Wissenschaftliche Forschung in Österreich 1800–1900 Christine Ottner, Gerhard Holzer, Petra Svatek, 2015-06-17 This volume endeavours to describe and comparatively discuss the formation of academic disciplines in Austria through their concrete research practice focussing on the examples of music research art history geography geology ancient history and archaeology oriental studies and historical research Some of these disciplines deal with historical processes some lie on the boundary between humanities and the natural sciences This interdisciplinary approach seeks to make a contribution to research on 19th century Austrian scientific practice that has also significantly shaped today's research landscape

Science in the Metropolis Mitchell G. Ash, 2020-10-26 This book presents new research on spaces for science and processes of interurban and transnational knowledge transfer and exchange in the imperial metropolis of Vienna in the late nineteenth and early twentieth centuries Chapters discuss Habsburg science policy metropolitan natural history museums large technical projects including the Ringstrasse and water pipelines from the Alps urban geology geography public reports on polar exploration exchanges of ethnographic objects popular scientific societies and scientifically oriented adult education The infrastructures and knowledge spaces described here were preconditions for the explosion of creativity known as Vienna 1900

The Routledge Companion to Applied Musicology Chris Dromey, 2023-09-19 The Routledge Companion to Applied Musicology brings together academics artist researchers and practitioners to provide readers with an extensive and authoritative overview of applied musicology Once a field that addressed music's socio political or performative contexts applied musicology today encompasses study and practice in areas as diverse as psychology ecomusicology organology forensic musicology music therapy health and well being and other public oriented musicologies These rapid advances have created a fast changing field whose scholarship and activities tend to take place in isolation from each other This volume addresses that shortcoming bringing together a wide ranging survey of current approaches Featuring 39 authors The Routledge Companion to Applied Musicology falls into five parts Defining and Theorising Applied Musicology Public Engagement New Approaches and Research Methods Representation and Inclusion and Musicology in for Performance that chronicle the subject's rich history and consider the connections that will characterise its future The book offers an essential resource for anyone exploring applied musicology

Tone Psychology: Volume I Carl Stumpf, 2019-09-17 Carl Stumpf 1848 1936 was a German philosopher and psychologist and a visionary and important academic During his lifetime he ranked among the most prominent scientists of his time Stumpf's intention as evident in his book Tone Psychology was to investigate the phenomenon of tone sensation in order to understand the general psychic functions and processes underlying the perception of sound and music It could be argued that modern music psychology has lost or perhaps ignored the epistemological basis that Carl Stumpf developed in his Tone Psychology To gain a confident psychological basis the relevance of Stumpf's deliberations on music psychology cannot be overestimated Analyses of the essence of tones complex

tones and sounds are fundamental topics for general psychology and epistemology By the end of this two volume work Stumpf had established an epistemology of hearing The subject of Volume I is the sensation of successive single tones Stumpf demonstrates that analysis leads to the realisation of a plurality is there only one tone or are there several tones which is then followed by a comparison an increase may be observed one tone is higher than the other or a similarity may be realised both tones have the same pitch or the same loudness With almost mathematical stringency Stumpf developed a topology of tones Volume II deals with the sensation of two simultaneous tones musical intervals The books are stimulating rewarding and provocative and will appeal to music psychologists music theorists general psychologists philosophers epistemologists and neuroscientists

The Routledge Companion to Historical Theory Chiel van den Akker, 2021-11-15 This Companion provides a wide ranging and up to date overview of the conceptual issues that history as a discipline and mode of thought gives rise to The book offers both historical and systematic treatments of these issues as well as addressing their contemporary relevance Structured in three parts Modes and Schools of Historical Thought Epistemology and Metaphysics of History and Issues and Challenges in Historical Theory it offers the reader a wide scope and expert treatment of each topic in this vibrant field that can be read in any order An international team of experts both discuss the basis of their topic and present their own view offering the reader a cutting edge contribution while ensuring their chapters are of interest to both students and specialists in the field of historical theory and engaging with the very nature of historical thought the metaphysics of historical existence the politics of history writing and the intelligibility of the historical process The volume is an indispensable companion to the study of history and essential reading for anyone interested in the reflection on the nature of history and our historical existence

Writing the History of the Humanities Herman Paul, 2022-11-17 Choice Outstanding Academic Title 2023 What are the humanities As the cluster of disciplines historically grouped together as humanities has grown and diversified to include media studies and digital studies alongside philosophy art history and musicology to name a few the need to clearly define the field is pertinent Herman Paul leads a stellar line up of esteemed and early career scholars to provide an overview of the themes questions and methods that are central to current research on the history of the nineteenth and twentieth century humanities This exciting addition to the successful Writing History series will draw from a wide range of case studies from diverse fields as classical philology art history and Biblical studies to provide a state of the art overview of the field In doing so this ground breaking book challenges the rigid distinctions between disciplines and show the variety of prisms through which historians of the humanities study the past

Vorbereitung auf die 75. Jahrestagung der Johannes Gutenberg Universität Mainz hat der Forschungsverbund Universitätsgeschichte Wissenschaftlerinnen und Wissenschaftler aus Deutschland, Österreich und der Schweiz versammelt. Dieser Band präsentiert die Ergebnisse dieser Zusammenkunft. Im Zentrum stehen die Fragen nach dem Forschungsgegenstand der neueren Universitätsgeschichte sowie nach Methoden und Zugängen zur Erforschung der Universitätsgeschichte nach 1945. Ergänzt um einen Beitrag zur Universitätsgeschichte der DDR wird dabei der aktuelle Forschungsstand beleuchtet. Zwei Einzelbeispiele vermitteln schließlich den Umgang von Universitäten mit ihrer jüngeren Geschichte. In preparation of the 75th anniversary of the Johannes Gutenberg University Mainz the Research Alliance for the university history gathered scholars from Germany, Austria and Switzerland. This volume presents the proceedings of this meeting. The volume focuses on the recent history of the university as a field of research as well as methods to explore the history of the university after 1945. A contribution on the history of the university in the German Democratic Republic (GDR) highlights the current state of research. Two examples convey how universities cope with their recent history.
