Understanding Jacques Ellul:

Understanding Jacques Ellul Jeffrey P Greenman, Read M Schuchardt, Noah J Toly, 2013-07-25 Jacques Ellul 1912 1994 was one of the world's last great polymaths and one of the most important Christian thinkers of his time engaging the world with a simplicity sincerity courage and passion that few have matched However Ellul is an often misunderstood thinker As more than fifty books and over one thousand articles bear his name embarking on a study of Ellul's thought can be daunting This book provides an introduction to Ellul's life and work analysing and assessing his thought across the most important themes of his scholarship Readers will see that his remarkably broad field of vision clarity of focus and boldly prophetic voice make his work worth reading and considering rereading and discussing **Jacques Ellul** Jacob E. Van Vleet, Jacob Marques Rollison, 2020-04-13 Jacques Ellul 1912 1994 was Professor of the History and Sociology of Institutions at the University of Bordeaux A sociologist historian and Protestant lay theologian Ellul is primarily known for his writings on technology propaganda and Christian anarchism He influenced a wide array of thinkers including Ivan Illich William Stringfellow Thomas Merton Paul Virilio and Neil Postman In this book Jacob Van Vleet and Jacob Marques Rollison guide readers through Ellul's most influential theological and sociological writings By understanding Ellul's primary works readers will be able to clearly grasp his social theory and theological ethics profiting from his deep insight and prophetic wisdom

Sources and Trajectories Jacques Ellul, 1997 This is a print on demand book and is therefore non returnable This book is composed of eight articles written by Ellul and not previously translated into English The eight were chosen not necessarily for their clarity or power to convince but because they are the earliest formulations of some of Ellul's key ideas

Perspectives on Our Age Jacques Ellul, 1981 Originally broadcast on CBC Radio's Ideas as a series of interviews Ellul's first person approach here makes his ideas accessible to readers looking for new ways of understanding our society *Perspectives on Our Age* also gives unique new insight into Ellul's life his work and the origins and development of his beliefs and theories Confronting Technology Matthew T. Prior, 2020-03-16 We are living through a digital revolution which already touches every area of life and will continue to shape the future in as yet unforeseen ways Digital technologies are an ordinary part of daily life and yet they also present an unprecedented challenge to Christians to articulate a biblical theological framework to navigate times of rapid change The work of the French theologian Jacques Ellul is a theological time bomb primed for times like these Accounts of Ellul's career often divide off his sociology and theology but this book argues that Ellul conceived a single project of bringing technology into confrontation with the Word of God tackling the phenomenon he named technique the pursuit of maximal power and efficiency implicit in the technological enterprise with a profound depth of biblical and ethical insight Centering himself on the apocalypse or revelation of Jesus Christ in history Ellul offers a monumental timely though far from flawless contribution to contemporary ethical debates about the uses and abuses of technologies His work blazes a trail that Christians and all concerned for the future would do well to follow as we avoid

both the naivety of technological neutrality and the dread of technological determinism **Jacques Ellul and the Bible** Jacob Marques Rollison, 2020-10-13 This striking collection of scholarly essays highlights the hermeneutic contribution of the French theologian and sociologist Jacques Ellul revealing him to be one of the twentieth century's most creative and insightful readers of the Bible With a breadth of contributors ranging from established biblical scholars and theologians to pastoral practitioners from top Ellul scholars to emerging voices and including six first time English translations of Ellul's own articles this volume not only provides a detailed overview of Ellul's biblical approach but also constitutes a crucial moment in Ellul's theological reception This book counts as a clear demonstration that the full potential of Ellul's theological interpretation of Scripture to rejuvenate and reconfigure contemporary biblical hermeneutics has yet to be seen With contributions from Jacques Ellul Brian Brock Patrick Troude Chasteney Amy Erickson Chris Friesen David Gill Andrew Goddard John Goldingay Jean Sebastien Ingrand Declan Kelly Ted Lewis Michael Morelli Anthony J Petrotta Elisabetta Ribet Frederic Rognon Christian Roy *Understanding Principles of Politics and the State* John J. Schrems, 2007 Originally published under the title *Principles of Politics* this completely revised and updated work is a study in applied political theory It uses current political society and politics as its backdrop and shows that the nature authority origin and purpose of the state are dictated by fundamental theoretical and practical principles linked to the goals and values of ordinary life Helpful in the quest for understanding are depictions of the political world by ancient philosophers as well as contemporary political scientists With detailed examples *Understanding Principles of Politics and the State* examines the charge that democracy is a myth describes the world of academic political science and belies the cynicism that principles and politics do not go together An efficient and effective organizing principle is used to explain justice rights groups church and state federalism constitutionalism and even proposals for world government A brief case study of the Philippines illustrates some basic principles of state building A preference for presidential over parliamentary government stands at odds with the view of many commentators The necessity for principles in understanding ubiquitous change ends the book Book jacket

