Thinking Like A Plant A Living Science For Life:

Thinking Like a Plant Craig Holdrege, 2013-10-15 Who would imagine that plants can become master teachers of a radical new way of seeing and interacting with the world Plants are dynamic and resilient living in intimate connection with their environment This book presents an organic way of knowing modeled after the way plants live When we slow down turn our attention to plants study them carefully and consciously internalize the way they live a transformation begins Our thinking becomes more fluid and dynamic we realize how we are embedded in the world we become sensitive and responsive to the contexts we meet and we learn to thrive within a changing world These are the qualities our culture needs in order to develop a more sustainable life supporting relation to our environment While it is easy to talk about new paradigms and to critique our current state of affairs it is not so easy to move beyond the status quo That s why this book is crafted as a practical guide to developing a life infused way of interacting with the world Right Research Geoffrey Rockwell, Oliver Rossier, Chelsea Miya, 2021-04-29 The book is current and interdisciplinary engaging with recent developments around this topic and including perspectives from sciences arts and humanities It will be a welcome contribution to studies of the Anthropocene as well as studies of research methods and practices Sam Mickey University of S Francisco Educational institutions play an instrumental role in social and political change and are responsible for the environmental and social ethics of their institutional practices The essays in this volume critically examine scholarly research practices in the age of the Anthropocene and ask what accountability educators and researchers have in righting their relationship to the environment The volume further calls attention to the geographical financial legal and political barriers that might limit scholarly dialogue by excluding researchers from participating in traditional modes of scholarly conversation As such Right Research is a bold invitation to the academic community to rigorous self reflection on what their research looks like how it is conducted and how it might be developed so as to increase accessibility and sustainability and decrease carbon footprint The volume follows a three part structure that bridges conceptual and practical concerns the first section challenges our assumptions about how sustainability is defined measured and practiced the second section showcases artist researchers whose work engages with the impact of humans on our environment while the third section investigates how academic spaces can model eco conscious behaviour This timely volume responds to an increased demand for environmentally sustainable research and is outstanding not only in its interdisciplinarity but its embrace of non traditional formats spanning academic articles creative acts personal reflections and dialogues Right Research will be a valuable resource for educators and researchers interested in developing and hybridizing their scholarly communication formats in the face of the current climate crisis *This Sacred Life* Norman Wirzba, 2021-10-14 This Sacred Life redescribes the meaning of this world and the value and purpose of human life within it The Business of Botanicals Ann Armbrrecht, 2021-02-25 From tulsi to turmeric echinacea to elderberry medicinal herbs are big business but do they deliver on their healing promise to those who consume

them those who provide them and the natural world An eye opener Armbrecht challenges ideas of what medicine can be and how business practices can corrupt and expand our notions of plant based healing The Boston Globe So deeply honest sincere heartfelt questioning and brilliant The Business of Botanicals is an amazing book that plunges in and takes a deepening look at those places where people don't often venture Rosemary Gladstar author of Rosemary Gladstar's Medicinal Herbs For those who loved Braiding Sweetgrass this book is a perfect opportunity to go deeper into understanding the complex and co evolutionary journey of plants and people Angela McElwee former president and CEO of Gaia Herbs Using herbal medicines to heal the body is an ancient practice but in the twenty first century it is also a worldwide industry Yet most consumers know very little about where those herbs come from and how they are processed into the many products that fill store shelves In The Business of Botanicals author Ann Armbrecht follows their journey from seed to shelf revealing the inner workings of a complicated industry and raises questions about the ethical and ecological issues of mass production of medicines derived from these healing plants many of which are imperiled in the wild This is the first book to explore the interconnected web of the global herb industry and its many stakeholders and is an invaluable resource for conscious consumers who want to better understand the social and environmental impacts of the products they buy Armbrecht masterfully manages the challenges and complexity of her source material She is a spirited storyteller and presents all this with the skill of an anthropologist and the heart of an herbalist Journal of the American Herbalists Guild

