Why Governments Waste Natural Resources Policy Failures In Developing Countries:

Why Governments Waste Natural Resources William Ascher, 1999 Drawing on 16 case studies from Africa Asia and Latin America reveals the complex political and programmatic reasons why government officials in developing countries often willfully adopt wasteful natural resource policies The Palgrave Handbook of African Politics, Governance and Development Samuel Ojo Oloruntoba, Toyin Falola, 2017-10-10 This handbook constitutes a single collection of well researched articles and essays on African politics governance and development from the pre colonial through colonial to the post colonial eras Over the course of these interconnected periods African politics have evolved with varied experiences across different parts of the continent As politics is embedded both in the economy and the society Africa has witnessed some changes in politics economics demography and its relations with the world in ways that requires in depth analysis This work provides an opportunity for old and new scholars to engage in the universe of the debate around African politics governance and development and will serve as a ready reference material for students researchers policy makers and investors that are concerned with these issues Resource Politics in Sub-Saharan Africa Matthias Basedau, 2005 **Economic Development and Environmental Sustainability** Ramón López, Michael A. Toman, 2006-06-29 Economic growth as we know it today cannot persist indefinitely if it entails continuous degradation of natural resources and the environment While in a few countries around the world it appears that environmental degradation has been the result of rapid economic growth in the vast majority of the developing countries the environment has been equally spoiled despite slow or even negative economic growth This book provides new insights on the common roots of economic stagnation poverty and environmental degradation which unfortunately generally reside in misguided government policies and priorities By doing this the volume seeks to provide a broader policy option framework than those found in conventional policy analyses mainly dominated by the Washington Consensus It shows that a major omission of the conventional view is that governments tend to allocate government expenditures in a biased way favouring subsidies to the economic elites to the detriment of investments in public goods including human capital R D as well as the development of institutions environmental and otherwise which are vital for long run growth poverty reduction and environmental sustainability **Environmental Geopolitics** Shannon O'Lear, 2018-03-12 This thought provoking and clearly argued text provides a critical geopolitical lens for understanding global environment politics A subfield of political geography environmental geopolitics examines how environmental themes are used to support geopolitical arguments and physical realities of power and place Shannon O Lear considers common problematic traits of such familiar but widely misunderstood narratives about human environment relationships Mainstream themes about human environment relationships include narratives about presumed connections between human population trends and resource scarcity ways in which conflict and violence are linked to resource use or environmental degradation climate security and the application of science to solve environmental problems O Lear questions these narratives arguing

that the role or meaning of the environment is rarely specified humans role in these situations tends to be considered selectively and little attention is paid to spatial dimensions of human environment relationships She shows that how we tend to think about environmental concerns often obscure value judgments and constrain more dynamic approaches to human environment relationships Environmental geopolitics demonstrates how we can question familiar assumptions to generate more just and creative approaches to our many relationships with the environment Handbook on Trade and the Environment Kevin Gallagher,2010-01-01 Handbook on Trade and the Environment is a good source for those looking for a better understanding of political issues of legal debates and of the state of discussion between government industry NGO and private sector groups on topics that are not often treated elsewhere Judith M Dean World Trade Review I would recommend the book to anyone concerned with the interaction of trade and the environment John Goodier Reference Reviews In this comprehensive reference work Kevin Gallagher has compiled a fresh and broad ranging collection of expert voices commenting on the interdisciplinary field of trade and the environment For over two decades policymakers and scholars have been struggling to understand the relationship between international trade in a globalizing world and its effects on the natural environment The authors in this Handbook provide the tools to do just that The editor s well worked introduction synthesizes the emerging themes of the collection which is divided into three sections trade and environmental quality trade and environmental politics and trade and environmental policy Topics include the extent to which trade liberalization creates pollution havens where dirty industries flock to poorer countries with lax environmental standards and conversely how multinational corporations bring cleaner environmental technologies to developing countries when they choose to move abroad The volume also addresses the extent to which national environmental policy and or global environmental agreements clash with the emerging rules of the World Trade Organization and whether such environmental policies hinder export competitiveness Finally numerous political economy analyses of the complex political coalitions that arise to adapt to and mitigate changes in trade and environmental policy are provided In addition to broader overviews of the field in depth case studies of nations and regions are offered including the United States the European Union China India and Mexico as well East Asia Latin America and Africa The volume will serve as a guide for scholars new to the field as well as students and policy makers needing a quick reference to the research on the interface between trade and the environment