Kierkegaard and the Question Concerning Technology Christopher B. Barnett, 2019-08-22 Over the last several decades technology has emerged as an important area of interest for both philosophers and theologians Yet despite his status as one of modernity's seminal thinkers Søren Kierkegaard is not often seen as one who contributed to the field *Kierkegaard and the Question Concerning Technology* argues otherwise Christopher B Barnett shows that many of Kierkegaard's criticisms of the present age relate to the increasing dominance of technology in the West and he puts Kierkegaard's thought in conversation with subsequent thinkers who grappled with technological issues from Martin Heidegger to Thomas Merton Barnett shows that Kierkegaard's writing with its marked emphases on personal upbuilding stands as a place where deeper non technical modes of thinking are both commended and nurtured In doing so Barnett presents a Kierkegaard who remains relevant perhaps all too relevant in today's digital age *Dialectical Theology and Jacques Ellul* Jacob E. Van

Vleet,2014-09-01 Jacob E Van Vleet argues that the work of Jacques Ellul is frequently misread on account of inattention to the theological underpinning that governs Ellul s thought In a penetrating analysis the first of its kind Van Vleet provides a substantive account of the theological structure of Ellul s work and demonstrates the determinative role that theology plays in a proper understanding of Ellul The book offers a major introduction to Ellul s thought his contribution to theology and philosophy and how his philosophy of technology is both theologically informed and culturally relevant **The Palgrave**

Handbook of Radical Theology Christopher D. Rodkey,Jordan E. Miller,2018-10-10 The Palgrave Handbook of Radical Theology is the definitive guide to radical theology and the commencement for new directions in that field For the first time radical theology is addressed and assessed in a single comprehensive volume including introductory and historical essays for the beginner essays on major figures and their thought and shorter articles on various themes concepts and related topics This book is a seminal work for the radical theology movement It clarifies origins and demonstrates the exigency and utility of current figures and issues A useful and essential guide for newcomers and veterans in the field this volume serves as both a reference work and an introduction to omitted or forgotten topics within contemporary discussions **Understanding**

Religion and Popular Culture Terry Ray Clark,Dan W. Clanton,2012 This introductory text provides students with an extremely useful toolbox of approaches for analyzing religion and popular culture Revelation and Reason in Christian Theology Christopher C. Green,David I. Starling,2018-07-11 Do revelation and reason contradict Throughout the church s history Christians have been tempted to make revelation and reason mutually exclusive But both are essential to a true understanding of the faith The inaugural Theology Connect conference held in Sydney in July 2016 was dedicated to surveying the intersection of revelation and reason In Revelation and Reason in Christian Theology Christopher C Green and David I Starling draw together the fruit of this conference to provoke sustained deep reflection on this relationship The essays filtered through epistemological biblical historical and dogmatic lenses critically and constructively contribute to this important and developing aspect of theology Each essayist approaches revelation and reason according to the psalmist s words In your light we see light Ps 36 9 The light of faith does not obscure truth rather it enables us to see truth **Jacques**

Ellul Joyce Main Hanks,2000 Since his death in 1994 the understanding of Jacques Ellul s significance appears to have deepened considerably His contribution to the study of the sociology and theology of technology is universally acknowledged This volume aims to present the totality of his work Heidegger and Development in the Global South Siby K.

