

Outbreak Movie Questions

The film, *Outbreak*, portrays the efforts of an Army biologist, Sam Daniels, to prevent a global biological disaster. A rare killer virus from the African jungle has started an epidemic in a small southern California community. The virus has a 100% mortality rate. The film follows the scientists and army officials as they trace the epidemic and work to contain it. The story in the film is fictional BUT could something like this really happen?

The questions in Part 1 are listed for you to answer and use to digest what is occurring in the movie. You must take notes and answer the questions during the movie.

Part 2, which can be done after you view the movie, is a list of things that happened during the story. Some of these seem to be minor incidents, but each one has importance in advancing plot. Your job is to tell how each event is important to the story.
