San Miguel, 2019-11-14 This book contains a variety of medical case studies from actual patients presenting to the emergency department. It includes not only typical cases that present to the ED but also less common yet very important cases that one can't afford to miss. Each chapter begins with a case or set of cases with typical and atypical aspects of the disease in question. This is followed by high value learning points on the condition with introductory background points, physiology and pathophysiology of the disease, how to make the diagnosis and finally how to initiate treatment. The cases provide expert discussion with tips and tricks, personal experience with management of each of the cases, and a follow up description of the outcome of the cases to provide the reader with closure. To supplement each case study, all 67 chapters include a pattern recognition component that identifies the key diagnostic features of the disease discussed. The chapters conclude with a summary of the diagnostic and treatment details of each condition. Using a concise, easy-to-read bulleted format, the book helps readers to learn, evaluate, adopt new practices right now. **LEARN Emergency Medicine Case Studies** **LEARNing Rounds** Learn Evaluate Adopt Right Now is an essential resource for a variety of emergency medicine clinicians including experienced physicians, residents, physician assistants, nurse practitioners, nurses, and medical students rotating in the emergency department. Finally, this book can be used as a basis for small group discussions, especially in emergency medicine training programs. Determinations of the National Mediation Board United States. How we feel on the job, what we say we feel, and what feelings we display, all these are important aspects of organizational behavior and workplace culture. Rather than focusing on the psychology of personal emotions at work, however, this study concentrates on emotions as role requirements on workplace emotions that combine the private with the public, the personal with the social, and the authentic with the masked. In this cross-cultural study of emotion management, the author argues that even though the goals of normative control in factories, offices, and shops may be similar across cultures, organizational structure and the surrounding culture affect how that control is discussed and conceived.
