Why Calories Count From Science To Politics Marion Nestle:

Why Calories Count Marion Nestle, Malden Nesheim, 2012-04-18 Calories too few or too many are the source of health problems affecting billions of people in today's globalized world. Although calories are essential to human health and survival, they cannot be seen, smelled, or tasted. They are also hard to understand. In *Why Calories Count*, Marion Nestle and Malden Nesheim explain in clear and accessible language what calories are and how they work both biologically and politically. As they take readers through the issues that are fundamental to our understanding of diet and food weight gain, loss, and obesity, Nestle and Nesheim sort through a great deal of the misinformation put forth by food manufacturers and diet program promoters. They elucidate the political stakes and show how federal and corporate policies have come together to create an "eat more" environment. Finally, having armed readers with the necessary information to interpret food labels, evaluate diet claims, and understand evidence as presented in popular media, the authors offer some candid advice: Get organized. Eat less. Eat better. Move more. Get political.

How the Other Half Ate Katherine Leonard Turner, 2014-01-10 In the late nineteenth and early twentieth centuries, working-class Americans had eating habits that were distinctly shaped by jobs, families, neighborhoods, and the tools, utilities, and size of their kitchens, along with their cultural heritage. *How the Other Half Ate* is a deep exploration by historian and lecturer Katherine Turner that delivers an unprecedented and thoroughly researched study of the changing food landscape in American working-class families from industrialization through the 1950s. Relevant to readers across a range of disciplines—history, economics, sociology, urban studies, women's studies, and food studies—this work fills an important gap in historical literature by illustrating how families experienced food and cooking during the so-called age of abundance. Turner delivers an engaging portrait that shows how America's working class, in a multitude of ways, has shaped the foods we eat today.

Curried Cultures Krishnendu Ray, Tulasi Srinivas, 2012-05 Although South Asian cookery and gastronomy has transformed contemporary urban foodscapes all over the world, social scientists have paid scant attention to this phenomenon. *Curried Cultures*, a wide-ranging collection of essays, explores the relationship between globalization and South Asia through food, covering the cuisine of the colonial period to the contemporary era, investigating its material and symbolic meanings. *Curried Cultures* challenges disciplinary

boundaries in considering South Asian gastronomy by assuming a proximity to dishes and diets that is often missing when food is a lens to investigate other topics The book's established scholarly contributors examine food to comment on a range of cultural activities as they argue that the practice of cooking and eating matter as an important way of knowing the world and acting on it

Food and Power Nir Avieli, 2018 Drawing on ethnography conducted in Israel since the late 1990s Food and Power considers how power is produced reproduced negotiated and subverted in the contemporary Israeli culinary sphere Nir Avieli explores issues such as the definition of Israeli cuisine the ownership of hummus the privatization of communal Kibbutz dining rooms and food at a military prison for Palestinian detainees to show how cooking and eating create ambivalence concerning questions of strength and weakness and how power and victimization are mixed into a sense of self justification that maintains internal cohesion among Israeli Jews

The Scarcity Slot Amanda L. Logan, 2020-12-08 A free open access ebook is available upon publication Learn more at www.luminosoa.org The Scarcity Slot is the first book to critically examine food security in Africa's deep past Amanda L Logan argues that African foodways have been viewed through the lens of the scarcity slot a kind of Othering based on presumed differences in resources Weaving together archaeological historical and environmental data with food ethnography she advances a new approach to building long term histories of food security on the continent in order to combat these stereotypes Focusing on a case study in Banda Ghana that spans the past six centuries The Scarcity Slot reveals that people thrived during a severe centuries long drought just as Europeans arrived on the coast with a major decline in food security emerging only recently This narrative radically challenges how we think about African foodways in the past with major implications for the future

Inside the California Food Revolution Joyce Goldstein, 2013-09-06 In this authoritative and immensely readable insider's account celebrated cookbook author and former chef Joyce Goldstein traces the development of California cuisine from its formative years in the 1970s to 2000 when farm to table foraging and fusion cooking had become part of the national vocabulary Interviews with almost two hundred chefs purveyors artisans winemakers and food writers bring to life an approach to cooking grounded in passion bold innovation and a dedication to flavor first Goldstein explains how the counterculture movement in the West gave rise to a restaurant culture characterized by open kitchens women in leadership positions and a surprising number of chefs and artisanal food producers who lacked formal training The new cuisine challenged the conventional kitchen hierarchy and French dominance in fine dining leading to a more egalitarian and informal food scene In weaving Goldstein's views on California food culture with profiles of those who played a part in its development from Alice Waters to Bill Niman to

Feeding the Crisis Maggie Dickinson,2019-11-19 The Supplemental Nutrition Assistance Program SNAP formerly known as food stamps is one of the most controversial forms of social welfare in the United States Although it is commonly believed that such federal programs have been cut back since the 1980s Maggie Dickinson charts the dramatic expansion and reformulation of the food safety net in the twenty first century Today receiving SNAP benefits is often tied to work requirements which essentially subsidizes low wage jobs Excluded populations such as the unemployed informally employed workers and undocumented immigrants must rely on charity to survive Feeding the Crisis tells the story of eight families as they navigate the terrain of an expanding network of food assistance programs in which care and abandonment work hand in hand to regulate people on the social and economic margins Amid calls at the federal level to expand work requirements for food assistance Dickinson shows us how such ideas are bad policy that fail to adequately address hunger in America Feeding the Crisis brings the voices of food insecure families into national debates about welfare policy offering fresh insights into how we can establish a right to food in the United States

Bitter and Sweet Ellen Oxfeld,2017-05-23 Less than a half century ago China experienced a cataclysmic famine which was particularly devastating in the countryside As a result older people in rural areas have experienced in their lifetimes both extreme deprivation and relative abundance of food Young people on the other hand have a different relationship to food Many young rural Chinese are migrating to rapidly industrializing cities for work leaving behind backbreaking labor but also a connection to food through agriculture Bitter and Sweet examines the role of food in one rural Chinese community as it has shaped everyday lives over the course of several tumultuous decades In her superb ethnographic accounts Ellen Oxfeld compels us to reexamine some of the dominant frameworks that have permeated recent scholarship on contemporary China and that describe increasing dislocation and individualism and a lack of moral centeredness By using food as a lens she shows a more complex picture where

The Labor of Lunch Jennifer E. Gaddis,2019-11-12 There s a problem with school lunch in America Big Food companies have largely replaced the nation s school cooks by supplying cafeterias with cheap precooked hamburger patties and chicken nuggets chock full of industrial fillers Yet it s no secret that meals cooked from scratch with nutritious locally sourced ingredients are better for children workers and the environment So why not empower lunch ladies to do more than just unbox and reheat factory made food And why not organize together to make healthy ethically sourced free school lunches a reality for all children The Labor of Lunch aims to spark a progressive movement that will transform

food in American schools and with it the lives of thousands of low paid cafeteria workers and the millions of children they feed By providing a feminist history of the US National School Lunch Program Jennifer E Gaddis recasts the humble school lunch as an important and often overlooked form of public care Through vivid narration and moral heft *The Labor of Lunch* offers a stirring call to action and a blueprint for school lunch reforms capable of delivering a healthier more equitable caring and sustainable future
