These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 81 contributions included in the EPCE proceedings were carefully reviewed and selected for inclusion in this two volume set. The papers included in this volume are organized in the following topical sections: cognitive issues in HCI, measuring and monitoring cognition, cognitive issues in complex environments, productivity, creativity, learning and collaboration.

Handbook of Defence Electronics and Optronics Anil K. Maini,2018-07-23 Handbook of Defence Electronics and Optronics Anil K Maini Former Director Laser Science and Technology Centre India. First complete reference on defence electronics and optronics. Fundamentals, Technologies and Systems. This book provides a complete account of defence electronics and optronics. The content is broadly divided into three categories: topics specific to defence electronics, topics relevant to defence optronics, and topics that have both electronics and optronics counterparts. The book covers each of the topics in their entirety from fundamentals to advanced concepts, military systems in use and related technologies, thereby leading the reader logically from the operational basics of military systems to involved technologies and battlefield deployment and applications. Key features: Covers fundamentals, operational aspects, involved technologies and application potential of a large cross section of military systems. Discusses emerging technology trends and development and deployment status of next generation military systems wherever applicable in each category of military systems. Amply illustrated with approximately 1000 diagrams and photographs and around 30 tables. Includes salient features, technologies and deployment aspects of hundreds of military systems including military radios, ground and surveillance radars, laser range finder and target designators, night vision devices, EW and EO jammers, laser guided munitions and military communications equipment and satellites. Handbook of Defence Electronics and Optronics is an essential guide for graduate students, R D scientists, engineers engaged in manufacturing defence equipment and professionals handling the operation and maintenance of these systems in the Armed Forces.
