Social Enterprise in Asia Eric Bidet,Jacques Defourny,2019-05-29 In the absence of a widely accepted and common definition of social enterprise SE a large research project the International Comparative Social Enterprise Models ICSEM Project was carried out over a five year period it involved more than 200 researchers from 55 countries and relied on bottom up approaches to capture the SE phenomenon This strategy made it possible to take into account and give legitimacy to locally embedded approaches thus resulting in an analysis encompassing a wide diversity of social enterprises while simultaneously allowing for the identification of major SE models to delineate the field on common grounds at the international level These SE models reveal or confirm an overall trend towards new ways of sharing the responsibility for the common good in today s economies and societies We tend to consider as good news the fact that social enterprises actually stem from all parts of the economy Indeed societies are facing many complex challenges at all levels from the local to the global level The diversity and internal variety of SE models are a sign of a broadly shared willingness to develop appropriate although sometimes embryonic responses to these challenges on the basis of innovative economic business models driven by a social mission In spite of their weaknesses social enterprises may be seen as advocates for and vehicles of the general interest across the whole economy Of course the debate about privatisation deregulation and globalised market competition all factors that may hinder efforts in the search for the common good has to be addressed as well The first of a series of four ICSEM books Social Enterprise in Asia will serve as a key reference and resource for teachers researchers students experts policy makers journalists and other categories of people who want to acquire a broad understanding of the phenomena of social enterprise and social entrepreneurship as they emerge and develop across the world Philosophy & Methodology of the Social Sciences: Understanding social scientific practice Mark J. Smith,2005 Covers the traditional literature on the philosophy of the social sciences and the contemporary philosophical and methodological debates developing at the heart of the disciplinary and interdisciplinary groups in the social sciences It addresses the needs of researchers and academics who are grappling with the relationship between questions of knowledge construction and the problems of social scientific method **Report of Proceedings** American Correctional Association,1923 Proceedings for 1884 and 1885 include report of conference of prison officials Chicago 1884 separately paged **Social Enterprise in Latin America** Luiz Inácio Gaiger,Marte Nyssens,Fernanda Wanderley,2019-05-22 In the absence of a widely accepted and common definition of social enterprise SE a large research project the International Comparative Social Enterprise Models ICSEM Project was carried out over a five year period it involved more than 200 researchers from 55 countries and relied on bottom up approaches to capture the SE phenomenon This strategy made it possible to take into account and give legitimacy to locally embedded approaches thus resulting in an analysis encompassing a wide diversity of social enterprises while simultaneously allowing for the identification of major SE models to delineate the field on common grounds at the international level These SE models

reveal or confirm an overall trend towards new ways of sharing the responsibility for the common good in today's economies and societies. We tend to consider as good news the fact that social enterprises actually stem from all parts of the economy. Indeed, societies are facing many complex challenges at all levels from the local to the global level. The diversity and internal variety of SE models are a sign of a broadly shared willingness to develop appropriate although sometimes embryonic responses to these challenges on the basis of innovative economic business models driven by a social mission. In spite of their weaknesses, social enterprises may be seen as advocates for and vehicles of the general interest across the whole economy. Of course, the debate about privatisation, deregulation and globalised market competition, all factors that may hinder efforts in the search for the common good, has to be addressed as well. The second of a series of four ICSEM books, *Social Enterprise in Latin America*, will serve as a key reference and resource for teachers, researchers, students, experts, policy makers, journalists and other categories of people who want to acquire a broad understanding of the phenomena of social enterprise and social entrepreneurship as they emerge and develop across the world.

Research on Social Entrepreneurship Rachel Mosher-Williams, 2006. Over the past few decades, the nonprofit and for-profit sectors have become more alike, undertaking mixed commercial and social programming in response to dramatic changes in the cultural and economic context. This new landscape includes constantly evolving demographics, instant and interactive technology, downsized and devolved governments, a global marketplace, a volatile economy and a commercial presence that reaches into almost every aspect of life. Faced with these challenges, nonprofit organizations are becoming more market-oriented while businesses are working harder to benefit communities as well as stockholders. Scholars and practitioners in diverse fields are observing the convergence of market and mission throughout the world and are anxiously trying to find a common language to describe this burgeoning area of activity so that it can be better understood and harnessed. This volume sheds light on the most promising new approaches to researching social entrepreneurship from both academics and practitioners and covers the following topics: developing an evidence-based definition of and theoretical framework for social entrepreneurship research; the extent of institutionalization of the social enterprise field; methods for assessing the impact of social entrepreneurs' work; a comparison of social entrepreneurship in the United States and abroad; and a case study on a specific social enterprise. The

volume concludes with recommendations for several promising areas of social entrepreneurship research including new legal forms for hybrid organizations capitalization of enterprise activity the state of education for the next generation of social entrepreneurs and international comparisons of social enterprise models *Social Economics* Friedrich Freiherr von Wieser,1927 **Market World and Chronicle** ,1924 **Economic World** ,1924 **Frontiers of Entrepreneurship Research** ,2004 **Theories of International Relations: Approaches to international relations: structuralism**
