Velocity Moving To A Solid Faith:

Velocity Sean Dunn,2003-04-01 Examines how obstacles in such areas as relationships entertainment image and emotions can impede the spiritual growth of Christian teenagers and discusses how to make decisions by listening to God's voice

Velocity Sean Dunn,2003 Author Dunn challenges teens to stay on track spiritually and to confront potential challenges in the areas of relationship entertainment image and emotions

Bored with God Sean Dunn,2009-08
SPIRITUAL APATHY IS A DISEASE Like most diseases apathy surfaces in observable symptoms that are frustrating to its victims and the people who care for them Teenagers are particularly susceptible to apathy and apathy is particularly contagious In Bored with God Sean Dunn catalogs what he's seen of apathy in his ministry to youth He offers sympathetic guidance from the Scriptures for keeping apathy from spreading and for shepherding students into spiritual hunger

Teenagers can be frustratingly sleepy in their convictions but once awakened to a life of bold faith they can apply virtually tireless energy to the problems of a world bored with God And that energy is particularly contagious

The Fire-Tried Golden Heartbeats of Golden Agers at the Sunset of Life Rev. Benjamin A. Vima,2019-03-01
In the Bible God's heroes pour out so many of their beliefs about God's greatness and their failures and successes in abiding by God's premonitions and promises At the brink of death they cry out for the strong and saving presence of God at the same instance their hearts rise up with grateful beats for God's positive promises for them Reverend Vima acknowledges himself as one already entering the threshold of golden age hearing the same heartbeats from his inner spirit as well as from so many of his peers This book contains a hundred such fire tried golden heartbeats The contents of this book have been gathered by the author for more than ten years and intensively worked on it in his retirement life They are framed as small articles under many titles In his foreword Reverend Vima underlines this book is a gift of love from him to his readers young and old I offer it to the young ones so that either they can fight against them or bite them or munch them or even digest them for getting stronger in their holdings of Christian faith I present it to the golden agers so that these heartbeats of mine may join with their own making their inner holdings wrapped around and getting stronger or dance according to the beats as a sort of spiritual exercise in their lone world stage

Entropic Creation Helge S. Kragh,2016-04-29 Entropic Creation is

the first English language book to consider the cultural and religious responses to the second law of thermodynamics from around 1860 to 1920 According to the second law of thermodynamics as formulated by the German physicist Rudolf Clausius the entropy of any closed system will inevitably increase in time meaning that the system will decay and eventually end in a dead state of equilibrium Application of the law to the entire universe first proposed in the 1850s led to the prediction of a future heat death where all life has ceased and all organization dissolved In the late 1860s it was pointed out that as a consequence of the heat death scenario the universe can have existed only for a finite period of time According to the entropic creation argument thermodynamics warrants the conclusion that the world once begun or was created It is these two scenarios allegedly consequences of the science of thermodynamics which form the core of this book The heat death and the claim of cosmic creation were widely discussed in the period 1870 to 1920 with participants in the debate including European scientists intellectuals and social critics among them the physicist William Thomson and the communist thinker Friedrich Engels One reason for the passion of the debate was that some authors used the law of entropy increase to argue for a divine creation of the world Consequently the second law of thermodynamics became highly controversial In Germany in particular materialists and positivists engaged in battle with Christian mostly Catholic scholars over the cosmological consequences of thermodynamics This heated debate which is today largely forgotten is reconstructed and examined in detail in this book bringing into focus key themes on the interactions between cosmology physics religion and ideology and the public way in which these topics were discussed in the latter half of the nineteenth and the first years of the twentieth century