George,2015-03-05 Taking the Heideggerian critical ontology of technology as its base this volume looks at postcolonial modernization and development in the global south as the worldwide expansion of the western metaphysical understanding of reality We live today in an increasingly globalizing technological society that Martin Heidegger described in the middle of the last century as the planetary imperialism of technologically organized man Consequent upon this cultural intellectual globalization the ahistorical violent individualistic calculative and capitalistic logic of the metaphysics of technology is

permeating the life world even of the world's poorest peoples in ways they could neither choose nor control. This volume questions the political ethics and justice of post war development discourse in the light of the egalitarian aims of modern societies, cultural freedom of communities and nations and the ecological limits of the planet. The final chapters discuss the alternative proposal of development as various conceptions of good life and equitable human flourishing amidst equally flourishing non human life and non living beings. This unique volume is the first book length treatment of the ontology of modernization and development in the global south from a Heideggerian stance.

Political Theory of the Digital Age Mathias Risse, 2023-02-09. With the rise of far reaching technological innovation from artificial intelligence to Big Data, human life is increasingly unfolding in digital lifeworlds. While such developments have made unprecedented changes to the ways we live, our political practices have failed to evolve at pace with these profound changes. In this path breaking work, Mathias Risse establishes a foundation for the philosophy of technology, allowing us to investigate how the digital century might alter our most basic political practices and ideas. Risse engages major concepts in political philosophy and extends them to account for problems that arise in digital lifeworlds, including AI and democracy, synthetic media and surveillance capitalism, and how AI might alter our thinking about the meaning of life. Proactive and profound, *Political Theory of the Digital Age* offers a systemic way of evaluating the effect of AI, allowing us to anticipate and understand how technological developments impact our political lives before it's too late.

Jacques Ellul on Religion, Technology, and Politics Jacques Ellul, Patrick Chastenet, 1998. Presents 15 systematic and in depth interviews with French philosopher Ellul, 1912-94, conducted during his last years. Mostly they consider his theological and other thought, but sometimes discuss his personal life as well. The titles include: minority genealogy; Goethe places to write; human nature; technology; Bach and Mozart; and chilling perfection. No subject index. Translated from *Entretiens avec Jacques Ellul*, published by La Table Ronde in 1994. Annotation copyrighted by Book News Inc, Portland, OR.

Catastrophic Technology in Cold War Political Thought Caroline Ashcroft, 2024-11-30. In the mid twentieth century, a certain idea of technology emerged in the work of many influential political theorists: a critical, catastrophic concept of technology entangled with the apocalyptic fears fuelled by two all consuming world wars and the looming nuclear threat. Drawing on the work of theorists such as Hannah Arendt, Jacques Ellul, Martin Heidegger and Herbert Marcuse, *Catastrophic Technology in Cold War Political Thought* explores the critical idea of technology as both a response to a dramatically changing world and a radical political critique of Cold War liberalism.

Modern Protestantism and Positive Law Bradley Shingleton, 2019-10-31. The nature and role of positive law has largely been neglected in recent Protestant theology and social ethics. *Modern Protestantism and Positive Law* introduces and critically summarizes a tradition in Continental Protestant thought about human law, drawing on writings of Barth, Brunner, Ellul, Thielicke, Wolf, Pannenberg, Huber and Kremer, many of which have not been translated into English. The book argues that law is an essential political and social institution within developed societies, one that is normative and dependent on an encompassing vision of justice, but

that also necessarily reflects the contemporary pluralism of those societies Modern Protestantism and Positive Law argues that theological and ethical perspectives on positive law developed by Protestant thinkers have a place in reflection on positive law provided they are conceived and expressed in a manner appropriately respectful of the diversity of contemporary opinion regarding the expression of religious perspectives in the public arena

Eschatology and the Technological Future Michael S. Burdett, 2014-12-05 The rapid advancement of technology has led to an explosion of speculative theories about what the future of humankind may look like These technological futurisms have arisen from significant advances in the fields of nanotechnology biotechnology and information technology and are drawing growing scrutiny from the philosophical and theological communities This text seeks to contextualize the growing literature on the cultural philosophical and religious implications of technological growth by considering technological futurisms such as transhumanism in the context of the long historical tradition of technological dreaming Michael Burdett traces the latent religious sources of our contemporary technological imagination by looking at visionary approaches to technology and the future in seminal technological utopias and science fiction and draws on past theological responses to the technological future with Pierre Teilhard de Chardin and Jacques Ellul Burdett's argument arrives at a contemporary Christian response to transhumanism based around the themes of possibility and promise by turning to the works of Richard Kearney Eberhard Jüngel and Jürgen Moltmann Throughout the author highlights points of correspondence and divergence between technological futurisms and the Judeo Christian understanding of the future
