Christian Drosten

Timing And Time Perception Annals Of The New York Academy Of Sciences:

The Neuropsychology of Attention Ronald A. Cohen, 2013-12-11 It has been 15 years since the original publication of Neuropsychology of Attention At the time of its publication attention was a construct that had long been of theoretical interest in the field of psychology and was receiving increased research by cognitive scientists Yet attention was typically viewed as a nuisance variable a factor that needed to be accounted for when assessing brain function but of limited importance in its own right There is a need for a new edition of this book within Neuropsychology to present an updated and integrated review of what is known about attention the disorders that affect it and approaches to its clinical assessment and treatment Such a book will provide perspectives for experimental neuropsychological study of attention and also provide clinicians with insights on how to approach this neuropsychological domain

Time, Action and Cognition Françoise Macar, V. Pouthas, William J. Friedman, 1992-05-31 The number of models characterizing temporal information processing from estimation and production of brief durations up to complex symbolizations and representations of time have increased dramatically in recent years What emerges as well is that many hypotheses put forward to account for motor behavior attention and memory assign a crucial explanatory role to temporal parameters This volume based on a NATO Advanced Research Workshop held in France in October 1991 enhances the theoretical ties between fields It brings together international specialists who offer both experimental evidence and theoretical views on complementary topics Time Action and Cognition thus helps to identify common themes and critical issues in motor timing perception estimation and representation of time It places special emphasis on temporal mechanisms and traces connecting pathways between early temporal regulations of action and sophisticated adult concepts of time In opening the way to a more unified approach it defines new directions for future research

Time, Mind, and Behavior John A. Michon, Janet L. Jackson, 2012-12-06 This book is the result of the International Workshop on Time Mind and Behavior which was held at the University of Groningen in September 1984 The aim of the workshop was to produce an up to date review of the state of the art in the field of time psychology The rapid development of a cognitive outlook in experimental psychology has among other things underlined the need for a reconsideration of time experience the coding and representation of temporal information and the timing of complex responses Since the publication of Paul Fraisse's classical *Psychologie du Temps* in 1957 time psychology has slowly but steadily drawn an increasing amount of attention to a point where it now seems to be incorporated into the mainstream of research At the same time a noticeable tendency for a renewed general interest in time can also be traced in several other disciplines These two observations supported our belief that it was time for a review of the sort we had in mind At the close of 1983 we completed a project supported by the Dutch Organization for the Advancement of Pure Research in which we had studied the coding and retrieval of temporal information This provided us with a plausible pretense for organizing a workshop Around Christmas time 1983 we were able to mail a preliminary invitation to a number of our

colleagues whom we knew to be currently active in the field **Annals of the New York Academy of Sciences. Volume 423. Timing and Time Perception Held at New York on 10-13 May 1983** J. Gibbon, L. Allan, NEW YORK ACADEMY OF SCIENCES NY., 1984 This volume is the result of a conference on Timing and Time Perception held on May 10-13 1983 by the New York Academy of Sciences Major topics include Time Perception Timing of Motor Programs and Temporal Patterns Timing in Cognitive Processing and Memory Rhythmic Patterns and Music and The Internal Clock **Biological Determinants of Reinforcement** Michael L. Commons, Russell M. Church, James R. Stellar, Allan R. Wagner, 2014-04-04 This seventh volume divided into four parts addresses the biological determinates of reinforcement and memory Covers topics in electrical brain stimulation drugs and reinforcement and cellular mechanisms **Timing and Time Perception** John Gibbon, Lorraine Allan, 1984 **Timing the Future** Joseph Glicksohn, Michael Myslobodsky, 2006 In this volume leading researchers bring together current work on time perception and time based prospective memory in order to understand how people time their intentions This is the first account of many important topics concerning the timing of behavior offered by scientists of diverse fields who in the past have exhibited an attitude of mutual benign neglect An explication of the rules which govern timing the future are of fundamental interest to anyone who wishes to explore the potential of human experience Prospective memory especially time based is a relatively unexplored way to study memory and few studies have been devoted to its neurobiological foundations This volume aims to fill this void and will boost further interest in the field while stimulating interdisciplinary research **The Quarterly Journal of Experimental Psychology**, 2005 [The Concept of Time in Psychology](#) Jon Roelkelein, 2000-04-30 The methodologies used to study psychological time especially the experimental and empirical approaches are critically important in the scientific analysis of the concept of time This resource and annotated bibliography provides a current and comprehensive review of the literature on psychological time and traces the evolution of the concept of time in psychology from ancient to modern periods A resource and annotated bibliography which traces the lineage and evolution of the concept of time in psychology from ancient to pre modern and modern periods with an emphasis on a traditionalist and experimental empirical approach to the understanding of psychological time The book describes various physical philosophical and psychological theories and definitions of time and focuses on the methodological concerns of psychologists regarding the scientific investigation of time In addition to over 1 000 citations and references this resource contains over 900 current annotated entries It contains both name and subject indexes and will be of interest to students and faculty in psychology related fields of study and academic and selected public libraries **Time and Mind** Julius Thomas Fraser, 1989 **Reflections on Adaptive Behavior** Nancy K. Innis, 2008 The colleagues and former students of John Staddon the last of the Skinnerian behaviourists discuss topics that have been important in his work behavioural ability and choice memory time and models and behaviourism Contributor R H I Dale from Macquarie University **Aging and Peak Procedure Performance** Afshin Mohammadhossein Gharib, 2002 **Psychologica Belgica**, 1987

