Dag Hammarskjöld Library, 1951 **Human Rights Education and the Politics of Knowledge** Joanne Coysh, 2017-02-24 Around the world there are a myriad of NGOs using human rights education HRE as a tool of community empowerment with the firm belief that it will help people improve their lives One way of understanding these processes is that they translate universal human rights speak using messages and symbols which make them relevant to people's daily lives and culturally resonant However an alternative more radical perspective is that these processes should engage individuals in modes of critical inquiry into the ways that that existing power structures maintain the status quo and control not only how we understand and speak about social inequality and injustice but also act on it This book is a critical inquiry into the production distribution and consumption of HRE and how the discourse is constructed historically socially and politically through global institutions and local NGO practice The book begins with the premise that HRE is composed of theories of human rights and education both of which are complex and multifaceted However the book demonstrates how over time a dominant discourse of HRE constructed by the United Nations institutional framework has come to prominence and the ways it is reproduced and reinforced through the practice of

intermediary NGOs engaged in HRE activities with community groups Drawing on socio legal scholarship it offers a new theoretical and political framework for addressing how human rights pedagogy knowledge and power can be analysed between the global and local by connecting the critical but well trodden theories of human rights to insights on critical pedagogy It uses critical discourse analysis and ethnographic research to investigate the practice of NGOs engaged in HRE using contextual evidence and findings from fieldwork with NGOs and communities in Tanzania **Sport and Foreign**

Policy in a Globalizing World Steven J. Jackson, Steven Haigh, 2013-10-18 Globalization is effecting a close convergence of sport and foreign policy In order to respond to novel social political cultural and economic pressures states are increasingly turning to sport as a foreign policy instrument and they cannot ignore the corresponding influence that global sport has on their core interests This book is devoted to exploring this relationship in detail Although any examination of sport and foreign policy inevitably focuses on issues related to both politics and international relations the primary intention here is to consider the dimensions associated with foreign policy This book was previously published as a special issue of Sport in Society

Development and Policy Dialogue: Contemporary Insights Thomas Kaydor Jr., 2020-07-09 We live in a time when the largest numbers of people who were being lifted out of absolute poverty in a relatively short time in human history have relapsed into extreme poverty due to the Coronavirus Disease COVID 19 This is happening in Africa Asia Europe the Pacific and Americas as well as all other parts of the globe At this time the understanding of Public Policy and development are enriched at an unprecedented pace This is also the time when the once thriving economic social political and environmental transformations developing and developed countries experienced are being undermined by the global pandemic The experience for developing countries to achieve prosperity through economic growth good governance and inclusivity have gained greater attention today than ever The desired paths and innovative approaches to harnessing public policy dialogue are even more demanding thus the rightful time to explore important insights about national and global development Issues regarding aid corruption and anti corruption poverty reduction social protection economic growth and overall sustainable development require sober reflections Such reflections and insights must be evidence based To these this book contributes It is therefore a compelling consensus to grab and read a copy Don't miss it

War and Democratization Wolfgang Merkel, Sonja Grimm, 2013-09-13 Promotion of democracy in post war and post conflict societies became a topic during the 1990s The book deals with the legality legitimacy and effectiveness of military interventions where the international community of states not only felt impelled to engage in military humanitarian or peace building missions but also in long term state and democracy building External actors particularly engaged in four modes namely enforcing democratization by enduring post war occupation mode 1 restoring an elected government by military intervention mode 2 intervening in on going massacres and civil war with military forces humanitarian intervention and thereby curbing the national sovereignty of those countries mode 3 and forcing democracy on rogue states by democratic intervention in other words democracy through war mode 4 The contributions link juridical and philosophical reflections on just war ad bellum with empirical evidence post bellum in Afghanistan Georgia Serbia Croatia Cambodia and East Timor All empirical analyses stress the complexity and difficulties to establish democracy in post conflict societies driven or monitored by external actors Such an endeavour implies a comprehensive agenda of political social and economic methods of peace building However if external actors withdraw before the roots of democracy are deep enough and before democratic institutions are strong enough to stand alone then the entire endeavour may fail This book was originally published as a special issue of *Democratization* *Index to International Statistics*, 2005 *Index to Proceedings of the General Assembly*, 2000 Includes special sessions *New Engagement*

Souare,2006 Though there have been numerous studies on the United Nations only a few have dealt comprehensively with Africa s relations with the world body This book attempts to fill this lacuna by providing a systematic assessment of Africa s relationship with the World body from its foundation in 1945 to its sixtieth anniversary in 2005 The premise of the book s argument is that to properly understand Africa s current relationship with the UN it is necessary to first understand the history and theoretical underpinnings behind the formation of the world body including the expectations and motives of the different stakeholders The book shows that there have been some real successes in Africa s relationship with the world body such as the joint efforts against the Apartheid regime in South Africa as well as real failures such as in the genocide in Rwanda Based on this it concludes that Africa s relationship with the United Nations has worked for the most part and will work even better if Africa sees its partnership with the UN as complementary to it own efforts projects and initiatives rather than something to depend on
