The Problem with Feeding Cities Andrew Deener, 2020-10-10 For most people grocery shopping is a mundane activity Few stop to think about the massive global infrastructure that makes it possible to buy Chilean grapes in a Philadelphia supermarket in the middle of winter Yet every piece of food represents an interlocking system of agriculture manufacturing shipping logistics retailing and nonprofits that controls what we eat or don't *The Problem with Feeding Cities* is a sociological and historical examination of how this remarkable network of abundance and convenience came into being over the last century It looks at how the US food system transformed from feeding communities to feeding the entire nation and it reveals how a process that was once about fulfilling basic needs became focused on satisfying profit margins It is also a story of how this system fails to feed people especially in the creation of food deserts Andrew Deener shows that problems with food access are the result of infrastructural failings stemming from how markets and cities were developed how distribution systems were built and how organizations coordinate the quality and movement of food He profiles hundreds of people connected through the food chain from farmers wholesalers and supermarket executives to global shippers logistics experts and cold storage operators to food bank employees and public health advocates It is a book that will change the way we see our grocery store trips and will encourage us all to rethink the way we eat in this country

Data-Driven Law Edward J. Walters, 2018-07-16 For increasingly data savvy clients lawyers can no longer give it depends answers rooted in anecdote Clients insist that their lawyers justify their reasoning and with more than a limited set of war stories The considered judgment of an experienced lawyer is unquestionably valuable However on balance clients would rather have the considered judgment of an experienced lawyer informed by the most relevant information required to answer their questions *Data Driven Law* *Data Analytics and the New Legal Services* helps legal professionals meet the challenges posed by a data driven approach to delivering legal services Its chapters are written by leading experts who cover such topics as Mining legal data Computational law Uncovering bias through the use of Big Data Quantifying the quality of legal services Data mining and decision making Contract analytics and contract standards In addition to providing clients with data based insight legal firms can track a matter with data from beginning to end from the marketing spend through to the type of matter hours spent billed and collected including metrics on profitability and success

Firms can organize and collect documents after a matter and even automate them for reuse Data on marketing related to a matter can be an amazing source of insight about which practice areas are most profitable Data driven decision making requires firms to think differently about their workflow Most firms warehouse their files never to be seen again after the matter closes Running a data driven firm requires lawyers and their teams to treat information about the work as part of the service and to collect standardize and analyze matter data from cradle to grave More than anything using data in a law practice requires a different mindset about the value of this information This book helps legal professionals to develop this data driven mindset

The Power of And R. Edward Freeman, Bidhan L. Parmar, Kirsten Martin, 2020-06-16 The idea that business is only about the money doesn't hold true in the twenty first century when companies around the world are giving up traditional distinctions in order to succeed Yet our expectations for businesses remain under the sway of an outdated worldview that emphasizes profits for shareholders above all else The Power of And offers a new narrative about the nature of business revealing the focus on responsibility and ethics that unites today's most influential ideas and companies R. Edward Freeman, Kirsten E. Martin and Bidhan L. Parmar detail an emerging business model built on five key concepts: prioritizing purpose as well as profits; creating value for stakeholders as well as shareholders; seeing business as embedded in society as well as markets; recognizing people's full humanity as well as their economic interests; and integrating business and ethics into a more holistic model Drawing on examples across companies, industries and countries they show that these values support persevering in hard times and prospering over the long term Real world success stories disprove the conventional wisdom that there are unavoidable trade offs between acting ethically and succeeding financially The Power of And presents a conceptual revolution about what it means for business to be responsible providing a new story for us to tell in order to help all kinds of companies thrive
