Difficult Economic Times Paola Mattei, 2014-04-02 Financial sustainability is one of the key challenges confronting Europe s universities today Despite the fact that universities are at the centre of knowledge creation and development which itself is seen as one of the main engines of economic growth public funding of higher education in most countries is not increasing or at least not increasing enough in real terms Democratisation of higher education has led to the fact that the higher education budgets per student are relatively low in most European countries compared to Europe s competitors Despite declarations of intent to increase spending on higher education and research it is not very likely that public expenditure will grow significantly on average in Europe and therefore be able to keep up with rapidly inflating costs in the years to come One of the reasons for this is that higher education and research have to compete with other priorities in public budgets e g security health etc Furthermore the recent economic downturn has contributed to the decision in many European countries to decrease the levels of investment in higher education and research Such trends are particularly worrisome for universities across Europe whose continuing dependence on public funding puts their future sustainability under pressure New funding schemes and incentives have been discussed and introduced in many European higher education systems including competitive funding schemes for research under the name of excellence policies Despite the different national institutional configurations in Europe higher education systems face similar demands of promoting sustainable funding models maintaining high academic standards and equality Thus financial sustainability is not an end in itself it aims to ensure that the public university s goals are reached by guaranteeing that the institution produces sufficient income to enable it to invest in high quality education and produce equitable outcomes For these reasons this book analyses funding reforms from a multidimensional approach **Higher Education in Societies** Gaële Goastellec, France Picard, 2014-09-11 Universities are

not only economic engines but societal ones This book interrogates the embeddedness of Higher Education HE systems in national social contracts and discusses how their renegotiation is at play in the organisation of students access to universities Structured around the central concept of the social contract the growing recognition of the role of HE in its implementation and regulations governing both individual and collective access Higher Education in Societies A Multiscale Perspective

explores the shifting mission of HE over the years from one thought to produce an elite to one of distributive justice by presenting research at the macro meso and micro levels In bringing together researchers from different countries continents and disciplines to study the same issue through a multiscale analysis this book forms the starting line for further theoretical and methodological debate on the value of weaving together different approaches to the study of HE including historical comparative sociological organisational institutional quantitative and qualitative

Activation or Workfare? Governance and the Neo-Liberal Convergence Ivar Lodemel,Amilcar Moreira,2014-09-29 The last decade of the 20th century was marked by a shift in how welfare states deal with those at the bottom of the income ladder This shift involved the introduction strengthening of work obligations as a condition for receiving minimum income benefits which in some countries was complemented by efforts to help recipients return to the labour market namely through the investment in active labour market policies ALMP Based on case studies of developments in the US and eight European nations UK Norway Denmark Netherlands Germany France Portugal and the Czech Republic this book argues that this first set of reforms was followed by a second wave of reforms that whilst deepening the path towards the focus on work brings important innovations be it the tools used to help recipients back to the labour markets ex financial incentives and in how activation policies are delivered ex integration of benefit and employment services Looking at the array of developments introduced during this period we discern two key trends The first concerns the strengthening of the role of the market in the governance of activation which is visible in the strengthening of the focus on work or the marketisation of employment services The second concerns a move towards the individualisation of service delivery visible in the expansion of the use of personal action plans or in efforts to streamline service delivery Finally we show that the onset of the sovereign debt crisis in Europe has triggered a new wave of reforms Whilst tentative only our analysis points to a worrying trend of the curtailment or benefits Portugal and activation services Netherlands Czech Republic to minimum income recipients and in parallel a further deepening of the focus on work conditionality UK and Norway

Caring for a Living Francesca Degiuli,2016-05-06 Today s world is aging at a great speed and although increased longevity represents one of the greatest achievements of the last century the extension of life expectancy does not necessarily correspond to an extension of healthy lives Aging populations particularly those with a high percentage of the oldest old are often burdened with chronic conditions that require extended long term care Deciding who provides said care and in what forms are key problems that will soon affect a growing number of post industrial high and mid income countries

Caring for a Living contributes to this debate by exploring the organization of long term care in Italy a country already in the midst of an eldercare crisis There the answer to this problem has taken the shape of home eldercare assistance an arrangement whereby long term care services are bought in the market in the form of private and individualized assistance by families sometimes with economic support provided by the State The providers of these services commonly known as badanti minders are for the most part im migrant women coming from different areas of the world Caring for a Living analyzes the emergence and development of this arrangement and the role that the state Italian families and workers themselves play in shaping and in defining it The author provides timely insights on the nature of long term care and its requirements the specific needs of families facing this issue the changing role of the neoliberal State and the ways in which global political and economic processes influence and shape an apparently individually based solution to long term care This book is ideal for graduate courses in sociology and anthropology specifically in courses related to gender and migration work and women social inequality and immigration studies

Decent Incomes for All Bea Cantillon,Tim Goedemé,John Hills,2019 For more than a decade organizations such as the IMF OECD and the ILO have issued concerns about the trend of increased inequality in rich welfare states while influential thinkers and think tanks have come to agree on at least one central point globalization and technological progress have exacerbated the existing inequities in social market economies Across Europe despite high social spending and work related welfare reforms poverty remains a largely intractable problem for policymakers and the persistent reality for citizens In *Decent Incomes for All* the authors shed new light on recent poverty trends in the European Union and the corresponding responses by European welfare states They analyze the effect of social and fiscal policies before during and after the recent economic crisis and study the impact of alternative policy packages on poverty and inequality The book also explores how social investment and local initiatives of social innovation can contribute to tackling poverty while recognizing that there are indeed structural constraints on the increase of the social floor and difficult trade offs involved in reconciling work and poverty reduction Differences across countries are however stark which suggests that there are lessons to be learned and policy changes to be applied if the political will exists
