Advanced Science and Technology Advanced Communication and Networking Information Security and Assurance

Ubiquitous Computing and Multimedia Applications are conferences that attract many academic and industry professionals. The goal of these co-located conferences is to bring together researchers from academia and industry as well as practitioners to share ideas, problems and solutions relating to the multifaceted aspects of advanced science and technology, advanced communication and networking, information security and assurance, ubiquitous computing and multimedia applications. This co-located event included the following conferences: AST 2010 The second International Conference on Advanced Science and Technology; ACN 2010 The second International Conference on Advanced Communication and Networking; ISA 2010 The 4th International Conference on Information Security and Assurance; and UCMA 2010 The 2010 International Conference on Ubiquitous Computing and Multimedia Applications. We would like to express our gratitude to all of the authors of submitted papers and to all attendees for their contributions and participation. We believe in the need for continuing this undertaking in the future. We acknowledge the great effort of all the Chairs and the members of advisory boards and Program Committees of the above-listed events who selected 15% of over 1 000 submissions following a rigorous peer review process. Special thanks go to SERSC Science Engineering Research Support Society for supporting these co-located conferences.

Circular Economy: The Next Level of Company Success André Podleisek, Katharina Luban, Roman Hänggi, 2025-02-17. Without any doubt, the current prevailing Linear Economy principle of take-make-dispose is inherently unsustainable. Raw materials are extracted, transformed into products and discarded as waste after use. The resulting environmental and economic challenges brought together both practitioners and academics to develop more sustainable methods for production and consumption. Especially, the concept of Circular Economy has received a lot of attention. But despite many technical solutions, a key question for practical implementation has remained unanswered until now: How can enterprises integrate Circular Economy into their business strategy to leverage success? This book examines the topic of Circular Economy in an entrepreneurial context. It describes ten options for companies to retain value and identifies drivers and enablers for implementing Circular Economy in businesses. A survey among more than 500 industry experts revealed the extent to which retention options were implemented in practice. For the first time, relevant drivers and enablers for each retention option were identified. On top of this, case studies of successful circular market offerings shed light on each retention option in detail. The knowledge gained from research and the further shared experiences of experts that contributed to this book result in a 6-step management model. This model provides guidance on how to implement Circular Economy in organisations as an element of operational excellence and as a source of product service and business innovation. Now every enterprise can start the journey. As the survey and the cases show, Circular Economy is a promising way to the next level of company success. The book at hand will help organisations to develop their own individual approach that matches their business model. In short, you will find: First, comprehensive analysis of 10 retention options, their drivers and enablers; Survey of more than 500 companies; and in-depth case studies for each retention option. Practical research-based implementation model for companies.

Language Learning and Teaching in a Multilingual World Marie-Françoise Narcy-Combes, Jean-Paul Narcy-Combes, Julie McAllister, Malory Leclère, Grégory Miras, 2019-03-06 The majority of people around the world live in multilingual societies and so it follows that plurilingualism should be considered normal This book proposes a flexible and adaptive framework for designing and implementing language learning environments and tasks which will be useful for practitioners working in classrooms where many languages are already spoken The authors begin by presenting a state of the art review of current research on language learning language teaching and multilingual language acquisition This is followed by a qualitative review of 37 multilingual research projects which are treated as case studies to inform the practical guidance that constitutes the remainder of the book The information and practical framework contained within this book will be of interest to researchers teachers and teacher educators

Delivering Health Lydia Z. Dixon, 2020-11-15 Honorable Mention for the Association for Feminist Anthropology's Rosaldo Book Prize 2021 Maternal health outcomes are a key focus of global health initiatives In Delivering Health author Lydia Z Dixon uncovers the ways such outcomes have been shaped by broader historical political and social factors in Mexico through the perspectives of those who are at the front lines fighting for change midwives Midwives have long been marginalized in Mexico as remnants of the country's precolonial past yet Dixon shows how they are now strategically positioning themselves as agents of modernity and development Midwifery education programs have popped up across Mexico each with their own critique of the health care system and vision for how midwifery can help Delivering Health ethnographically examines three such schools with very different educational approaches and professional goals From San Miguel de Allende to Oaxaca to Michoacán and points between Dixon takes us into the classrooms clinics and conferences where questions of what it means to provide good reproductive health care are being taught challenged and implemented Through interviews observational data and even student artwork we are shown how underlying inequality manifests in poor care for many Mexican women The midwives in this book argue that they can improve care while also addressing this inequality Ultimately Delivering Health asks us to consider the possibility that marginalized actors like midwives may hold
