Zimbabwe Investment Guide 2013:

Law & Investment in Africa Tinahse Kondo, 2021-04-19 Zimbabwe has had a chaotic foreign direct investment FDI regime This has created the need for a detailed volume on the most important developments around the protection and treatment of FDI at not only a domestic level but also at bilateral regional and international levels The author argues that while Zimbabwe has now harmonised previously scattered legislation under the Zimbabwe Investment and Development Agency Act Chapter 14:37 and taken measures to reverse to varying degrees controversial policies such as the land reform programme and the Indigenisation and Economic Empowerment Policy scepticism still prevails over the investor friendliness of the FDI regime in Zimbabwe

Economic Management in a Hyperinflationary Environment George Kararach, Raphael O. Otieno, 2016 This volume provides a political economy analysis of leadership and economic management in crises in developing economies based on Zimbabwe's experience

Livestock climate action in Zimbabwe Food and Agriculture Organization of the United Nations, Svinurai, W.; Masunda, B.; Ayabagabo, J.D.D; Cabeza, I.L; Kachidza, F.; Kamana, R.; Reppin, S.; Rulli, M.; Uwizeye, A., 2025-04-25 Zimbabwe is advancing climate change adaptation in its livestock sector with key strategies reflected in both its initial and updated nationally determined contributions NDCs Although various climate smart practices are already being implemented through livestock support programs their contributions to adaptation and mitigation remain largely undocumented resulting in their omission from the NDCs To address this the Department of Livestock Research has introduced a Tier 2 greenhouse gas GHG inventory for cattle allowing for more accurate assessments of mitigation potential and informing the 2025 NDC update This report brings together insights from literature reviews policy analysis and stakeholder consultations to evaluate the current policy landscape for livestock related climate action It highlights the sector's growing vulnerability to climate change including feed scarcity disease outbreaks and declining productivity The report identifies key policy gaps and stresses the importance of capacity building data driven planning and inclusive engagement to enhance climate resilience and reduce emissions in the livestock sector

Grid-locked African Economic Sovereignty Victor Warikandwa, Artwell Nhemachena, 2019-02-06 The emergent so called Fourth Industrial Revolution is regarded by some as a panacea for bringing about development to Africans This book dismisses this flawed reasoning Surfacing how investors are actually looting and plundering Africa how the industrial internet of things the gig economies digital economies and cryptocurrencies breach African political and economic sovereignty the book pioneers what can be called anticipatory economics which anticipate the future of economies It is argued that the future of Africans does not necessarily require degrowth postgrowth postdevelopment postcapitalism or sharing solidarity economies it requires attention to age old questions about African ownership and control of their resources Investors have to invest in ensuring that Africans own and control their resources Further it is pointed out that the historical imperial structural creation of forced labour is increasingly morphing into what we call the structural creation of forced leisure which is no less lethal for Africans Because both the

structural creation of forced labour and the structural creation of forced leisure are undergirded by transnational neo imperial plunder theft robbery looting and dispossession of Africans this book goes beyond the simplistic arguments that Euro America developed due to the industrial revolutions **Coal** Mark C. Thurber,2019-05-07 By making available the almost unlimited energy stored in prehistoric plant matter coal enabled the industrial age and it still does Coal today generates more electricity worldwide than any other energy source helping to drive economic growth in major emerging markets And yet continued reliance on this ancient rock carries a high price in smog and greenhouse gases We use coal because it is cheap cheap to scrape from the ground cheap to move cheap to burn in power plants with inadequate environmental controls In this book Mark Thurber explains how coal producers users financiers and technology exporters drive this supply chain while fragmented environmental movements battle for full incorporation of environmental costs into the global calculus of coal Delving into the politics of energy versus the environment at local national and international levels Thurber paints a vivid picture of the multi faceted challenges associated with continued coal production and use in the twenty first century **The Future of Zimbabwe's Agrarian Sector** Grasian Mkodzongi,2022-06-24 This volume reflects on the recent political developments in Zimbabwe and their current and future impact on the agrarian sector Utilising new empirical data gathered across Zimbabwe the contributors shed light on the liberalisation of agricultural policy after Mugabe Chapters examine how the adoption of neo liberal orthodoxy in agrarian policy making will affect the new agrarian structure looking at issues such as productivity the impact on vulnerable groups changing land tenure arrangements joint ventures and land grabbing Providing a new way of conceptualising Zimbabwe s agrarian futures this book will be of interest to researchers NGOs and policymakers interested in the politics of land and agriculture in Zimbabwe and southern Africa
