Third World Political Ecology, 1997 *Third World Political Ecology* Raymond L. Bryant, Sinéad Bailey, 1997

The Geopolitics of Melting Mountains Alexander E. Davis, 2023-05-12 The book addresses the urgent need for rethinking the geopolitics and ecology in the Himalaya by emphasising the entanglements between these two factors Most international relations analyses of the Himalaya emphasize the central role of the region s states and their great power struggles By reducing the region to its state actors however we miss the intense more than human diversity of the region and the crucial role that the mountains play in the global environment In doing so the book makes a major contribution to international relations theory by drawing on insights from international political ecology It first theorises international political ecology and examines the Himalaya as a global region before moving looking at the international aspects of political ecology in the Himalaya through key areas of the mountains where international politics and ecology are deeply inextricably linked It presents three detailed case studies of different environmental and political issues in the Himalaya icecaps the India China Pakistan boundary dispute in the western Himalaya foothills and forests the Nepal Bhutan Sikkim borderlands and rivers the India China Bangladesh dispute over the Brahmaputra River basin Each case study draws on a mix of source materials including fieldwork government sources foreign policy discourse Himalayan ethnographies and environmental and ecological sciences scholarship

The Routledge Handbook of Political Ecology Tom Perreault, Gavin Bridge, James McCarthy, 2015-06-12 The Routledge Handbook of Political Ecology presents a comprehensive and authoritative examination of the rapidly growing field of political ecology Located at the intersection of

geography anthropology sociology and environmental history political ecology is one of the most vibrant and conceptually diverse fields of inquiry into nature society relations within the social sciences The Handbook serves as an essential guide to this rapidly evolving intellectual landscape With contributions from over 50 leading authors the Handbook presents a systematic overview of political ecology s origins practices and core concerns and aims to advance both ongoing and emerging debates While there are numerous edited volumes textbooks and monographs under the heading political ecology these have tended to be relatively narrow in scope either as collections of empirically based mostly case study research on a given theme or broad overviews of the field aimed at undergraduate audiences The Routledge Handbook of Political Ecology is the first systematic comprehensive overview of the field With authors from North and South America Europe Australia and elsewhere the Handbook of Political Ecology provides a state of the art examination of political ecology addresses ongoing and emerging debates in this rapidly evolving field and charts new agendas for research policy and activism The Routledge Handbook of Political Ecology introduces political ecology as an interdisciplinary academic field By presenting a state of the art examination of the field it will serve as an invaluable resource for students and scholars It not only critically reviews the key debates in the field but develops them The Handbook will serve as an excellent resource for graduate and advanced undergraduate teaching and is a key reference text for geographers anthropologists sociologists environmental historians and others working in and around political ecology

The Commons in a Glocal World Tobias Haller,Thomas Breu,Tine De Moor,Christian Rohr,Heinzpeter Znoj,2019-04-30 This volume focuses on how in Europe the debate on the commons is discussed in regard to historical and contemporary dimensions critically referencing the work of Elinor Ostrom It also explores from the perspective of new institutional political ecology NIPE how Europe directly and indirectly affected and affects the commons globally Most of the research on the management of commons pool resources is limited to dealing with one of two topics either the interaction between local participatory governance and development of institutions for commons management or a political economy approach that focuses on global change as it is related to the increasingly globalised expansion of capitalist modes of production consumption and societal reproduction This volume bridges the two addressing how global players affect the commons worldwide and how they relate to responses emerging from within the commons in a global local glocal world Authors from a range of academic disciplines present research findings on recent developments on the commons including historical insights new innovations for participatory institutions building in Europe or several types of commons grabbing especially in Africa related to European investments and restrictions on the management of commons at the international level European case studies are included providing interesting examples of local participation in commons resource management while simultaneously showing Europe as a centre for globalized capitalism and its norms and values affecting the rest of the world particularly developing countries This book will be of interest to students and researchers from a wide range of disciplines including natural resource management environmental governance political geography and

environmental history **Ecosystems and Human Health** Crescentia Y. Dakubo, 2010-11-16 Ecosystems and Human Health introduces Ecohealth as an emerging field of study traces its evolution and explains its applications in cross disciplinary and holistic programs Its integrative approach not only focuses on managing the environment to improve health but also analyzes underlying social and economic determinants of health to develop innovative people centered interventions