Capitalizing on Nature Edward B. Barbier,2011-09-08 The basic unit of nature the ecosystem is a special form of wealth which we can think of as a stock of natural capital However perhaps because this capital is free we have tended to view it as limitless abundant and always available for our use exploitation and conversion Capitalizing on Nature shows how modeling ecosystems as natural capital can help us to analyze the economic behavior that has led to the overuse of so much ecological wealth It explains how this concept of ecosystem as natural capital sheds light on a number of important issues including landscape conversion ecological restoration ecosystem resilience and collapse spatial benefits and payments for

ecosystem services The book concludes by focusing on major policy challenges that need to be overcome in order to avert the worsening problem of ecological scarcity and how we can fund novel financing mechanisms for global conservation The Politics of Deforestation in Africa Nadia Rabesahala Horning, 2018-04-24 This book explores how environmental policies are made and enforced in Africa Specifically this project explains the gap between intent and impact of forest policies focusing on three African societies facing persistent deforestation today Madagascar Tanzania and Uganda The central claim of the study is that deforestation persists because conservation policies and projects which are largely underwritten by foreign donors consistently ignore the fact that conservation is possible only under limited and specific conditions To make the case the author examines how decision making power is negotiated and exercised where communities make environmental decisions daily local level and where environmental policies are negotiated and enacted national level across three distinct African political systems **Conservation and Development in Cambodia** Sarah Milne, Sango Mahanty, 2015-02-11

Written by leading authorities from Australasia Europe and North America this book examines the dynamic conflicts and synergies between nature conservation and human development in contemporary Cambodia After suffering conflict and stagnation in the late twentieth century Cambodia has experienced an economic transformation in the last decade with growth averaging almost ten per cent per year partly through investment from China However this rush for development has been coupled with tremendous social and environmental change which although positive in some aspects has led to rising inequality and profound shifts in the condition ownership and management of natural resources High deforestation rates declining fish stocks biodiversity loss and alienation of indigenous and rural people from their land and traditional livelihoods are now matters of increasing local and international concern The book explores the social and political dimensions of these environmental changes in Cambodia and of efforts to intervene in and improve current trajectories for conservation and development It provides a compelling analysis of the connections between nature state and society pointing to the key role of grassroots and non state actors in shaping Cambodia's frontiers of change These insights will be of great interest to scholars of Southeast Asia and environment development issues in general *Global Environmental Challenges* James Gustave Speth, 2005 This book will change the way we understand the future of our planet It is both alarming and hopeful James Gustave Speth renowned as a visionary environmentalist leader warns that in spite of all the international negotiations and agreements of the past two decades efforts to protect Earth's environment are not succeeding Still he says the challenges are not insurmountable He offers environmental threats around the world The author explains why current approaches to critical global environmental problems Climate change biodiversity loss deterioration of marine environments deforestation water shortages and others don't work now and won't work in the future He provides a stinging critique of the failure of U.S. leadership and offers intriguing insights into why the U.S. has been able to address domestic environmental threats with some success while largely failing at the international level Setting forth eight specific steps to a sustainable future Speth

