Open-Access, Multimodality, and Writing Center Studies Elisabeth H. Buck, 2017-11-16 The disciplinary triad of open access multimodality and writing center studies presents a timely critical lens for discussing academic publishing in a moment of crucible change where rapid technological advancements force scholars and institutions to question what is produced and counts as academic writing Using historiographic quantitative and qualitative analysis Open Access Multimodality and Writing Center Studies sees writing center scholarship as a microcosm of many of the larger issues at play in the contemporary academic publishing landscape This case study approach reveals the complex imbricated ways that questions about publishing manifest both within the content of journals and as related to academics' perceptions as signifiers of disciplinary visibility identity and transformation More than just reaffirming the conventional wisdom about these changes in publishing that these shifts are happening and we do not always know how to pinpoint them Open Access Multimodality and Writing Center Studies suggests that scholars in all fields compositionists and writing center practitioners be conscious of the ways they are complicit in maintaining barriers to accessibility and innovation Chapter 5 of this book is available open access under a CC BY 4.0 license at link.springer.com

[The Oxford Guide for Writing Tutors](#) Melissa Ianetta, Lauren Fitzgerald, 2016 The *Oxford Guide for Writing Tutors* introduces two conversations to the tutor's preparation one about the creation of knowledge in writing programs the other about tutor research This approach to tutor training provides several benefits First it allows tutors to test their theories of what might work in a writing center session and helps them to move professional conversation towards why such things happen They bridge the theory-practice divide that often frustrates both novices and experienced tutors By conducting research to answer such questions tutors can help themselves the writers with whom they work their fellow tutors and the writers with whom they work And further this approach gives the reader new methods for appreciating and critiquing scholarly work making it

easier to understand the best ways to help writers and to move the field forward As writing tutoring programs take on a variety of forms and pursue a range of missions this book aims to create a flexible text whose contents can be easily rearranged to support a broad spectrum of reader needs Each chapter accordingly can be read independently the text does not rely on a sequential reading to create meaning The book also includes intra textual and extra textual references for the reader who wants to inquire further That is throughout the book are references to material in other chapters that might be of interest to the reader intrigued by the topic at hand So too in each chapter we include references to and citations of the scholarship that supports much of the common knowledge of the field including in the Handbook both previous tutor education textbooks and research from the field The aim is to aid the interested reader s inquiry into the scholarship of the field as well as to ground advice about practice in research that testifies to the effectiveness a range of tutoring practices Much of the scholarship cited throughout the book is authored by undergraduate tutor researchers as well as several former tutors who were graduate students when they published their articles This crucial aspect best models the ways in which tutors themselves can bring together practice and research in their day to day work and in their informed thinking about this work Including tutor voices is an important tradition of the tutor education textbook because these are voices that speak to the issues concerning tutors in a range of institutions and programs across the country
