A 3D visualization of a plane defined by a path and a location. The plane is shown as a translucent purple surface. A curved path is visible on the plane, with a green arrow indicating the direction of travel. A point on the path is highlighted with a green circle. A small dialog box is open, showing the location of the plane as '% Arc Length' and a value of '0'. The plane is oriented such that its normal is perpendicular to the path.

Handbook on Advanced Design and Manufacturing Technologies for Biomedical Devices Andrés Díaz Lantada, 2014-07-08

The last decades have seen remarkable advances in computer aided design engineering and manufacturing technologies multi variable simulation tools medical imaging biomimetic design rapid prototyping micro and nanomanufacturing methods and information management resources all of which provide new horizons for the Biomedical Engineering fields and the Medical Device Industry Advanced Design and Manufacturing Technologies for Biomedical Devices covers such topics in depth with an applied perspective and providing several case studies that help to analyze and understand the key factors of the different stages linked to the development of a novel biomedical device from the conceptual and design steps to the prototyping and industrialization phases Main research challenges and future potentials are also discussed taking into account relevant social demands and a growing market already exceeding billions of dollars In time advanced biomedical devices will decisively change methods and results in the medical world dramatically improving diagnoses and therapies for all kinds of pathologies But if these biodevices are to fulfill present expectations today s engineers need a thorough grounding in related simulation design and manufacturing technologies and collaboration between experts of different areas has to be promoted as is also analyzed within this handbook