Memory and Remembering John A. Groeger, 1997 This key text on Memory covers one of the core topics of all undergraduate psychology degrees Memory and Remembering fills a clear gap in the market for a text which integrates laboratory clinical and naturalistic memory findings and models in a clear and accessible way Throughout theories and findings are illustrated with every day examples which enable the student to relate conceptually difficult topics to their own experience and to understand memory in a broader context

Neurodynamics and Psychology Mike Oaksford, Michael Oaksford, Gordon D. A. Brown, 1994-02-08 The recent resurgence in neural network and connectionist approaches to modeling cognitive phenomena has led to a strong backlash from the classical cognitive psychology framework Neurodynamics and Psychology presents a collection of recent work that explores the connectionist versus the classical debate from a variety of perspectives putting forward the case that the study of neurodynamics may represent the only way forward in the search for solutions to recently emerging problems for neural network models across a wide range of diverse research areas The book is divided into three parts Part I covers the general area of attention and action Part II examines the psychobiology of time and the role of temporal mechanisms in providing a solution to the psychologically important binding problem and Part III reports on the computational modeling of the dynamic psychological processing involved in language and memory Neurodynamics and Psychology is of great interest to researchers in the areas of cognitive psychology cognitive neuroscience neural networks and neuropsychology The recent resurgence in neural network and connectionist approaches to modelling cognitive phenomena has led to a backlash from the classical cognitive psychology framework The purpose of this book is to present recent work which explores the connectionist v classical debate and produces a balanced view of work in the area The book argues that neurodynamics may represent the only way forward in the search for solutions to recently emerging problems across a wide range of apparently idverse research areas

Time and Mind II Hede Helfrich, 2003 Focusing on the significance of time in information processing this text looks at time both as an object of information processing and as a constituent factor in information processing and seeks to define a unified view of psychological time

Directory of Published Proceedings, 1990 *Learning and Behavior* James E. Mazur, 2001 This contemporary survey of the field of learning offers comprehensive coverage of both classic studies and the most recent developments and trends with an emphasis on the importance of learning principles in everyday life Many real world examples and analogies make the often abstract concepts and theories of the field more concrete and relevant and most chapters include sections that describe how the theories and principles have been used in the applied field of behavior modification Simple Ideas Simple Associations and Simple Cells Innate Behavior Patterns and Habituation Basic Principles of Classical Conditioning Theories and Research on Classical Conditioning Basic Principles of Operant Conditioning Reinforcement Schedules Experimental Analyses and Applications Avoidance and Punishment Theories and Research on Operant Conditioning Stimulus Control and Concept Formation Comparative Cognition Learning by Observation Learning Motor Skills Choice For educators social workers and

anyone interested in human learning behavior Journal of Cognitive Neuroscience ,1989 **Contemporary Issues in Comparative Psychology** Donald A. Dewsbury,1990 Contemporary Issues in Comparative Psychology provides an overview of current research in the branch of comparative psychology that lies within the mainstream of the study of animal behaviour. The book presents some of the best work being done by psychologists studying animal behaviour and demonstrates the concerns and the achievements of this dynamic field. Contemporary Issues in Comparative Psychology should serve as a useful resource for students and professionals working in the fields of psychology, zoology, ecology and animal behaviour.
