Why Evolution Works And Creationism Fails:

Why Evolution Works (and Creationism Fails) Matt Young, Paul Strode, 2009-05-15 Why Evolution Works and Creationism Fails is an impassioned argument in favor of science primarily the theory of evolution and against creationism Why impassioned Should not scientists be dispassionate in their work Perhaps write the authors but it is impossible to remain neutral when our most successful scientific theories are under attack for religious and other reasons by laypeople and even some scientists who willfully distort scientific findings and use them for their own purposes Focusing on what other books omit how science works and how pseudoscience works Matt Young and Paul K Strode demonstrate the futility of scientific creationism They debunk the notion of intelligent design and other arguments that show evolution could not have produced life in its present form Concluding with a frank discussion of science and religion Why Evolution Works and Creationism Fails argues that science by no means excludes religion though it ought to cast doubt on certain religious claims that are contrary to known scientific fact Evolution or Creation? Albert DeBenedictis, 2014-04-02 This book is designed to share the research on the origins of the universe and the origins of life with those who are truly interested in making their decisions regarding origins as well as those who are simply curious about opposing views *The Case Against Theism* Raphael Lataster, 2018-06-14 This monograph offers a critique of arguments for the existence of a specifically Christian God advanced by prominent scholar William Lane Craig The discussion incorporates philosophical mathematical scientific historical and sociological approaches The author does not seek to criticize religion in general or Christianity specifically Rather he examines the modern and relatively sophisticated evidential case for Christian theism Scholars have been arguing for theism or naturalism for centuries and there seems little to add to the discussion especially from the theistic side However to assume that either theism or naturalism obtains is a false dichotomy There are alternatives to both that merit consideration Employing a probabilistic approach the author advances this discussion His work uniquely utilizes not only naturalistic hypotheses to argue against theism It also presents supernaturalistic hypotheses This leaves no question that theism is almost certainly false even if some form of divine reality exists This project seeks not to argue that Christianity or any other faith or religion is undesirable but only to critically examine evidentialist claims posited by Christianity's learned apologists In fact a major secondary aim is to consider alternative god conceptions such as polytheism and pantheism This work aims to highlight that Christian theism is often granted special privileges by theistic philosophers of religion which seems doubly inappropriate when certain alternative god conceptions may even prove to be more plausible **Skeptical Bob** Moores, 2011-11-14 In Skeptical author Bob Moores describes his atheistic humanistic philosophy and traces its roots back to early childhood epiphanies where he first began to question certain axiological teachings He argues against creationism and religious fundamentalism and defends scientific naturalism critical thinking and a rational approach to understanding the world Moores attempts to show readers how recent scientific discoveries especially in biology are more exciting and uplifting

than any form of biblical mythology Using lay terms he explains the significance of DNA and why a scientific theory is more than just a guess He argues that modern humanistic values are superior in many ways to those venerated in ancient texts and he shares his belief that humans are both the greatest threat and greatest hope for the preservation of life on Earth Moores hopes that Skeptical will challenge readers to consider views and information that may conflict with their comfort zones allowing them to broaden their perspectives He argues that if we are too protective of our own paradigms if we stubbornly believe that our way is the only way then the tribes of earth will never come together to solve the most urgent need of all our continued existence Creation Or Evolution?
