Why Don't I Have a Daddy? George Anne Clay, 2008 As the little lion cub notices all different types of families he starts to question his own family His family consists of his mother and him The little cub learns that while there is no daddy in his family there is a donor lion who made his life possible Through his mother s love and nurturing the lion cub understands how special he and his family are This book winner of the Mom s Choice Silver Award for children s picture books presents the basic facts of anonymous donor conception in a simple but loving manner By reading this story with a child who was conceived through the help of an anonymous donor the child will start learning about and understanding his or her family and his or her origins just as the lion cub does in the story The delightful illustrations of various animals and their families make the subject accessible to small children It is a book you can share with your child over the years and with each reading your child will gain more insight and appreciation for his or her family for his or her own special story *Refiguring*

A Delicate Choreography David Sabeau, 2023-10-24 The origins of the incest taboo have puzzled many of the most influential minds of the West from Plutarch to St Augustine St Thomas Aquinas Martin Luther David Hume Lewis Henry Morgan Sigmund Freud Emile Durkheim Edward Westermarck and Claude Lévi Strauss This book puts the discussion of incest on a new foundation It is the first attempt to thoroughly examine the rich literature from philosophical theological and legal treatises to psychological and biological genetic studies to a wide variety of popular cultural media over a long period of time The book offers a detailed examination of discursive and figurative representations of incest during five selected periods from 1600 to the present The incest discussion for each period is complemented with a presentation of dominant kinship structures and changes without arguing for causal relations Part I deals with the legacy of ecclesiastical marriage prohibitions of the Middle

Agnes Historians dealing with the Reformation have wondered about the political and social implications of theological debates about the incest rules the Enlightenment opted for sociological considerations of the household and a new anthropology based on the passions Baroque discourse focused upon sexual relations among kin by marriage while Enlightenment and Romantic discussions worried the intimacy of siblings The first section of Part II deals with the six decades around 1900 during which European and American cultures obsessed about the sexuality of women Almost everyone concurred in the idea that mother made the family what it was that she configured the household kept the lines of kinship vibrant and stood at the threshold as stern gatekeeper and many thought that she managed these tasks through her sexuality and an eroticized relationship with sons Another story line taken up in the section Intermezzo this one about the physical and mental consequences of inbreeding appeared after 1850 To what extent do close kin marriages pose risks for progeny At its center lay the incest problematic now restated Is avoidance of kin genetically programmed Do all cultures know about risks of consanguinity As for the twenty first century evolutionary and genetic assumptions are challenged by a living world population containing roughly one billion offspring of cousin marriages Part III deals with one of the perhaps most remarkable reconfigurations of Western kinship in the aftermath of World War I The shift from an endogamous to an exogamous alliance system centered on the nuclear family An historical anomaly this family form began to dissolve almost as soon as it came together and in the process shifted the focus of incest concerns to a new pairing father and daughter By the 1970s when the father daughter problematic swept all other considerations of incest aside that relationship had come to be modeled for the most part around power and its abusive potential As for incest its representations in the last three decades of the twentieth century no longer focused on biologically damaged progeny but rather on power abuses in the nuclear family sexual abuse By the mid 1990s Western culture at least partly redirected its gaze away from father and daughter towards siblings especially towards brothers and sisters and the sexual boundaries and erotics of their relationships Correspondingly siblings became a model organism for psychotherapy evolutionary biology and the science of genetics

Roads to Family Rachel HS Ginocchio,2024-11-01 What makes a family The ties that bind a family

together can be complicated. People define family using genetics, legal commitments, physical and emotional connections, a combination of these or something else entirely. A person's family can expand, contract, and adapt over time. One of the most common changes in a family involves adding children. But exactly how those children become part of a family can be a journey full of twists and turns. *Roads to Family: All the Ways We Come to Be* provides readers with a roadmap of the many routes prospective parents can take to bring children into their lives. Public health educator Rachel Ginocchio goes beyond the basics of human reproduction to break down how intended parents use insemination, in vitro fertilization, donors, surrogacy, adoption, and more to grow their families. Accounts from real people with wide-ranging backgrounds and identities bring this compendium to life, highlighting the roadblocks and delights of their quest to build a family of their own. This informative and inclusive guide shines a spotlight on the beauty and complexity of what it means to be family. *Roads to Family* is a terrific book for humans of all ages to learn about the different ways families are created. By including stories from nearly every kind of family, this book expands the idea of family beyond typical clinical explanations and is a celebration of diversity.