convincingly argues that dramatically different and far reaching actions by citizens and governments are now urgent If ever a book could be described as essential this is it **Physical Infrastructure Development** W. Ascher,C. Krupp,2010-05-24 This book addresses the key challenges of balancing economic growth poverty alleviation and environmental protection in the development of major physical infrastructure ranging from transport to energy **OECD Reviews of Regulatory Reform: Mexico 2004 Progress in Implementing Regulatory Reform** OECD,2004-11-04 This comprehensive review of Mexican regulatory policy outlines progress made by Mexico since the 1999 review conducted by the OECD and makes recommendations for further reforms aimed at promoting investment and boosting productivity and *Global Encounters* G. Harrison,2004-11-09 How has globalization impacted on development For Harrison the answer lies in the international political economy and the ways in which states have managed economic globalization from positions of strength or weakness Key themes emerge such as new geographies of development and the constant need for state economic action *Governing African Gold Mining* Ainsley Elbra,2016-10-31 This book takes a fresh approach to the puzzle of sub Saharan Africa s resource curse Moving beyond current scholarship s state centric approach it presents cutting edge evidence gathered through interviews with mining company executives and industry representatives to demonstrate that firms are actively controlling the regulation of the gold mining sector It shows how large mining firms with significant private authority in South Africa Ghana and Tanzania are able to engender rules and regulations that are acknowledged by other actors and in some cases even adopted by the state In doing so it establishes that firms are co governing Africa s gold mining sector By exploring the implications for resource cursed states this significant work argues that firm led regulation can improve governance but that many of these initiatives fail to address country mine specific issues where there remains a role for the state in ensuring the benefits of mining flow to local communities It will appeal to economists political scientists and policy makers and practitioners working in the field of mining and extractives **Red Sky at Morning** James Gustave Speth,2004-01-01 Presents an analysis of the worsening global environmental crisis citing ten contributors to environmental deterioration including affluence the American culture and its values population and poverty Timber Booms and Institutional Breakdown in Southeast Asia Michael L. Ross,2001-01-08 Scholars have long studied how institutions emerge and become stable But why do institutions sometimes break down In this book Michael L Ross explores the breakdown of the institutions that govern natural resource exports in developing states He shows that these institutions often break down when states receive positive trade shocks unanticipated windfalls Drawing on the theory of rent seeking he suggests that these institutions succumb to a problem he calls rent seizing the predatory behavior of politicians who seek to supply rent to others and who purposefully dismantle institutions that restrain them Using case studies of timber booms in Indonesia Malaysia and the Philippines he shows how windfalls tend to trigger rent seizing activities that may have disastrous consequences for state institutions and for the government of natural resources More generally he shows how institutions

can collapse when they have become endogenous to any rent seeking process *Resource Governance and Developmental States in the Global South* Jewellord Nem Singh, F. Bourgoignie, 2017-06-24 The political economy landscape has shifted as multinational corporations increase their investment efforts changing the geographies of extraction The contributors make the argument for the need of new theoretical perspectives anchored in critical political economy to address structural dynamics in the global industry **International Bibliography of Political Science** Compiled by the British Library of Political and Economic Science, 2000-02 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge on the social sciences Understanding the Policymaking Process in Developing Countries William Ascher, 2017-11-16 Understanding the Policymaking Process in Developing Countries provides a uniquely comprehensive and practical framework for development practitioners policymakers activists and students to diagnose and improve policy processes in developing countries across a wide range of issues Based on the classic policy sciences approach the book offers over 100 diagnostic indicators keyed to identify problems of policy processes policy content bureaucratic behavior stakeholder behavior and national subnational interactions This multi disciplinary framework is applied to a host of policy problems that particularly plague countries experiencing the under development syndrome including aborted programs and projects policy impasses distorted implementation unnecessary harm and conflict and shortsighted initiatives These points are illustrated through cases from Africa Asia and Latin America Based on the developing countries distinctive challenges the book also offers recommendations on improving policy content and institutions to address the typical limitations **Governing Africa's Forests in a Globalized World** Laura Anne German, Alain Karsenty, Anne Marie Tiani, 2009-12-01 Many countries around the world are engaged in decentralization processes and most African countries face serious problems with forest governance from benefits sharing to illegality and sustainable forest management This book summarizes experiences to date on the extent and nature of decentralization and its outcomes most of which suggest an underperformance of governance reforms and explores the viability of different governance instruments in the context of weak governance and expanding commercial pressures over forests Findings are grouped into two thematic areas decentralization livelihoods and sustainable forest management and international trade finance and forest sector governance reforms The authors examine diverse forces shaping the forest sector including the theory and practice of decentralization usurpation of authority corruption and illegality inequitable patterns of benefits capture and expansion of international trade in timber and carbon credits and discuss related outcomes on livelihoods forest condition and equity The book builds on earlier volumes exploring different dimensions of decentralization and perspectives from other world regions and distills dimensions of forest governance that are both unique to Africa and representative of broader global patterns The authors ground their analysis in relevant theory while drawing out implications of their findings for policy and practice