Subtle Agroecologies Julia Wright, 2021-06-29 This book is about the invisible or subtle nature of food and farming and also about the nature of existence Everything that we know and do not know about the physical world has a subtle counterpart which has been scarcely considered in modernist farming practice and research If you think this book isn't for you if it appears more

important to attend to the pressing physical challenges the world is facing before having the luxury of turning to such subtleties then think again For it could be precisely this worldview the one prioritises the physical material dimension of reality that helped get us into this situation in the first place Perhaps we need a different worldview to get us out This book makes a foundational contribution to the discipline of Subtle Agroecologies a nexus of indigenous epistemologies multidisciplinary advances in wave based and ethereal studies and the science of sustainable agriculture Not a farming system in itself Subtle Agroecologies superimposes a non material dimension upon existing materially based agroecological farming systems Bringing together 43 authors from 12 countries and five continents from the natural and social sciences as well as the arts and humanities this multi contributed book introduces the discipline explaining its relevance and potential contribution to the field of Agroecology Research into Subtle Agroecologies may be described as the systematic study of the nature of the invisible world as it relates to the practice of agriculture and to do this through adapting and innovating with research methods in particular with those of a more embodied nature with the overall purpose of bringing and maintaining balance and harmony Such research is an open minded inquiry its grounding being the lived experiences of humans working on and with the land over several thousand years to the present By reclaiming and reinterpreting the perennial relationship between humans and nature the implications would revolutionise agriculture heralding a new wave of more sustainable farming techniques changing our whole relationship with nature to one of real collaboration rather than control and ultimately transforming ourselves

Future Sacred Julie J. Morley, 2019-02-12 Reveals how our survival depends on embracing complexity consciousness and relating to nature and all life as sacred Rejects the survival of the fittest narrative in favor of sacred symbiosis creative cooperation interdependence and complex thinking Provides examples from complexity studies cultural history philosophy indigenous spirituality biomimicry and ecology to show how nature s intelligence and creativity abound everywhere Documents how indigenous cultures lived in relative harmony with nature because they perceived themselves as part of the ordered whole of all life In Future Sacred Julie J Morley offers a new perspective on the human connection to the cosmos by unveiling the connected creativity and sacred intelligence of nature She rejects the survival of the fittest narrative the idea that survival requires strife and offers symbiosis and cooperation as nature s path forward She shows how an increasingly complex world demands increasingly complex consciousness Our survival depends upon embracing complexity consciousness understanding ourselves as part of nature as well as relating to nature as sacred Morley begins by documenting how indigenous cultures lived in relative harmony with nature because they perceived themselves as part of the ordered whole of all life until modernity introduced dualistic thinking thus separating mind from matter and humans from nature The author deconstructs the fallacy behind social and neo Darwinism and the materialist theories of dead matter versus those that offer a connection with the sentient mind of nature She presents evidence from complexity studies cultural history philosophy indigenous spirituality biomimicry and ecology highlighting the idea that

nature's intelligence and creativity abound everywhere from cells to cetaceans from hydrogen to humans from sunflowers to solar panels and that all sentient beings contribute to the evolution of life as a whole working together in sacred symbiosis Morley concludes that our sacred future depends on compassionately understanding and integrating multiple intelligences seeing relationships and interdependence as fundamental and sacred as well as honoring the experiences of all sentient beings Instead of mastery over nature we must shift toward synergy with nature and with each other as diverse expressions of nature's creativity

Holonomics Simon Robinson, 2014-05-22 Businesses around the world are facing rapidly changing economic and social situations Business leaders and managers must be ready to respond and adapt in new innovative ways The authors of this groundbreaking book argue that business people must adopt a holonomic way of thinking a dynamic and authentic understanding of the relationships within a business system and an appreciation of the whole Complexity and chaos are not to be feared but rather are the foundation of successful business structures and economic Holonomi presents a new world view where economic and ecology are in harmony Using real world case studies and practical exercises the authors guide the reader in a new holistic approach to business towards a more sustainable future where both people and planet matter

First Steps to Seeing Emma Kidd, 2015-06-18 In the twenty first century we are confronted with a rapidly changing world full of social economic and environmental uncertainties We are all inherently connected to this changing world and in order to create the best possible conditions for life to thrive we must each develop an inner capacity to respond and adapt to life in new creative and innovative ways The author of this visionary book argues that the path to a happy healthy and peaceful world begins with the individual By learning to recognise our cognitive habits of interrupting and defining life through our fixed ideas labels and judgements we can begin to develop a dynamic way of seeing that enables us to perceive and respond to life with greater attentiveness First Steps in Seeing reveals a practical set of stepping stones that guide the reader into this dynamic way of seeing and relating Using personal stories practical exercises and real world case studies in development education and business the author takes the reader on a journey to explore how to give our full attention to life and how to enliven the world that we each co create An inspiring guide for all those working for social change in youth work business education or research or simply seeking fresh paths in life

