henriksen, Kristin Strømsnes, Lars Svedberg, 2018-10-09 Since the 1990 s a number of studies have documented a remarkable high and stable amount of popular engagement in civic organizations in Denmark Norway and Sweden Often these countries have been considered deviant cases against the proliferating decline of social capital studies However despite great international interest in the Scandinavian region the volume argues that the civil societies and the civic engagement of these countries remain poorly understood Most interest in the Scandinavian welfare models addresses the balance between state and market but under communicates the role played by civil society and popular engagement in associations and voluntary organizations The contributions offer a coherent portrait of stability and change in formal and informal forms of civic engagement over the past 25 years as well as offering contextualized knowledge of the history and institutional design in which Scandinavian civil societies are embedded

**Global Environmental Constitutionalism in the Anthropocene** Louis J Kotzé, 2016-09-22 There is persuasive evidence suggesting we are on the brink of human induced ecological disaster that could change life on Earth as we know it There is also a general consensus among scientists about the pace and extent of global ecological decay including a realisation that humans are central to causing the global socio ecological crisis This new epoch has been called the Anthropocene Considering the many benefits that constitutional environmental protection holds out in domestic legal orders it is likely that a constitutionalised form of global environmental law and governance would be better able to counter the myriad exigencies of the Anthropocene This book seeks to answer this central question from the perspective of the Anthropocene what is environmental constitutionalism and how could it be extrapolated to formulate a global framework In answering this question this book offers the first systematic conceptual framework for global environmental constitutionalism in the epoch of the Anthropocene

*Perspectives of Environmental Civil Society Organizations on Forestry in the Asia-Pacific Region* Joerg Balsiger, 1998

Comparative Perspectives on Civil Society Robert A. Dibley, 2008-07-07 Comparative Perspective of Civil Society examines the role of civil society in the economic social and political development of several nations It uses a comparative perspective to explore the intriguing challenges that civil society organizations face in the development processes of various nations It argues that while the involvement of civil society organizations in the achievement of sustainable development is an extremely complex process it is paramount for stakeholders i e government officials NGOs staff the private sector union

professional association leaders and community based groups to increase their knowledge and cooperation     The Journal of Japanese Studies ,2006 A multidisciplinary forum for communicating new information new interpretations and recent research results concerning Japan to the English reading world     Thickening Civil Society Daniel M. Sabet,2005 A flood of scholarship has demonstrated the importance of civil society to democratic transitions democratic consolidation and making democracy work However if civil society is important for democracy what are the implications for countries where the state has historically controlled societal forms of organization This dissertation attempts to understand how civil society organizations grow and develop in Mexico a country with a traditionally weak third sector The study examines civil society organizations that operate in the broad policy arena of water and sanitation in four Mexican border cities I find that civil society organizations rarely emerge spontaneously but are highly dependent on their network ties and often require the incubating support of social infrastructure such as the U S nonprofit community Such incubating support is necessary given limited legal governmental and private sector support for the sector Recognizing the importance of civil society organizations network ties for both their emergence and impact I compare the construction of network ties to the U S nonprofit community and the Mexican private for profit sector I find that the physical U S Mexico border is actually easier to cross then the more amorphous division between the nonprofit and for profit sectors and I use the Institutional Analysis and Development Framework to examine variation in the extent of cooperation across these two divisions Given that state control has been the historical obstacle to an autonomous civil society the research examines the extent to which political opportunities exist for autonomous civil society organizations and seeks to explain variation in such opportunities I find that neither local level electoral competition nor opposition party government by themselves guarantees a strong third sector however the continuation of one party rule in the absence of electoral competition creates a sizable overlap between political and civil society and limits the development of the latter     **Graduate Programs in the Humanities, Arts and Social Sciences**
