Transmitter
Receiver

F-50 Includes:
W660-0067
W660-0076

Transmitter
Receiver

The F-40 and the F-50 transmitter units have been approved for use with most Wolf Steel gas fireplaces using a millivolt system.

The Receiver (W660-0076) can be installed in either the fireplace or be wall mounted depending on the application.

The F-40 provides on/off status, and the current room temperature as well as having a low battery indicator. It allows you to switch the fireplace on or off from anywhere in the room.

The F-50 is a thermostatically controlled transmitter that provides on/off status, displays room/set temperature as well as having a low battery indicator. These transmitter kits are tested and safe when installed in accordance with these instructions.

Modification of any part of this kit will void any warranty claims and could create a fire hazard.

RECEIVER INSTALLATION:

Turn off the electrical power and the gas supply to the fireplace. (Gas supply may need to be disconnected from the gas control valve.) Make sure the slide switch on the receiver is set to the OFF position.

1. Either disconnect or connect in parallel* with any other transmitter wiring from the valve. Attach the wires from terminal 1 (TPTH) and terminal 3 (TH) of the gas valve to the output terminals on the receiver.

INSTALLER: It may be advisable to connect a switch with short lengths of wire to minimize the resistance. This will allow the homeowner to continue to control the burner in the event of battery failure.

For all millivolt switch wiring, hook up the switch leads on terminals 1 and 3 of the gas valve.

WALL MOUNT:

2. Press the battery compartment slightly into the receiver and release enabling the battery compartment to pop out. Pull off the slide switch. Slide the receiver out of the fireplace mounting plate.

3. Using the screws provided secure the receiver and the face plate to an existing junction box.

4. Replace the slide switch. Place 4 AA batteries into the battery compartment and slide the compartment back into the receiver.

5. If the gas supply was disconnected at the valve, leak test using a soap and water solution. Turn electricity back on.

WALL MOUNT EXPLODED VIEW

WALL MOUNT UN-EXPLODED VIEW

FIREPLACE MOUNT:

For stove and insert models: do not install the receiver in the gas control valve compartment as this area becomes too hot. On stoves, it may be installed in or behind the pedestal; on inserts, it may be installed behind the flashings or a similar convenient location.

In a zero clearance model: the receiver may be installed in the gas control compartment.

2. Ensuring that the mounting location will allow for the battery compartment to slide out, secure the receiver to an appropriate location depending on the fireplace model using the screws provided and/or the adhesive pad.

3. If the gas supply was disconnected at the valve, leak test using a soap and water solution. Turn electricity back on.