The Figure of Christ in the Long Nineteenth Century Elizabeth Ludlow, 2020-07-17 This book is an interdisciplinary collection of essays that explores the variety of ways in which the interface between understanding the figure of Christ the place of the cross and the contours of lived experience was articulated through the long nineteenth century Collectively the chapters respond to the theological turn in postmodern thought by asking vital questions about the way in which representations of Christ shape understandings of personhood and of the divine

Critical Sustainability Sciences Stephan Rist, Patrick Bottazzi, Johanna Jacobi, 2023-08-02 This book explores Critical Sustainability Sciences a new field of scientific inquiry into sustainability issues It builds on a highly novel integration of elements from relational ontologies critical theory political ecology and intercultural philosophy in

support of emancipatory perspectives on sustainability and development The book begins by uncovering the weaknesses of mainstream sustainability science and debates on sustainable development The new field of Critical Sustainability Sciences has grown out of a deep engagement with relational ontologies which helps to overcome the dualist ontology underlying mainstream notions of sustainability and development Dualist ontologies reinforce problematic anthropocentric divisions for example between humans and nature subjects and objects mind and matter body and soul etc Examples from indigenous peoples in Bolivia India and Ghana as well as integrative movements in Chile Brazil and Europe show that relational conceptions of life rooted in ecosophy and cosmosophy can provide an intercultural philosophical foundation for Critical Sustainability Sciences The book concludes by describing three key topics for exploration in Critical Sustainability Sciences societal reorganization in view of emancipatory existential and cognitive self determination living labor and commons and the development of new comprehensive relational scientific paradigms This book will be of great interest to students scholars and practitioners of emancipatory and intercultural approaches to sustainability and development

Terra Invicta Adrian Ivakhiv, 2025-12-18 The Russian invasion of Ukraine in February 2022 produced not only military and humanitarian responses but also scholarly and artistic ones from Ukrainians looking to the future of their country Terra Invicta is a series of critical and creative articulations of pasts presents and possible futures involving humans and the more than human world Contributors suggest that Ukraine is caught in an environmental war waged by a fossil fuel superpower against people who are prepared to lay down their lives to protect their land This volume explores the relationship between Ukrainians a multiethnic and multireligious people with a complicated history and the Ukrainian land the zemlia to which they belong Themes include decoloniality ecocultural identity the politics of reconstruction and artistic responsibility amid a war for national survival Chapters emphasize the value of reviving multispecies relations with the land positively transforming multicultural relations with history and reinvigorating grassroots engagements with the state and society Terra Invicta grapples with the role of artistic expression in the face of war and collective loss and what it means to commit to a place a land a territory in a world set in constant motion

Properties of Life Bernd Rosslenbroich, 2023-09-19 A coherent and comprehensive theory of life that synthesizes the specific properties of living organisms Despite continued advances science has until now struggled to describe the specific properties that define a living being By synthesizing several aspects of organismic biology and contemporary science Properties of Life by Bernd Rosslenbroich generates a coherent concept of the singular quality of being alive a concept that provides a crucial foundation for scientists farmers and medical practitioners and helps explain how we all interact with the world around us and within ourselves Is an organism an aggregate of parts or an integrated system with agency Is it a passive stimulus response machine or a being equipped with subjectivity and consciousness Rosslenbroich argues that the way people in different fields understand life determines their assumptions about organic function and behavior In medicine this extends to the human organism which influences prevention diagnosis

and treatment Drawing attention to a long standing but underappreciated line of thought in organismic biology Rosslenbroich s original idea emphasizes the autonomy of living processes their network characteristics and their self determined organization in time and structure A timely and revelatory book Properties of Life formulates an integrated unified theory that remains flexible enough to accommodate future developments and resilient enough to withstand the challenges of different theoretical and disciplinary backgrounds The Sounds of Life Karen Bakker,2024-03-12 When we think of animal sounds we tend to think about birds or other highly sonic animals However scientists are learning that a much wider range of animals and even plants use sound and they are figuring this out with the help of AI and other digital technologies This book tells the stories of scientists who are using these digital technologies to decode the hidden world of nonhuman sound The author shows how digital technology so often associated with our alienation from nature is offering an opportunity to listen to plants and animals in powerful ways changing our understanding of nonhuman communication and reviving our connection to the natural world This book is a story of discovery Early chapters describe early 20th century discoveries about whale noise while subsequent chapters describe how digital technologies have revealed the surprising sonic worlds of elephants turtles corals and plants Through these stories we learn that many more plants and animals can make and sense sound and that these sounds are linked to complex communication and social behavior But as we learn this science is not merely about listening to nature in new ways it also creates new possibilities for both conservation and interspecies communication In the book s later chapters the author describes fascinating breakthroughs aided by robotics and AI that may enable people to communicate with other species She ends the book by exploring how conservationists are using bioacoustics to protect endangered species address the threat of noise pollution and create innovative responses to biodiversity loss and climate change Throughout the book the author describes the research of a diverse range of scientists with a particular emphasis on female and indigenous scientists And while she ultimately champions the potential of digital technology she is not naive to its limitations and is careful throughout to highlight the limits of technology Ultimately we see that bioacoustics aided by digital tech offers humanity a powerful window into the nonhuman world **Aesop's**

