Venetianische Epigramme Perfect Library:

The Readability of the World Hans Blumenberg, 2022-12-15 The Readability of the World represents Hans Blumenberg's first extended demonstration of the metaphorological method he pioneered in *Paradigms for a Metaphorology*. For Blumenberg, metaphors are symptomatic of patterns of thought and feeling that escape conceptual formulation but are nonetheless indispensable because they allow humans to orient themselves in an otherwise overwhelming world. The Readability of the World applies this method to the idea that the world presents itself as a book. The metaphor of the book of nature has been central to Western interpretations of reality, and Blumenberg traces the evolution of this metaphor from ancient Greek cosmology to the model of the genetic code to access the different expectations of reality that it articulates, reflects, and projects. Writing with equal authority on literature and science, theology and philosophy, ancient metaphysics and twentieth-century biochemistry, Blumenberg advances rich and original interpretations of the thinking of a range of canonical figures including Berkeley, Vico, Goethe, Spinoza, Leibniz, Bacon, Flaubert, and Freud. Through his interdisciplinary, anthropologically sharpened gaze, Blumenberg uncovers a wealth of new insights into the continuities and discontinuities across human history of the longing to contain all of nature, history, and reality in a book from the Bible, the Talmud, and the Qur'an to Diderot's Encyclopedia and Humboldt's Cosmos to the ACGT of the DNA code. Magnificent Buildings, Splendid Gardens David R. Coffin, 2008 Magnificent Buildings Splendid Gardens returns to print some of the most important works of David Coffin, a leading authority on Renaissance architecture who, as one of the first scholars to apply the tools of art history to the study of gardens, became a founder of the discipline of garden and landscape studies. These essays span the wide range of Coffin's work from Italian Renaissance architecture, garden design, sculpture, and drawings to English gardens and landscape designers of the seventeenth to early nineteenth centuries. Coffin's approaches are as varied as his subject matter. Some of these essays present the results of his archival research, including his discovery of crucial documents on the Emilian architect Giovan Battista Aleotti and the only documentary evidence identifying Vignola as the architect of the Villa Lante at Bagnaia. Other essays take a much broader cultural view, investigating for example the phenomenon of public access to private Renaissance gardens, elucidating the evolving meaning of images of the goddess Venus in English gardens, and identifying the significance of the decorative programs of monuments as diverse as the Villa Belvedere in Rome and the eighteenth-century gardens at Rousham in Oxfordshire. The book also includes a commentary on each essay written by one of Coffin's former students, a full analytical index, and a complete bibliography of Coffin's work.
