victory in World War Two published to coincide with the eightieth anniversary of D Day by an award winning expert on trains and transportation They certainly were not soldiers yet they suddenly found themselves in uniform in a foreign land But as locomotive drivers track workers conductors porters signalmen and engine cleaners they knew how to run trains And their job was to bring them back to life The Liberation Line tells the thrilling story of the British and American railway engineers who in the months after D Day worked around the clock and in great danger to rebuild the ravaged railways of Europe and keep the Allied forces fueled as they pushed on into Germany As territory was taken these soldier railroaders were close behind rebuilding the lines putting up telegraph wires replacing bridges and laying track all the while dodging bullets shells and booby traps Tales of extraordinary feats and heroism abound including how 10 000 men rebuilt a 135 mile long railway in just three days the reconstruction of the bridge over the Seine in two weeks while under bombardment and the use of cigarette lighters as improvised signaling systems Despite being critical to Allied victory the role of the railway men has been largely forgotten or ignored In a vivid and gripping narrative Christian Wolmar brings to life this colorful cast of generals and engineers without whose extraordinary bravery the liberation of France and invasion of Germany might well have foundered and the course of history changed
