Social Innovation and Sustainability Transition Geoff Desa, Xiangping Jia, 2022-11-09 This book uses a historical and modern lens to reimagine the role that Extension could potentially play in catalyzing reciprocal co learning relationships between Land Grant Universities and their diverse local constituencies The establishment of statewide extension systems was once seen as a way to ensure that Land Grant Universities would be accessible and responsive to all of a state s residents Extension systems continue to offer a front door to a major public university in almost every county of the United States but they tend to be viewed primarily as a way to translate science or distribute information from the university to the public This book argues for the importance of Extension and shows that we are conceiving of this system too narrowly Only by retelling the stories of the Extension and getting people to see themselves as part of the story can we imagine a different future in which state universities and land grant colleges engage more authentically and equitably in two way relationships with their local constituents in catalyzing reciprocal co learning relationships between Land Grant Universities and their diverse local constituencies Chapter Palatable disruption the politics of plant milk chapter Feeding the melting pot inclusive strategies for the multi ethnic city chapter A carrot isn t a carrot isn t a carrot tracing value in alternative practices of food exchange

Lagopoulos,Karin Boklund-Lagopoulou,Maria Giulia Dondero,Jacques Fontanille,Maria Ilia Katsaridou,Rea Walldén,2024-11-18 This book represents a unique collaborative effort to bring together the multiple aspects of the semiotics of images into a coherent approach based on Greimasian and post Greimasian theory Starting with a critical discussion of epistemological and theoretical issues and continuing with methodology and numerous examples of applied analysis it aims to provide the educated reader with a consistent and unified theoretical framework for the semiotic study of visual cultural texts It offers a comprehensive overview of the semiotics of static images such as painting drawing sculpture and photography but also dynamic images such as cinema animation and digital games Readers will benefit from the special emphasis placed on the analysis of the pictorial signifier visual syntax and the structuring of the semantic universe **Mytholudics** Dom Ford,2025-04-21 Games create worlds made of many different elements but also of rules systems and structures for how we act in them So how can we make sense of them Mytholudics Games and Myth lays out an approach to understanding games using theories from myth and folklore Myth is taken here not as an object but as a process a way of expressing meaning It

works to naturalise arbitrary constellations of signs to connect things in meaning Behind the phrase just the way it is is a process of mythologization that has cemented it Mytholudics lays out how this understanding of myth works for the analysis of games In two sections each analysing five digital games it then shows how this approach works in practice one through the lens of heroism and one through monstrosity These ask questions such as what heroic mythology is constructed in Call of Duty What do the monsters in The Witcher tell us about the game s model of the world How does Hellblade Senua s Sacrifice weave a conflict between Norse and Pictish mythology into one between competing models of seeing mental illness This method helps to see games and their worlds in the whole Stories gameplay systems rules spatial configurations and art styles can all be considered together as contributing to the meaning of the game **Virtual Vernacular** Sarah Bonser,2020-03-26 Learn to see the patterns and relationships in visual mediums and buildings as you push the boundaries of design Sarah Bonser s Virtual Vernacular breaks the barriers between architectural theory and game design The text explores the way in which architecture can convey history culture and emotion to occupants audience members and players Divided into three sections the text guides the reader on how to tackle creative problem solving and development strategy Key Features Architectural theory is hard to navigate and this approach is an accessible way to start learning it Learn more specifically how pop culture parodies these design theories Find ways to solve abstract design problems by using the built environment as a case study Learn about technical limitations on the built environment that visually impact the look and feel of spaces Each piece of architectural theory comes with abstracts and applications which is a more organized and network style way to teach an otherwise long winded subject **Combatting Discrimination Against Women in the Gamer Community** Marty Gitlin,2016-07-15 Discrimination in the gamer community is rampant as evidenced by the recent GamerGate controversy Though females make up 45 percent of all gamers nearly 90 percent of all game designers are male This has resulted in troubling portrayals of women in the games which can leave lasting impressions on young people playing them Even more serious is the abuse women face in gamer communities and as professionals in the industry This timely resource will help teens make sense of the issues facing them when they participate in video game culture Popular Pleasures Paul Duncum,2021-08-26 Today s many popular aesthetic pleasures have a very long history Paul Duncum considers the historical critical discourses and socio political issues raised by aesthetic pleasures in fifteen thematic chapters Using illustrative examples from the past present and across cultures he challenges the idea of any decline of cultural standards and argues that no grounds exist for cultural pessimism Refusing to condemn popular culture on the basis of taste he reserves critique for the socio political ideologies aesthetics invariably serve Art history film cultural studies and philosophical aesthetics are each employed to show that the sensory emotional lures of today s popular culture are mostly identical to those of premodern fine art They include the violent the horrific the sentimental the exotic the erotic and the humorous Some of these pleasures derive from our evolutionary biology they are all an important part of what it means to be human and central to

understanding contemporary society Examples are wide ranging including British seaside postcards Disney films Nazi propaganda burlesque modern advertising as well as many exemplars of fine art The book reveals fresh insights for all those studying visual culture art history aesthetics media studies and media and art education *The New Fiction Technologies*
