Transferring Language Learning and Teaching From Face-to-Face to Online Settings Giannikas, Christina Nicole, 2022-02-18

Language teaching programs have to respond to the need for distance education with teachers working to transfer their material onto online platforms and or learning management systems LMS even though their materials are not designed with distance learning in mind COVID 19 has led to English language teaching programs extending their teaching online for the unforeseeable future and trying to adjust the material to deliver high quality practice The education emergency caused by the COVID 19 pandemic has revealed that the world needs an education system that favors flexibility and resilience to equip educators to face unpredictable emergencies that may arise Transferring Language Learning and Teaching From Face to Face to Online Settings examines the phenomenon of emergency language education further and provides an avenue for language teachers and researchers to share their experience thoughts and suggestions about transferring their material and teaching approaches from face to face f2f to an online setting The edited volume offers a platform for exploring how the field of language teaching is adapting to changes that have derived from the pandemic with a strong focus on the challenges faced and ways to move forward Covering topics such as digital pedagogy and teacher education it is ideal for instructors faculty trainers instructional designers administrators policymakers researchers teachers teacher educators and students **Make Writing Exciting, Grades 3 - 4** Gunzenhauser, 2011-04-18

Write on Write with special education students in grades 3 4 using Make Writing Exciting This 160 page book uses step by step creative ways to teach and evaluate students writing skills It introduces genres of writing in an order that makes sense with one skill building upon another or lessons can be incorporated into an existing curriculum The book also includes a section on how to help struggling writers and students with special needs learn various writing skills The book supports NCTE standards Diagnosis Narratives and the Healing Ritual in Western Medicine James

Meza,2018-07-17 The dominance of illness narratives in narrative healing studies has tended to mean that the focus centers around the healing of the individual Meza proposes that this emphasis is misplaced and the true focus of cultural healing should lie in managing the disruption of disease and death cultural or biological to the individual s relationship with society By explicating narrative theory through the lens of cognitive anthropology Meza reframes the epistemology of narrative and healing moving it from relativism to a philosophical perspective of pragmatic realism Using a novel combination of narrative theory and cognitive anthropology to represent the ethnographic data Meza s ethnography is a valuable contribution in a field where ethnographic records related to medical clinical encounters are scarce The book will be of interest to scholars of medical anthropology and those interested in narrative history and narrative medicine *A Clinical Guide to Applied Dental Materials E-Book* Stephen J. Approach to Modeling the Water-Energy-Land-Food Nexus, Volume II Bernard Amadei, 2019-02-13. This two-volume book describes a flexible and adaptive system-based methodology and associated guidelines for the management and allocation of community-based WELF resources. Over the next 50 years, rapid population urbanization and economic growth worldwide will create unprecedented demands for water, energy, land, and food WELF resources. The discussion on how to meet human needs for WELF resources and how to guarantee their respective securities has changed over time from looking at all four sectors in isolation to understanding their interdependency through the so-called WELF nexus. The approach presented in this book responds to the overall agreement in the WELF nexus literature that the management and allocation of WELF resources at the community level need to be examined in a more systemic, multidisciplinary, participatory, and practical manner while seeking to increase synergies and reduce trade-offs. This book was written to explore the value proposition of that approach. This two-volume book describes a flexible and adaptive system-based methodology and associated guidelines for the management and allocation of community-based WELF resources. Volume 1 focuses on defining the landscape in which the nexus operates and outlines the proposed methodology. Volume 2 explores the quantitative and qualitative modeling of the nexus and landscape using system modeling tools including system dynamics. It presents a road map for the formulation, simulation, selection, and ranking of possible intervention plans. The proposed methodology is designed to serve as a guide for different groups involved in the science and policy decision aspects of the WELF nexus within the context of community development. The methodology focuses mostly on WELF-related issues in small-scale and low-income communities where securing resources is critical to their short and long-term livelihood and development.
