Facts Dr. William Brosend,2018-08-21 While comedian Stephen Colbert was remarkably prescient some years ago when he introduced the word truthiness to our vocabulary it was presidential advisor Kellyanne Conway who told us that there are alternative facts abroad in the land Rarely has such an offhand comment so captured the imagination while also aptly summarizing the spirit of the age The late Daniel Patrick Moynihan famously said that while everyone is entitled to his or her opinion they are not entitled to their own facts Until now Good preaching has always been a challenge a combination of exegesis insight and craft in witness to the Gospel and in service of the Church Cultural forces in particular the proliferation of media outlets and the explosion of available entertainment sources have only made the challenge greater And that was when most agreed on a common set of facts Those days are now past and gone and preachers may be forgiven if at times it feels as if the task is impossible The pulpit is like a tightrope stretched between red and blue Republicans and Democrats conservatives and liberals And there is no net I read the Beatitudes last Sunday and the tension in the church was palpable Who knew Blessed are the peacemakers were fighting words Everything I say is being interpreted and analyzed for things I never even thought about Joshua and the Battle of Jericho has become a commentary on whether or not we should build a wall on the border I cannot believe how angry people are I m old enough to remember when the big difference was whether you got your news from Walter Cronkite on CBS or Huntley Brinkley on NBC Now no one agrees on what constitutes news Or facts Truth in the Age of Alternative Facts offers a way forward This is a book for preachers teachers and other leaders along with students of preaching It demonstrates how to proclaim honest faithful candid sermons in spite of social and political disagreements It teaches how to preach in a way that allows the Church to be its best self a place of commitment engagement acceptance and compassion for all God s children **Research Methods in the Social and Health Sciences**

Ted Palys,Chris Atchison,2021-02-05 Research Methods in the Social and Health Sciences Research Decisions by Ted Palys

and Chris Atchison gives students a thorough thoughtful and highly readable introduction to the entire research process from start to finish. From its underlying premise that your research questions and objectives rather than any specific method should guide your research, this book discusses each step of the research process from limiting the scope of a literature review to navigating ethical considerations to deciding which methods are best suited for finding answers to specific research questions to how to analyze data and present findings. Readers are encouraged to think deeply about each step of the research process. The book promotes this deliberation by discussing the strengths and limitations of different methods and. Throughout the process, the authors provide many examples from their own and student research, sharing insights for research decisions arising from that experience. Readers will develop the skills to create solid research questions, perform literature reviews, identify appropriate data sources and methods, conduct research, analyze and interpret data, and translate the resulting knowledge generated from the research process to a wider audience. All core parts of the research process, by developing their knowledge and creating confidence in their own decision-making skills. After explaining the unique and often complementary strengths of qualitative and quantitative methods, students focus on what methods are best suited for finding answers to the research questions that interest them. Major types of research, including experiments, case studies, surveys, quasi-experiments, ethnographies, focus groups, participatory action research, and archival studies, all receive significant coverage. The text illustrates how these methods are enhanced by integrating them with 21st-century technologies and combining them in mixed methods projects. Chapters on constructing a research proposal and disseminating research bookend the process with concrete steps in between to support students designing their own original research projects. Study questions at the end of each chapter encourage students to think critically about the research process and how the choices a researcher makes will broaden or constrain what they can find. By the end of the text, social and health science students will feel confident in undertaking ethical and thoughtful research. Constructing Realities Stuart Cartland, 2023-12-04

Considering recent developments and ongoing processes such as globalisation, immigration, and multiculturalism, this book critically examines contemporary theoretical narratives around English national identity as mediated by place and experience.

The New Face of America Ronald Runge, 2005-06 America is symbolized by its independent Protestant Christian culture, unknown by any other nation or peoples in the course of history. It is a culture legitimized and defended by an incomparable set of words formulated into a Constitution, miraculously fashioned by an elite group of men who carried the wisdom of God and the ages in their bosoms, granting the American citizen a unique legacy. This legacy has been gratuitously bestowed on all peoples who have been legitimately drawn to this generous nation, requiring only that they love America to become a part of its destiny. But in a short period of barely two generations of Americans, this unique culture has been taken to the brink of destruction. It is in danger of being transformed into a Banana Republic type third-world style culture. By the use of, not so free markets and a misdirected compassion constantly fed to the American middle class by an unrelenting combination of

money first multi cultural corporate elites and one world academics each having a direct line to the media moguls They are changing the face of America by the reconstruction of the independent resourceful patriotic American into only a one world cipher These elites are degrading the American middle class with illegal Mexican invaders who are untrained diseased and unwilling to accept America but willing to accept the manipulations of these business academic and political elites The book concludes that only a politically incorrect retaking of America by those same middle class American citizens will preserve our unique culture and keep America from becoming the land that was **The American Poet** Samuel D.
