Universal Gravitation Guide:

NEW THEORY OF PLANETARY MOTION AND NEW FORMULA OF UNIVERSAL GRAVITATION WANG

JIANHUA,2022-09-12 If the solar system is regarded as a moving mass point system then both the planet m and the sun M move around the solar system mass center O According to the motion law of the mass point system and the centripetal force formula of the curve it can be determined through theoretical analysis and mathematical derivation 1 Kepler's law of planetary motion contradicts the motion rules of mass point systems 2 The universal gravitational force F between planet m and sun M K is the new gravitational constant The force F on the object m in the inertial frame S In the formula V is the velocity of the object m in the inertial frame S and u is the velocity of the inertial frame S in the cosmic space reference frame In addition the author designed three new optical experiments based on the light interference theory to verify whether the principle of constant speed of light conforms to objective facts Experiment 1 Using the new front and rear hole laser interferometer for verification Experiment 2 Verification of using long and short optical path Michelson interferometers Experiment 3 Verification of using a double hole interferometer

The Britannica Guide to Heat, Force, and Motion Erik Gregersen Associate Editor, Astronomy and Space Exploration,2011-01-15 Many of the world's most common processes and interactions are governed by the laws of thermodynamics and mechanics While the transfer release or absorption of heat often accompany chemical reactions or seem inherent to mechanical systems they are also familiar to anyone who has ever spent time outdoors on a warm day or touched a hot plate Likewise any physical body large or small solid or fluid is subject to a wide range of forces that trigger motion This detailed compendium explores the foundations and laws of both thermodynamics and mechanics as well as the lives of those individuals who helped advance these fundamental areas of physics