Anthropology John Hartigan Jr.,2014-10-30 Aesop s Anthropology is a guide for thinking through the perplexing predicaments and encounters that arise as the line between human and nonhuman shifts in modern life Recognizing that culture is not unique to humans John Hartigan Jr asks what we can learn about culture from other species He pursues a variety of philosophical and scientific ideas about what it means to be social using cultural dynamics to rethink what we assume makes humans special and different from other forms of life Through an interlinked series of brief essays Hartigan explores how we can think differently about being human Forerunners Ideas First is a thought in process series of breakthrough digital publications Written between fresh ideas and finished books Forerunners draws on scholarly work initiated in notable blogs social media conference plenaries journal articles and the synergy of academic exchange This is

gray literature publishing where intense thinking change and speculation take place in scholarship **Overgrown** Julian Raxworthy, 2023-08-01 A call for landscape architects to leave the office and return to the garden Addressing one of the most repressed subjects in landscape architecture this book could only have been written by someone who is both an experienced gardener and a landscape architect With *Overgrown* Julian Raxworthy offers a watershed work in the tradition of Ian McHarg Anne Whiston Spirn Kevin Lynch and J B Jackson As a discipline landscape architecture has distanced itself from gardening and landscape architects take pains to distinguish themselves from gardeners or landscapers Landscape architects tend to imagine gardens from the office representing plants with drawings or other simulations whereas gardeners work in the dirt in real time planting pruning and maintaining In *Overgrown* Raxworthy calls for the integration of landscape architecture and gardening Each has something to offer the other Landscape architecture can design beautiful spaces and gardening can enhance and deepen the beauty of garden environments over time Growth says Raxworthy is the medium of garden development landscape architects should leave the office and go into the garden in order to know growth in an organic nonsimulated way Raxworthy proposes a new practice for working with plant material that he terms the viridic after the tectonic in architecture from the Latin word for green with its associations of spring and growth He builds his argument for the viridic through six generously illustrated case studies of gardens that range from formal to informal approaches from a sixteenth century French Renaissance water garden to a Scottish poet scientist's marginal garden barely differentiated from nature Raxworthy argues that landscape architectural practice itself needs to be gardened brought back into the field He offers a Manifesto for the Viridic that casts designers and plants as vegetal partners in a renewed practice of landscape gardening

The Redemption of the Animals Douglas Sloan, 2015-10-15 As human beings what is our true relationship to the animals on earth What is our responsibility to our fellow creatures Douglas Sloan explores these and other questions in this important book on the human animal connection His explorations are based on personal experience and wide ranging research into the work of Rudolf Steiner and others

including scientist students of the inner life of animals and committed defenders of animal wellbeing Rudolf Steiner describes how from the beginning of creation humans and animals have been united in deep kinship A loss of the sense of this human animal connection has resulted in an immense animal suffering the world over Especially in their suffering the animals now pose for the modern human being many pressing and perplexing questions Are the animals conscious Do they have feelings like ours Do they experience pain Do the animals have a spiritual reality and experience Do the animals have souls and selves Do the animals have capacities for cognitive intelligence emotional empathy language and memory Is there a crucial difference between the human and the animal a basic difference in kind or only a difference in degree Do animals have rights Are we justified in using the animals as we wish eating them hunting them experimenting on them Rudolf Steiner presents a vision of the ultimate redemption of the animals from their suffering What is the nature of this redemption What is our responsibility in making it happen In exploring these and related questions with the help of Rudolf Steiner s work and that of others on the issue we can begin to see the importance in our time of our relating to the animals in a completely new way a relationship that understands and respects the animals inner spiritual being and one that requires a deep grasp of our own spiritual being in relation to theirs In this book Douglas Sloan seeks to help us toward this new relationship with the animals both in concept and in everyday action