Environmental Security Rita Floyd, Richard Matthew, 2013-01-04 Economic development population growth and poor resource management have combined to alter the planet's natural environment in dramatic and alarming ways For over twenty years considerable research and debate have focused on clarifying or disputing linkages between various forms of environmental change and various understandings of security At one extreme lie sceptics who contend that the linkages are weak or even non-existent they are simply attempts to harness the resources of the security arena to an environmental agenda At the other extreme lie those who believe that these linkages may be the most important drivers of security in the 21st century indeed the very future of humankind may be at stake This book brings together contributions from a range of disciplines to present a critical and comprehensive overview of the research and debate linking environmental factors to security It provides a framework for representing and understanding key areas of intellectual convergence and disagreement clarifying achievements of the research as well as identifying its weaknesses and gaps Part I explores the various ways environmental change and security have been linked and provides principal critiques of this linkage Part II explores the linkage through analysis of key issue areas such as climate change energy water food population and development Finally the book concludes with a discussion of the value of this subfield of security studies and with some ideas about the questions it might profitably address in the future This volume is the first to provide a comprehensive overview of the field With contributions from around the world it combines established and emerging scholars to offer a platform for the next wave of research and policy activity It is invaluable for both students and practitioners interested in international relations

environment studies and human geography **Exploring Political Ecology** Alexander M. Ervin, 2024-08-30 This book explores some of the conditions and underlying causes of the multiple environmental crises facing humanity Rooted in anthropology but multidisciplinary in scope it surveys the many socio cultural and socio economic errors foibles and follies that brought us to these circumstances Crucially and uniquely it outlines an array of viable and practical solutions some of which are radically different from the current status quo and cultural expectations The first chapter canvasses the emerging interdisciplinary field of political ecology then Part I examines details and trends in agriculture Part II portrays the threats posed by carbon dependent and combustive technologies as well as the hydro and nuclear energy systems now powering the majority of human actions in developed parts of the world and expanding beyond The third part turns to consider solutions including green new deals de growth policies localization agroecology alternative energy systems and many more possibilities The conclusions engage with urgent moral and legal issues and outline social movement strategies all related to

our collective neglect of climate change and then finally speculate upon possible futures This book is key reading for researchers and students interested in climate change across the social and physical sciences and humanities *Political Ecology and Tourism* Sanjay Nepal, Jarkko Saarinen, 2016-02-26 Political ecology explicitly addresses the relations between the social and the natural arguing that social and environmental conditions are deeply and inextricably linked Its emphasis on the material state of nature as the outcome of political processes as well as the construction and understanding of nature itself as political is greatly relevant to tourism Very few tourism scholars have used political ecology as a lens to examine tourism centric natural resource management issues This book brings together experts in the field with a foreword from Piers Blaikie to provide a global exploration of the application of political ecology to tourism It addresses the underlying issues of power ownership and policies that determine the ways in which tourism development decisions are made and implemented Furthermore contributions document the complex array of relationships between tourism stakeholders including indigenous communities and multiple scales of potential conflicts and compromises This groundbreaking book covers 15 contributions organized around four cross cutting themes of communities and livelihoods class representation and power dispossession and displacement and environmental justice and community empowerment This book will be of great interest to students and scholars in tourism geography anthropology sociology environmental studies and natural resources management *Contesting Conservation* Saloni Gupta, 2018-02-03 This book explores today's changing intellectual climate wherein understanding politics at different levels from global to local is considered mandatory in order to appraise the outcome of nature conservation interventions By carefully examining two such processes the ban on shahtoosh trade and the National Afforestation Programme in the Indian state of Jammu and Kashmir the book reveals how these processes are influenced by politics at different levels from their introduction at the macro level to their implementation at the micro level and in turn become coloured by the agendas and interests of the various stakeholders involved Throughout the book one priority is to give a voice to the poor resource users who have been traditionally dependent on wildlife and forest resources for mere subsistence Yet these same people are who bear the brunt of nature conservation costs rather than those actors who are responsible for the most serious violations in pursuit of greater profits Contemporary Environmental Sociology is chiefly characterised by its focus on power relations in resource conservation and management In political ecology literature too especially after recognising the paradoxes and limitations of approaches such as sustainable development sustainable livelihoods and community based natural resource management there is a growing concern for critical analyses of multi level politics in connection with nature conservation The purpose of the book is not to challenge the gravity of environmental concerns but to question the dominance of conservation interests over the subsistence needs of local communities and to strike a balance between environmental and social justice It argues that unless and until more just accountability for the affected populations is ensured conservation policies are unlikely to meet the goals of sustainable resource management

