Buras, 2014-07-17 Charter schools have been promoted as an equitable and innovative solution to the problems plaguing urban schools Advocates claim that charter schools benefit working class students of color by offering them access to a portfolio of school choices In Charter Schools Race and Urban Space Kristen Buras presents a very different account Her case study of New Orleans where veteran teachers were fired en masse and the nation's first all charter school district was developed shows that such reform is less about the needs of racially oppressed communities and more about the production of an urban space economy in which white entrepreneurs capitalize on black children and neighborhoods In this revealing book Buras draws on critical theories of race political economy and space as well as a decade of research on the ground to expose the criminal dispossession of black teachers and students who have contributed to New Orleans culture and history Mapping federal state and local policy networks she shows how the city's landscape has been reshaped by a strategic venture to privatize public education She likewise chronicles grassroots efforts to defend historic schools and neighborhoods against this assault revealing a commitment to equity and place and articulating a vision of change that is sure to inspire heated debate among communities nationwide

After the Education Wars Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points the way to genuine reform Diane Ravitch author of *Reign of Error* and *The Death and Life of the Great American School System* A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools *New Orleans Parents' Guide to Public Schools* New Orleans Parent

**The Political Economy of Hurricane Katrina and Community Rebound** Emily Chamlee-Wright, Virgil Henry Storr, 2010-01-01 In 2005 Hurricane Katrina posed an unprecedented set of challenges to formal and informal systems of disaster response and recovery Informed by the Virginia School of Political Economy the contributors to this volume critically examine the public policy environment that led to both successes and failures in the post Katrina disaster response and long term recovery Building from this perspective this volume lends critical insight into the nature of the social coordination problems disasters present the potential for public policy to play a positive role and the inherent limitations policymakers face in overcoming the myriad challenges that are a product of catastrophic disaster Soon after Hurricane Katrina wreaked its havoc the Mercatus Center at George Mason University launched the Gulf Coast Recovery Project The project assembled a team of researchers to examine the capacity within political economic and civic life to foster robust response and recovery Building on both quantitative and qualitative analysis the contributors to this volume seek to understand the recovery process from the ground up from the perspective of first responders residents business owners non profit directors musicians teachers and school administrators and how ordinary citizens respond to the formal and informal rules of the post disaster policy context Personal political and poignant *The Political Economy of Hurricane Katrina and Community Rebound* will appeal to economists interested in the political economy of disaster and disaster recovery disaster specialists and general readers interested in the challenges those affected by Hurricane Katrina have faced and are facing and their prospects for recovering from the 2005

disaster      **Educational Delusions?** Gary Orfield, Erica Frankenberg, 2013-01-25 The first major battle over school choice came out of struggles over equalizing and integrating schools in the civil rights era when it became apparent that choice could be either a serious barrier or a significant tool for reaching these goals The second large and continuing movement for choice was part of the very different anti government individualistic market based movement of a more conservative period in which many of the lessons of that earlier period were forgotten though choice was once again presented as the answer to racial inequality This book brings civil rights back into the center of the debate and tries to move from doctrine to empirical research in exploring the many forms of choice and their very different consequences for equity in U S schools Leading researchers conclude that although helping minority children remains a central justification for choice proponents ignoring the essential civil rights dimensions of choice plans risks compounding rather than remedying racial inequality
