Who Translates Translator Subjectivities Beyond Reason:

Who Translates? Douglas Robinson, 2001-02-01 2001 CHOICE Outstanding Academic Title Translators have long claimed that their job is to step aside and let the source author speak through them In *Who Translates* Douglas Robinson uses this adage to set up a series of postcolonialist perspectives on translation all based on the recognition that translation has always been thought of in terms of the translator's surrender to forces beyond his or her rational control Exploring this theme Robinson examines Plato's Ion Philo Judaeus and Augustine on the Septuagint Paul on inspired interpreters Joseph Smith on the Book of Mormon and Schleiermacher Marx and Heidegger on translation He traces the imaginative and historical linkages between twentieth century conceptions of ideology and ancient conceptions of spirit channeling and the performative inversion of power relations by which the channel or translator comes to wield the source author as his or her tool And he argues throughout for a postcolonialist conception of translation based not on the translator's rational control of words and meanings but rather on a flowing through the translator of voices and textualities *Translationality* Douglas Robinson, 2017-05-18 This book defines translationality by weaving a number of sub and interdisciplinary interests through the medical humanities medicine in literature the translational history of medical literature a medical neuroscience approach to literary translation and translational hermeneutics and a humanities phenomenological performative approach to translational medicine It consists of three long essays the first on the traditional medicine in literature side of the medical humanities with a close look at a recent novel built around the Capgras delusion and other neurological misidentification disorders the second beginning with the traditional history of medicine side of the medical humanities but segueing into literary history translation history and translation theory the third on the social neuroscience of translational hermeneutics The conclusion links the discussion up with a humanistic performative phenomenological take on translational medicine

Marais, 2023-06-23 This book builds on Marais s innovative A Bio Semiotic Theory of Translation to explore the implications of this conceptualization of translation as the semiotic work from which social cultural reality emerges and chart the way forward for applications in empirical research The volume brings together some of the latest developments in biosemiotics social semiotics and Peircean semiotics with emergent work in translation studies towards better understanding the emergence of trajectories in society culture through semiotic processes The book further develops lines of thinking around thermodynamics in the work of Terrence Deacon to consider the ways in which ideas emerge from matter creating meaning and its opposites namely the ways in which ideas constrain matter Marais links these theoretical strands to empirical case studies in the final three chapters towards operationalizing these concepts for further empirical work This book is aimed at academics in the fields of translation studies semiotics multimodal multimedial studies cultural studies and development studies It will also be applicable to postgraduate students in these fields *A Jewish Life on Three Continents*, 2013-05-08