Given its critical engagement with human nature conflicts in Jammu and Kashmir the book offers a unique resource for students and scholars of Environmental Sociology Political Ecology Natural Resources Management Conflict Studies and Human Rights Studies *Concise Encyclopedia of Human Geography* Loretta Lees, David Demeritt, 2023-02-14 With 78 specially commissioned entries written by a diverse range of contributors this essential reference book covers the breadth and depth of human geography to provide a lively and accessible state of the art of the discipline for students instructors and researchers Sport and the Environment Brian Wilson, Brad Millington, 2020-07-30 This volume examines sport's relationship with the environment in the context of the ongoing climate crisis Contributors examine how sport is implicated in environmentally damaging activities how decisions are made about how to respond to environmental issues who benefits most and least from these decisions The Everyday Politics of Resources Nga Dao, 2025-05-15 The Everyday Politics of Resources explores the impact of development processes on the lives livelihoods and landscapes of the people of Northwest Vietnam Over the past two decades the homes and farms of hundreds of thousands of people have been appropriated to make way for dams rubber plantations and mining operations While this development has enriched the state and private enterprises it has also resulted in widespread hardship impoverishment and long term environmental destruction Nga Dao draws on more than twenty years of on the ground research in the region to show how these developments have affected people in vastly uneven ways creating wealth and stability for some while dispossessing others Filled with poignant and sometimes angry narratives by those who have lost their land and traditional livelihoods as well as more triumphant stories from those who have prospered under the capitalist transformation of the region The Everyday Politics of Resources is a timely urgent examination of modernization's benefits and costs *Southeast Asia Transformed* Chia Lin Sien, 2003 Southeast Asia with a total population of 520 million remains a region characterized by fragmentation diversity and considerable internal conflict despite the unifying influence of the Association of Southeast Asian Nations ASEAN formed some thirty five years ago In the new millennium it has lost the distinction of being one of the world's faster growing group of economies since the 1997 financial crisis While it has benefited from the winds of globalization it has now to cope with the painful adjustments to problems that stem from the inadequacies of good governance and structural changes This volume brings together the combined insights of specialists who have worked and lived in the region The theme of the book is change and transformation The authors identify the trends and forces that propel the region along and then bring in discussions on key issues In some cases they offer their views on the future of the region and recommendations for solutions The intention of the book is to offer a scholarly review of the region's development over the past half century and to provide a firm basis for forecasting its further evolution in the new millennium **The Politics of Bioeconomy and Sustainability** Mairon G. Bastos Lima, 2021-04-15 This book addresses the underexposed political dimensions of bioeconomy promotion Who wins and who loses How are institutions being shaped and by whom Drawing from experiences since the earlier days of

biofuels promotion it explores in unprecedented detail the global drive away from fossil fuels and towards a biomass based economy Multipurpose agriculture gains ever more traction as countries create new bio based value chains or rather value webs Governance in this regard proves to be key for steering developments towards inclusive agri food biomass systems instead of fueling just a handful of flex crops ridden with social equity and other environmental issues Based on a rich global level analysis of bioeconomy promotion and three in depth case studies of key emerging economies Brazil India and Indonesia the book also innovatively examines sustainability politics in Global South democracies Ultimately this book is about finding the politics for a fairer bioeconomy in the years and decades to come **Knock on Wood** W. Scott

Prudham,2012-11-12 Scott Prudham investigates a region that has in recent years seen more environmental conflict than perhaps anywhere else in the country the old growth forests of the Pacific Northwest Prudham employs a political economic approach to explain the social and economic conflicts arising from the timber industry s presence in the region As well he provides a thorough accounting of the timber industry itself tracing its motivations practices and labor relations
