Routledge International Handbook of Social Justice Michael Reisch,2014-04-03 In a world where genocide hunger poverty war and disease persist and where richer nations often fail to act to address these problems or act too late a prerequisite to achieving even modest social justice goals is to clarify the meaning of competing discourses on the concept Throughout history calls for social justice have been used to rationalize the status quo promote modest reforms and justify revolutionary even violent action Ironically as the prominence of the concept has risen the meaning of social justice has become increasingly obscured This authoritative volume explores different perspectives on social justice and what its attainment would involve It addresses key issues such as resolving fundamental questions about human nature and social relationships the distribution of resources power status rights access and opportunities and the means by which decisions regarding this distribution are made Illustrating the complexity of the topic it presents a range of international historical and theoretical perspectives and discusses the dilemmas inherent in implementing social justice concepts in policy and practice Covering more than abstract definitions of social justice it also includes multiple examples of how social justice might be achieved at the interpersonal organizational community and societal levels With contributions from leading scholars around the globe Reisch has put together a magisterial and multi faceted overview of social justice It is an essential reference work for all scholars with an interest in social justice from a wide range of disciplines including social work public policy public health law criminology sociology and education

Children and Families "At Promise" Beth Blue Swadener,Sally Lubeck,1995-03-09 This book critiques the currently popular at risk construct drawing from historical contextual critical and personal perspectives It provides an alternative context for viewing children and their families as at promise A basic premise of the book is that the generalized use of the at risk label is highly problematic and often implicitly racist and classist a 1990s version of the cultural deficit model that locates problems in individuals families and communities rather than in institutional structures that create and maintain inequality This book provides a needed interrogation and alternative context for viewing children and families caught in the extreme conditions facing many families in the United States

The Will to Empower Barbara Cruikshank,2019-06-30 How do liberal democracies produce citizens who are capable of governing themselves In considering this question Barbara Cruikshank rethinks central topics in political theory

including the relationship between welfare and citizenship democracy and despotism and subjectivity and subjection Drawing on theories of power and the creation of subjects Cruikshank argues that individuals in a democracy are made into self governing citizens through the small scale and everyday practices of voluntary associations reform movements and social service programs She argues that our empowerment is a measure of our subjection rather than of our autonomy from power Through a close examination of several contemporary American technologies of citizenship from welfare rights struggles to philanthropic self help schemes to the organized promotion of self esteem awareness she demonstrates how social mobilization reshapes the political in ways largely unrecognized in democratic theory Although the impact of a given reform movement may be minor the techniques it develops for creating citizens far extend the reach of governmental authority Combining a detailed knowledge of social policy and practice with insights from poststructural and feminist theory *The Will to Empower* shows how democratic citizens and the political are continually recreated *Stirrings* Lana Dee

assume that social service programs respond to homelessness seeking to prevent and understand it *The Value of Homelessness* however argues that homelessness today is an effect of social services and sciences which shape not only what counts as such but what will or ultimately won t be done about it Through a history of U S housing insecurity from the 1930s to the present Craig Willse traces the emergence and consolidation of a homeless services industry How to most efficiently allocate resources to control ongoing insecurity has become the goal he shows rather than how to eradicate the social economic and political bases of housing needs Drawing on his own years of work in homeless advocacy and activist settings as well as interviews conducted with program managers counselors and staff at homeless services organizations in New York Los Angeles San Francisco and Seattle Willse provides the first analysis of how housing insecurity becomes organized as a

governable social problem An unprecedented and powerful historical account of the development of contemporary ideas about homelessness and how to manage homelessness The Value of Homelessness offers new ways for students and scholars of social work urban inequality racial capitalism and political theory to comprehend the central role of homelessness in governance and economy today An Interracial Movement of the Poor Jennifer Frost, 2005-11 Choice Outstanding Academic Title 2002 Community organizing became an integral part of the activist repertoire of the New Left in the 1960s Students for a Democratic Society the organization that came to be seen as synonymous with the white New Left began community organizing in 1963 hoping to build an interracial movement of the poor through which to demand social and political change SDS sought nothing less than to abolish poverty and extend democratic participation in America Over the next five years organizers established a strong presence in numerous low income racially diverse urban neighborhoods in Chicago Cleveland Newark and Boston as well as other cities Rejecting the strategies of the old left and labor movement and inspired by the Civil Rights Movement activists sought to combine a number of single issues into a broader more powerful coalition Organizers never limited themselves to today's simple dichotomies of race vs class or of identity politics vs economic inequality They actively synthesized emerging identity politics with class and coalition politics and with a drive for a more participatory welfare state treating these diverse political approaches as inextricably intertwined While common wisdom holds that the New Left rejected all state involvement as cooptative at best Jennifer Frost traces the ways in which New Left and community activists did in fact put forward a prescriptive even visionary alternative to the welfare state After Students for a Democratic Society and its community organizing unit the Economic Research and Action Project disbanded New Left and community participants went on to apply their strategies and goals to the welfare rights women's liberation and the antiwar movements In her study of activism before the age of identity politics Frost has given us the first full fledged history of what was arguably the most innovative community organizing campaign in post war American history The Politics of Motherhood Alexis Jetter, Annelise Orleck, Diana Taylor, 1997 Essays and interviews explode the myth of apolitical motherhood by showing how 20th century women have politicized their role as mothers in a wide range of social contexts
